Dear HL7 Member,

The v2 Management Group has asked me to forward you a notification relating to non-normative Messaging Schemas of the currently published "**HL7 Version 2.6 Messaging Standard**". The referenced document can be found on the HL7 Web site under the Standards Tab > Primary Standards > HL7 Version 2 Product Suite.

The affected informative file has been updated. However, the Management Group felt that a push for increased interoperability warranted that this letter be sent out to insure that all who use the base standard have accurate materials.

Sincerely,

A handwritten signature in black ink, appearing to read "W. Kubick", written in a cursive style.

HL7 CTO

Errata

#	Chapter	Section	Element	Correction	Type of Correction
1	Messaging Schemas	segments.xsd	All segments	Fields with a value of "N" in the RP/# column of the message definition table of the base standard incorrectly included a value of "unbounded" for maxOccurs in the segments.xsd file. This has been corrected to the expected value of "1".	Technical correction
