

# Chapter 2C

## Table of Contents

Chapter 2C.....	1
Table of Contents .....	1
NOTE TO BALLOTERS: .....	22
2.A Code Tables.....	24
<b><i>DEFINITIONS</i></b> .....	24
<b><i>GUIDE TO LAYOUT OF HL7 VERSION 2 CODE TABLES</i></b> .....	29
Status Codes .....	31
Tables.....	31
0001 - Administrative Sex .....	31
0002 - Marital Status.....	33
0003 - Event .....	34
0004 - Patient Class .....	48
0005 - Race.....	49
0006 - Religion.....	49
0007 - Admission Type.....	52
0008 - Acknowledgment code.....	53
0009 - Ambulatory Status.....	54
0010 - Physician ID .....	56
0017 - Transaction Type.....	56
0018 - Patient Type .....	57
0019 - Anesthesia Code .....	57
0021 - Bad Debt Agency Code .....	58
0022 - Billing Status.....	58
0023 - Admit Source .....	58
0024 - Fee Schedule .....	59
0027 - Priority.....	59
0032 - Charge/Price Indicator.....	60
0038 - Order status .....	61
0042 - Company Plan Code.....	62
0043 - Condition Code.....	62
0044 - Contract Code .....	63

0045 - Courtesy Code.....	63
0046 - Credit Rating.....	64
0049 - Department Code .....	64
0050 - Accident Code.....	64
0051 - Diagnosis Code.....	65
0052 - Diagnosis Type.....	65
0055 - Diagnosis Related Group.....	66
0056 - DRG Grouper Review Code .....	66
0059 - Consent Code .....	67
0061 - Check Digit Scheme.....	67
0062 - Event Reason .....	68
0063 - Relationship .....	69
0064 - Financial Class .....	71
0065 - Specimen Action Code .....	71
0066 - Employment Status.....	73
0068 - Guarantor Type.....	74
0069 - Hospital Service.....	74
0072 - Insurance Plan ID.....	75
0073 - Interest Rate Code.....	76
0074 - Diagnostic Service Section ID.....	76
0076 - Message Type .....	78
0078 - Interpretation Codes .....	84
0080 - Nature of Abnormal Testing.....	85
0083 - Outlier Type .....	86
0084 - Performed by .....	87
0085 - Observation Result Status Codes Interpretation.....	88
0086 - Plan ID .....	89
0087 - Pre-Admit Test Indicator.....	90
0088 - Procedure Code.....	90
0091 - Query Priority.....	91
0092 - Re-Admission Indicator.....	92
0093 - Release Information.....	93
0098 - Type of Agreement.....	93
0099 - VIP Indicator .....	94
0100 - Invocation event.....	95
0103 - Processing ID .....	96
0104 - Version ID .....	97
0105 - Source of Comment.....	98

0110 - Transfer to Bad Debt Code .....	99
0111 - Delete Account Code.....	100
0112 - Discharge Disposition.....	100
0113 - Discharged to Location.....	101
0114 - Diet Type.....	101
0115 - Servicing Facilities .....	101
0116 - Bed Status .....	102
0117 - Account Status.....	103
0118 - Major Diagnostic Category .....	103
0119 - Order Control Codes.....	104
0121 - Response Flag .....	108
0122 - Charge Type.....	109
0123 - Result Status.....	111
0124 - Transportation Mode.....	112
0125 - Value Type .....	113
0126 - Quantity Limited Request.....	116
0127 - Allergen Type.....	118
0128 - Allergy Severity.....	119
0129 - Accommodation Code.....	120
0130 - Visit User Code .....	120
0131 - Contact Role .....	121
0132 - Transaction Code.....	123
0133 - Procedure practitioner identifier code type .....	123
0135 - Assignment of Benefits.....	124
0136 - Yes/no Indicator.....	125
0137 - Mail Claim Party.....	126
0139 - Employer Information Data .....	127
0140 - Military Service.....	127
0141 - Military Rank/Grade.....	128
0142 - Military Status .....	129
0143 - Non-covered Insurance Code .....	130
0144 - Eligibility Source .....	131
0145 - Room Type.....	132
0146 - Amount Type.....	133
0147 - Policy Type.....	134
0148 - Money or Percentage Indicator.....	135
0149 - Day Type.....	136
0150 - Certification Patient Type.....	137

0151 - Second Opinion Status.....	138
0152 - Second Opinion Documentation Received.....	138
0153 - Value Code.....	139
0155 - Accept/Application Acknowledgment Conditions.....	139
0159 - Diet Code Specification Type.....	140
0160 - Tray Type.....	141
0161 - Allow Substitution.....	142
0162 - Route of Administration.....	143
0163 - Body Site.....	145
0164 - Administration Device.....	148
0165 - Administration Method.....	149
0166 - RX Component Type.....	150
0167 - Substitution Status.....	151
0168 - Processing Priority.....	152
0169 - Reporting Priority.....	153
0170 - Derived Specimen.....	155
0171 - Citizenship.....	156
0172 - Veterans Military Status.....	156
0173 - Coordination of Benefits.....	157
0174 - Nature of Service/Test/Observation.....	158
0175 - Master File Identifier Code.....	160
0177 - Confidentiality Code .....	162
0178 - File Level Event Code.....	163
0179 - Response Level.....	164
0180 - Masterfile Action Code.....	165
0181 - MFN Record-level Error Return.....	166
0182 - Staff type.....	168
0183 - Active/Inactive .....	168
0184 - Department .....	169
0185 - Preferred Method of Contact.....	169
0186 - Practitioner Category.....	171
0187 - Provider Billing.....	171
0188 - Operator ID.....	172
0189 - Ethnic Group .....	172
0190 - Address Type .....	173
0191 - Type of Referenced Data .....	176
0193 - Amount Class .....	177
0200 - Name Type.....	178

0201 - Telecommunication Use Code.....	181
0202 - Telecommunication Equipment Type.....	182
0203 - Identifier Type .....	183
0204 - Organizational Name Type.....	199
0205 - Price Type .....	200
0206 - Segment Action Code.....	201
0207 - Processing Mode .....	202
0208 - Query Response Status.....	203
0209 - Relational Operator.....	205
0210 - Relational Conjunction.....	206
0211 - Alternate Character Sets.....	207
0212 - Nationality.....	210
0213 - Purge Status Code.....	211
0214 - Special Program Code .....	212
0215 - Publicity Code.....	213
0216 - Patient Status Code.....	214
0217 - Visit Priority Code.....	215
0218 - Patient Charge Adjustment .....	216
0219 - Recurring Service Code.....	216
0220 - Living Arrangement .....	217
0222 - Contact Reason.....	218
0223 - Living Dependency.....	218
0224 - Transport Arranged.....	220
0225 - Escort Required.....	221
0227 - Manufacturers of Vaccines (code=MVX) .....	222
0228 - Diagnosis Classification.....	223
0229 - DRG Payor.....	224
0230 - Procedure Functional Type .....	224
0231 - Student Status.....	226
0232 - Insurance Company Contact Reason.....	227
0233 - Non-Concur Code/Description.....	228
0234 - Report Timing .....	228
0235 - Report Source .....	229
0236 - Event Reported To.....	231
0237 - Event Qualification.....	232
0238 - Event Seriousness.....	233
0239 - Event Expected.....	234
0240 - Event Consequence.....	235

0241 - Patient Outcome .....	236
0242 - Primary Observer's Qualification.....	238
0243 - Identity May Be Divulged.....	239
0244 - Single Use Device.....	240
0245 - Product Problem.....	240
0246 - Product Available for Inspection.....	241
0247 - Status of Evaluation .....	241
0248 - Product Source.....	242
0249 - Generic Product .....	244
0250 - Relatedness Assessment.....	244
0251 - Action Taken in Response to the Event.....	245
0252 - Causality Observations.....	246
0253 - Indirect Exposure Mechanism.....	248
0254 - Kind of Quantity.....	249
0255 - Duration Categories.....	254
0256 - Time Delay Post Challenge .....	256
0257 - Nature of Challenge.....	258
0258 - Relationship Modifier.....	259
0259 - Modality.....	260
0260 - Patient Location Type.....	261
0261 - Location Equipment .....	262
0262 - Privacy Level .....	263
0263 - Level of Care .....	264
0264 - Location Department .....	265
0265 - Specialty Type.....	266
0267 - Days of the Week.....	267
0268 - Override.....	268
0269 - Charge On Indicator.....	269
0270 - Document Type.....	271
0271 - Document Completion Status.....	272
0272 - Document Confidentiality Status .....	273
0273 - Document Availability Status .....	274
0275 - Document Storage Status .....	275
0276 - Appointment reason codes.....	276
0277 - Appointment Type Codes.....	277
0278 - Filler status codes.....	278
0279 - Allow Substitution Codes.....	280
0280 - Referral Priority.....	281

0281 - Referral Type.....	282
0282 - Referral Disposition .....	283
0283 - Referral Status .....	284
0284 - Referral Category.....	285
0285 - Insurance Company ID Codes.....	287
0286 - Provider Role.....	287
0287 - Problem/Goal Action Code.....	288
0288 - Census Tract .....	289
0289 - County/Parish.....	290
0291 - Subtype of Referenced Data.....	290
0292 - Vaccines Administered.....	292
0293 - Billing Category.....	292
0294 - Time Selection Criteria Parameter Class Codes.....	293
0295 - Handicap.....	295
0296 - Primary Language.....	295
0297 - CN ID Source .....	295
0298 - CP Range Type.....	296
0299 - Encoding.....	297
0300 - Namespace ID .....	298
0301 - Universal ID Type.....	299
0302 - Point of Care.....	302
0303 - Room.....	303
0304 - Bed.....	303
0305 - Person Location Type .....	303
0306 - Location Status .....	305
0307 - Building .....	305
0308 - Floor .....	305
0309 - Coverage Type.....	306
0311 - Job Status .....	307
0312 - Policy Scope .....	308
0313 - Policy Source.....	308
0315 - Living Will Code.....	309
0316 - Organ Donor Code.....	310
0317 - Annotations.....	311
0319 - Department Cost Center.....	313
0320 - Item Natural Account Code .....	313
0321 - Dispense Method.....	313
0322 - Completion Status.....	315

0324 - Location Characteristic ID.....	316
0325 - Location Relationship ID.....	317
0326 - Visit Indicator .....	318
0327 - Job Code.....	319
0328 - Employee Classification.....	320
0329 - Quantity Method.....	320
0330 - Marketing Basis .....	321
0331 - Facility Type.....	322
0332 - Source Type.....	323
0333 - Driver's License Issuing Authority.....	324
0334 - Disabled Person Code .....	325
0335 - Repeat Pattern.....	326
0336 - Referral Reason .....	328
0337 - Certification Status .....	329
0338 - Practitioner ID Number Type.....	330
0339 - Advanced Beneficiary Notice Code.....	332
0340 - Procedure Code Modifier .....	333
0341 - Guarantor Credit Rating Code.....	335
0342 - Military Recipient .....	335
0343 - Military Handicapped Program Code .....	335
0344 - Patient's Relationship to Insured .....	336
0345 - Appeal Reason.....	337
0346 - Certification Agency .....	338
0347 - State/Province.....	338
0350 - Occurrence Code .....	339
0351 - Occurrence Span .....	339
0353 - CWE statuses .....	340
0354 - Message Structure.....	341
0355 - Primary Key Value Type.....	350
0356 - Alternate Character Set Handling Scheme.....	351
0357 - Message Error Condition Codes.....	353
0358 - Practitioner Group .....	355
0359 - Diagnosis Priority .....	356
0360 - Degree/License/Certificate.....	357
0361 - Application.....	359
0362 - Facility.....	360
0363 - Assigning Authority.....	360
0364 - Comment Type .....	361

0365 - Equipment State .....	362
0366 - Local/Remote Control State.....	363
0367 - Alert Level.....	365
0368 - Remote Control Command.....	366
0369 - Specimen Role.....	367
0370 - Container Status.....	369
0371 - Additive/Preservative.....	371
0372 - Specimen Component .....	374
0373 - Treatment.....	375
0374 - System Induced Contaminants.....	376
0375 - Artificial Blood.....	377
0376 - Special Handling Code.....	378
0377 - Other Environmental Factors.....	380
0378 - Carrier Type .....	381

NOTE TO BALLOTERS:

This is the Second Normative Ballot for Version 2.9.1.

Please ballot on chapter content only as it contains all new changes due to V2.9.1 proposals to the standard. Any additional suggested changes will be found 'Out of Scope'. The formatting of the chapters is mainly driven by the requirement to automatically extract data for automatic consistency checking and to build the HL7 V2.9.1 Database.

The following table itemizes the changes that have been applied to the chapter.

HL7 HQ, the Work Group Chairs and the International Affiliates thank you for your consideration!  
For this chapter we have the following questions:

Section	Section Name	Change Type	Proposal #	Substantive Y/N	Line Item
<b>0003</b>	Event	Update O59 description	V2-25406		
<b>0717</b>	Access Restriction Value	Updated description	V2-25407		

<b>Section</b>	<b>Section Name</b>	<b>Change Type</b>	<b>Proposal #</b>	<b>Substantive Y/N</b>	<b>Line Item</b>
<b>0820</b>	<i>Gender Harmony Concepts</i>	Updated descriptive text	V2-25441, V2-25459	<b>No</b>	
<b>0821</b>	<i>Gender Identity</i>	Update code system, value set and table	V2-25425, V2-25434, V2-25447, V2-25460	<b>Yes</b>	
<b>0822</b>	<i>Personal Pronouns</i>	Update code system, value set and table	V2-25462, V2-25487, V2-25507	<b>Yes</b>	
<b>0823</b>	<i>Sexual Orientation</i>	Update code system, value set and table	V2-25463, V2-25465, V2-25468	<b>Yes</b>	
<b>0824</b>	<i>Recorded Sex or Gender Type</i>	Remove broken link	V2-25449	<b>No</b>	
<b>0824</b>	<i>Recorded Sex or Gender Type</i>	Remove code	V2-25438	<b>No</b>	
<b>0824</b>	<i>Recorded Sex or Gender Type</i>	Update description	V2-25420	<b>No</b>	
<b>0825</b>	<i>International Equivalent</i>	Removed table	V2-25422, V2-25452, V2-25453	<b>Yes</b>	
<b>0826</b>	<i>Source Document Type for Recorded Sex or Gender</i>	Update name/description	V2-25439	<b>No</b>	
<b>0827</b>	<i>Source Document Jurisdiction for Recorded Sex or Gender</i>	Update name/description	V2-25454	<b>No</b>	
<b>Many</b>	-	Technical corrections to URLs to fix a number of broken / missing/incorrect URLs for code systems and value sets	V2-25534	<b>No</b>	
<b>0953</b>	<i>Security Label Handling Instructions</i>	Added missing second code system information for the chapter	V2-25535	<b>No</b>	
<b>0719</b>	<i>Access Restriction Reason code</i>	Fix value set URL and OID	V2-25533	<b>No</b>	
<b>0396</b>	<i>Coding System</i>	Add entries for DataAbsentReason and Sex Parameter for Clinical Use	V2-25427	<b>Yes</b>	

<b>Section</b>	<b>Section Name</b>	<b>Change Type</b>	<b>Proposal #</b>	<b>Substantive Y/N</b>	<b>Line Item</b>
<b>0828</b>	<i>Sex Parameter for Clinical Use</i>	Updated name and added code system representation for V2	V2-25427	<b>Yes</b>	

## 2.A Code Tables

The Code Tables chapter contains the code tables originally documented in individual chapters of the HL7 Version 2 Standard. In HL7 Version 2.7, a proposal was accepted to move all of the tables to a common document. This separation will allow these artifacts, which are often subject to more frequent change to meet regulatory requirements, to be ballotable on a more responsive schedule than the rest of the standard. The meta-data tables for each table will support harmonization with HL7 Version 3 and Clinical Document Architecture.

**Note:** The Vocabulary Work Group is the steward of this section.

### DEFINITIONS

Since the publication of HL7 v 2.7, there has been a migration toward terminology used in Version 3. Version 3 defines Code System and Value Set as follows:

#### Code System

A Code System is defined as a collection of codes with associated designations, meanings and associations. The persistent representation of a Code System includes meta-data about the code system itself, as well as the contents of the Code System.

Examples of Code Systems include ICD-9 CM, SNOMED CT, LOINC, and CPT. To meet the requirements of a Code System as defined by HL7, a given Concept Code must resolve to one and only one meaning within the Code System. Given this definition, each table in the HL7 Version 2 standard represents a different Code System since Concept Codes are sometimes used in different tables to have different meanings. For example, the Concept Code “M” in the gender Code System means “Male”, while “M” in the marital status Code System means “Married”.[p.60]

#### Value Set

A Value Set represents a uniquely identifiable set of valid concept representations, where any concept representation can be tested to determine whether or not it is a member of the value set.

Value set complexity may range from a simple flat list of concept codes drawn from a single code system, to an unbounded hierarchical set of possibly post-coordinated expressions drawn from multiple code systems.

Value sets exist to constrain the content for a coded element in an HL7 static model or data type property. Value sets cannot have null content, and must contain at least one concept representation where any given concept is generally (but not required to be) represented by only a single code within the Value Set.

HL7 defines five table types, reflecting content ownership: HL7 defined, HL7 defined but outside of the Version 2 maintenance space, User-defined, Imported, and Externally defined. Local implementations may further constrain these table types.

As of v 2.9 OID assignments and versioning information for those V2 tables that define code sets is now published. This work is intended to provide support for mapping vocabulary objects between V2 and V3/CDA systems. As of v 2.9, work has also begun to represent FHIR identifiers and web page renderings for content that is primarily maintained and published in the FHIR family of HL7 Standards; this information is available for only the HL7-EXT type tables.

## *HL7 Tables*

An HL7 table is a set of values defined and published by HL7. They are a part of the HL7 Standard because they affect the interpretation of the messages that contain them. These values may not be redefined locally; however, the table itself may be extended to accommodate locally defined values. This is particularly applicable in the case of [HL7 Table 0003 – Event Type](#). The ID data type is most often used to encode values for HL7 tables. The values are listed later in this chapter in the section Coded Content for all HL7 Tables.

HL7 tables can be thought of as universally used tables. This begins to bring this structure in line with V3 terminology.

This is denoted in the table content listing below as "HL7".

## *HL7-External Tables*

As of v 2.9, several new tables hold content which is hosted out of HL7 Version 3 Standards, and published as part of HL7 Version 3 Normative Editions. Therefore the content of these tables is defined and maintained by HL7, but are external to the Version 2 product family maintenance process. These tables will contain URLs in the table descriptions in this chapter so that readers may browse to the enumerations of the table content for convenience. These tables function exactly like the HL7 Tables described immediately above.

This is denoted in the table content listing below as "HL7-EXT".

## *User-defined Tables*

A user-defined table is a set of values that are locally or site defined. This accommodates certain fields, like [PV1-3 - Assigned Patient Location](#), which will have values that vary from institution to institution. Even though these tables are not defined in the Standard, they are given a user-defined table number to facilitate implementations. HL7 sometimes publishes suggested values that a site may use as a starter set (e.g. [Table 0004 - Patient class](#)). The CWE data type is often used to encode values for these tables. Note that some of these tables (e.g., [Table 0302 - Point of Care](#)) may reference common master files.

There are some user-defined tables that contain values that might be standardized across institutions but for which no applicable official standard exists. For these a set of **suggested** values may be listed as the Coded Content for these tables.. These suggested values appear in the text in the standard box format (e.g., [HL7 Table 0062 - Event Reason](#)). It is recommended that these values be used where applicable within an institution and serve as a basis for extensions as required. These values may, however, be redefined locally. The appropriate functional work group within HL7 solicits suggestions for additional values from institutions that are applying the Standard. For those User-defined Tables without any such list of suggested codes, the phrase "No suggested values" is included in the table description with the table metadata, and there is no standard 'box' of Coded Content.

This is denoted in the table content listing below as "User".

## *External Tables*

As of v 2.7, external tables should use the acronym (e.g. UCUM or CVX) that has an explicit table 0396 entry and the table number (implicit 0396 entry in the form of HL7nnnn) will be retired; it is recommended to use the "HL7nnnn" format only for those tables that have local content or do not have entries in Table 0396.

An External table is a set of coded values defined and published by another standards organization, or other external agencies recognized by HL7. External tables are used to populate fields like [FT1-19 - Diagnosis Code - FT1](#). Another example is the encoding of clinical observations using LOINC codes. The CF, CNE and CWE data type are used to represent values for these fields.

External tables arise from applications where the concepts and possibly the codes are established by external agencies due to regulatory requirements or agreements between HL7 and other Standards Developing Organizations.

This is denoted in the table content listing below as "External".

External tables may have had their external content replicated for publishing purposes in this Chapter, in which case they are referred to as 'Imported'. Others may have a pointer, OID, URL, or other notation that indicates where the table content may be located; these are referred to as 'Referenced'.

## Referenced Tables

A referenced table is a set of coded values defined and published by another standards organization or external agency outside of HL7. Referenced tables are used to populate fields like [FT1-19-Diagnosis Code - FT1](#). Another example is the encoding of clinical observations using LOINC codes. The CF, CNE and CWE data type are used to represent values for these fields.

The content of a referenced table is not included in the HL7 Standard. The user will need to access the official source.

The data type for the field will be CWE if 1) other tables are allowed in the field **or** 2) the external table may be locally extended **or** 3) when the code may be replaced by local text.

The data type for the field will be CNE if 1) no other table is allowed in the field **and** 2) the external table may **not** be locally extended **and** 3) text may not replace the code. A CNE field must have an HL7 defined or external table associated with it. A CNE field may be context sensitive such that a choice of explicit coding systems or value sets might be designated.

## Imported Tables

**An Imported table** is a set of coded values defined and published by another standards organization or external agency outside of HL7. Imported tables are published by HL7 with permission, and on behalf of these other organizations with the HL7 Standards. Their contents are not subject to approval by HL7 ballot. Note that these tables may be updated more frequently than the HL7 Standards.

Imported tables differ from External tables in that they have been imported into the HL7 standard subject to specific license or copyright requirements of the supplier/author. HL7 users will need to abide by the licensing and copyright requirements of the source when applicable.

[Imported Table 0834 – Mime Types](#) is an example of an imported table.

The data type rules apply as defined for the imported table.

Note that as of Version 2.9, most of the tables whose content was imported in older version of the Standard have had their enumerated lists removed; refer to the links provided to access the latest version of the content directly from the sources provided by the external organizations. These have had their table types changed to "External".

## Local Tables

A local table is a table with a non-HL7 assigned table identifier and which contains a set of locally or site defined values. It may be locally assigned to local fields in Z segments or to HL7 fields having a CWE data type.

## CWE Examples

### ICD Examples

A simple example for code is the ICD-9 code for headache, which is "784.0".

```
| 784.0^Headache^I9^^^^^general headache^^^^^2.16.840.1.113883.6.42|
```

A possible ICD-10 equivalent is "G44.1" (the ICD-10 classifications are slightly different).

```
| G44.1^Headache^I10^^^^^general headache^^^^^2.16.840.1.113883.6.3|
```

## Coding Failure Examples

A common situation with CWE is when the actual concept cannot be properly represented in a particular coding system. Usually this circumstance arises where the concept is expected to be represented in a particular coding system. For the purposes of these examples, we assume that all these examples are for an observation value of type CWE that is bound to the full Snomed-CT valueset (Example OID for the value set = 2.16.840.1.113883.19.11.1 as published 11-June 2007, Real OID for the SNOMED-CT code system = 2.16.840.1.113883.6.96). *Important Note: The OID root 2.16.840.1.113883.19 is an HL7 OID used for example-only OIDs and OIDs in this space are never*

*valid in real instances. The OIDs used in these examples that in the OID space 2.16.840.1.113883.6, 2.16.840.1.113883.5 and 2.16.840.1.113883.11 are the correct OIDs for use in production instances.*

The simplest case is where the CWE is not represented in the instance at all, or simply represented as no information.

```
|U^^HL70353|
```

However this is not a very useful representation - frequently the source system knows more information, and it is still useful to convey that information to the destination system, while still labeling the coding as incomplete.

```
|^^SCT^^^^^^^^^2.16.840.1.113883.6.96|
```

or it may be encoded as

```
|^^SCT^^^^^^^^^2.16.840.1.113883.19.11.1^20070711|
```

Both examples say that the concept cannot be coded in SNOMED. Even more useful is to convey some specific information about the concept, even though it cannot be represented in SNOMED:

```
|^^SCT^^^^^Burnt ear with iron. Burnt other ear calling for ambulance^^^^^2.16.840.1.113883.6.96|
```

It is also possible that the content was first encoded in some other code system than SNOMED, and the source system was unable to encode the value in SNOMED.

```
|burn^^L96^^^^^Burnt ear with iron. Burnt other ear calling for ambulance^^^^^2.16.840.1.113883.19.5.2|
```

In this case, because the type is CWE, local extensions are allowed, and the source system can simply use its own codeSystem (here identified by the OID "2.16.840.1.113883.19.5.2", which is an example OID) to extend the other code system. In fact, the source system can also use a code from another well known code system, such as ICD-9. If ICD-9 had a code "A10.1" which stood for this same concept, then this would be valid:

```
|A10.1^^I9^^^^^Burnt ear with iron. Burnt other ear calling for ambulance^^^^^2.16.840.1.113883.6.42|
```

All these examples have assumed that the attribute is bound to the fictitious value set 2.16.840.1.113883.19.11.1 which is all of SNOMED-CT. If the value set was extended to include the LOINC codes as well, it would no longer be appropriate to encode a failure to code like this:

```
|^^SCT^^^^^^^^^2.16.840.1.113883.6.96|
```

Since it is not true that the concept could not be coded from SNOMED-CT - it could not be coded in either SNOMED-CT or LOINC. For this reason, it is appropriate to encode the failure to code in the valueSet form:

```
|^^SCT^^^^^^^^^2.16.840.1.113883.19.11.1^20070711|
```

## Expression examples

Expressions generally arise with complex medical terminologies such as SNOMED. For example, SNOMED CT defines a concept "cellulitis (disorder)" (128045006) an attribute "finding site" (363698007) and another concept "foot structure (body structure)" (56459004). SNOMED CT allows these codes to be combined in a code phrase:

128045006:{363698007=56459004}

The full CWE form for this is:

```
|128045006:{363698007=56459004}^^SCT^^^^^Cellulitis of the  
foot^^^^^2.16.840.1.113883.6.42|
```

The description of the SNOMED CT compositional expression language may be found on the Snomed International website at <https://www.snomed.org/news-articles/snomed-ct-compositional-grammar-specification-and-guide>. The next two examples are based on SNOMED CT Core Edition 2007-01-31.

This first example is the SNOMED CT code for "fracture of left tibia". It shows issues associated with grouping and nesting.

```
31978002|fracture of tibia|: 272741003|laterality|=7771000|left|
```

Strictly speaking (in normal form) a "fracture of left tibia" is not a "left fracture" of a "tibia bone" but is a "fracture" of the "left" "tibia bone" (that is, the qualification of "left" applies to the bone not to the fracture). Also note in this example that the fracture and bone are grouped - this may look irrelevant but is potentially significant for combined fractures where different morphology may apply to different bones. An alternative rendering for this same concept is:

```
64572001|disease|:{116676008|associated morphology|=72704001|fracture|,  
363698007|finding site|=(12611008|bone structure of  
tibia|:272741003|laterality|=7771000|left|)}
```

The second example shows a more complicated grouping and nesting structure. The SNOMED CT expression for "past history of fracture of left tibia" includes nesting even in its simplest form because the laterality does not apply to the past history but rather to the disorder.

```
417662000|past history of clinical finding|:246090004|associated finding|=  
(31978002|fracture of tibia|: 272741003|laterality|=7771000|left|)
```

The alternative rendering is even more nested:

```
243796009|situation with explicit context|:246090004|associated finding|=  
(64572001|disease|:{116676008|associated morphology|=72704001|fracture|,  
363698007|finding site|=(12611008|bone structure of tibia|:  
272741003|laterality|=7771000|left|)}),408729009|finding context|=410515003|known present|,408731000|temporal context|=410513005|past|,  
408732007|subject relationship context|=410604004|subject of record|
```

These are provided as examples of SNOMED expression syntaxes. A full discussion the merits of the different forms, their relationship and how to work with them can be found in the SNOMED compositional expression language definition referred to above.

It is important to note that the expression syntax and semantic rules are specified by the code system. For instance, in SNOMED CT, there are a defined set of qualifying attributes, and only Findings and Disorders can be qualified with the "finding site" attribute. CWE does not provide for normalization of compositional expressions; therefore, it is possible to create ambiguous expressions. Users should understand that they must provide the additional constraints necessary to assure unambiguous data representation, if they are planning to create compositional expressions using CWE. Otherwise, they risk the inability to retrieve a complete set of all records corresponding to any given query.

ICD-10 allows dual coding. Refer to Section 3.1.3 of the ICD-10 Instruction Manual (2nd Edition, found at [http://www.who.int/classifications/icd/ICD-10\\_2nd\\_ed\\_volume2.pdf](http://www.who.int/classifications/icd/ICD-10_2nd_ed_volume2.pdf)). While ICD-10 clearly establishes the semantic basis for the dual coding, it does not define an actual literal expression form suitable for use with CWE. In such cases, HL7 defines a suitable literal expression form and assigns an OID to that. The OID for this ICD-10 expression is 2.16.840.1.113883.6.260. The code system specifies that the two ICD-10 codes are separated by a space.

```
|J21.8 B95.6^^^^^Staph aureus bronchiolitis^^^^^2.16.840.1.113883.6.260
```

The ICD-10 code J21.8 is "Acute bronchiolitis due to other specified organisms" and the code B95.6 is "Staphylococcus aureus as the cause of diseases classified to other chapters". No value for the dual coding scheme has been assigned in table 0396, so CWE.3 cannot be populated.

### *GUIDE TO LAYOUT OF HL7 VERSION 2 CODE TABLES*

The tables are rendered only in numeric sequence; the alphabetic sort with a duplicated copy of the content of this chapter has been discontinued as of this 2.9 release.

For each table in this version 2.9, there is a preamble of the representation of the table in the HL7 Vocabulary model, divided into sections.

#### *Concept Domain Information*

Nearly every table has an associated Concept Domain which can be used for realm-specific binding of value sets; the only tables missing a Concept Domain are those which are used for fields which are not intended to ever be bound to value sets. A Concept Domain has a name and a description; the descriptions follow the HL7 conventions for naming and descriptions of Concept Domains as documented at:

[http://wiki.hl7.org/index.php?title=Domain\\_and\\_Value\\_Set\\_Definitions\\_and\\_Binding#Concept\\_Domain](http://wiki.hl7.org/index.php?title=Domain_and_Value_Set_Definitions_and_Binding#Concept_Domain)

The following sections are printed only for those tables that have suggested code values or suggested use of external content sources.

#### *Code System Information*

For those tables which have had normative values (HL7 tables) or suggested values (many user tables) an HL7 Code System has been created for these codes, with the necessary metadata to permit processing in CTS-compliant vocabulary tooling. This section contains the assigned OID and symbolic name for the code system, as well as an integer identifying the version of the code system (for those that have had content changes over time). Note that the symbolic names have been developed from the names of the tables applying the required syntax rules for OID symbolic names. Some of these are currently registered in the HL7 OID Registry, but due to running out of time, the remainder have not yet been imported to the HL7 Registry (this is to be done in the near future). There is also an associated description of the code system; several volunteers have contributed to developing these from the field and usage notes in the HL7 standard. *Suggestions or corrections to these descriptions are solicited as part of your ballot return.*

Code System Version Information section shows the effective date in the past for the code system, and the HL7 Standard version in which the content was introduced.

#### *Value Set Information*

For those tables that have content specified or recommended, a value set has been created as per the guidelines established by the tables project. This section contains the OID and symbolic name for the value set, and the Content Logical Definition. Note that since the HL7 Value Set Definition DSTU has not yet been published, and active discussion is still underway for a representation form for the

logical and machine processable definition for the content for the associated Value Set Expansion, in this document this section shows one of two things:

- a) "all codes from code system" indicates that the value set is Code Based Content of All Codes From the Based On Code System, which is noted in the Code System Information sections just prior;
- b) "enumerated codes as per table content below" indicates that the value set is Code Based Content where each code is enumerated, and drawn from the code system noted in the Code System Information sections just above.

Once the Value Set Definition DSTU is published, and the representation form for the Content Logical Definition is agreed and documented, these two phrases will be converted into the correct form for archival in the HL7 Vocabulary persistence tools. Note that the required Scope for the value set is not included here, as these have not yet been created, but will be developed from the Table Descriptions. Some Value Sets have their expansions viewable at an HL7 URL for the convenience of readers. Those that fall into this category have an additional row of metadata named "HL7 Webpage Rendering" with a URL where the enumeration of the codes for the table and value set may be found. Note that the webpage rendering is in the FHIR space as that is currently the only browsable source for V2 and V3 vocabulary content.

Value Set: effective date is the same as the version introduced.

#### *Binding Information*

This section indicates the binding for the value set to the associated fields or components. The HL7 tables have been set to 'universal' realm, and the user tables with suggested value sets have mostly been set to 'example'. For those sets of codes that experience has shown to be widely implemented and generally suitable for use as published, the binding has been set to 'representative'. For those that are realm-specific, the binding has been set to 'US realm' (this has been done for a number of US-specific vocabulary used in Financial Management). *Suggested changes to these proposed bindings is solicited from the balloters.*

Binding: effective date is the same as the version introduced.

#### *Table Metadata*

All tables have this information. This section contains the same information that has always been in Chapter 2C for the version 2 ballots. It lists the table number, the table type, the steward WorkGroup, the fields and/or datatype components where the table is used, and the release version of the HL7 Version 2 Standard when the table was first introduced. In addition, a description of each table has been developed (from the field notes, table content, and other references in the published HL7 standards).

#### *Table Coded Content*

For those tables that have enumerated content in the Standard, this section contains the listed codes for those tables that have content published as part of the Version 2 Standard. This is a new format that has now been standardized across all tables. It consists of the following columns:

- a) Value contains the code value, which is the string used in the 'identifier' component of the Version 2 coded datatypes.
- b) Display Name contains the string that is used for human readability of the code, and may be carried in the second component 'text' of the code 'triplets' in the Version 2 coded datatypes.
- c) Definition contains the textual and descriptive definition of the coded concept. As this was never required for Version 2 content, the vast majority of these are blank. In some cases, definitions have been imported from the old 'Comment' column of earlier releases where it made sense to do so. For the new content for v2.9 that came through the March 2016 Harmonization Cycle (new table 942 through 947) all codes have definitions as this will be required for all new content going forward.
- d) Comment/Usage Note contains information relative to the code that is not definitional in nature, but has been submitted or previously published. Where this information is explicitly noted for the usage of the code, it is prefixed with the notation "Usage Note:" on the text in this column. Any text prior to this notation prefix is a comment (which may or may not be present).
- e) Status is a field which notes the activity status of particular codes. Where blank, it indicates that the code is Active. A 'D' in this column indicates that the code has been deprecated, either in this 2.9 ballot or at some time in the past, and an 'R' in this column indicates that the code has been Retired and should not be used when creating or capturing data; these codes remain listed so that historical records captured in the past can be understood. Note that a status of deprecated indicates that the code has been replaced with a preferred alternative, and may be retired in the future; it is recommended that new systems avoid use of deprecated codes in favor of their replacement. There may also be an 'N' in this column, indicating that this code has been added in this HL7 release. In keeping with modern good vocabulary practices codes will no longer be removed from tables and code systems, they will be marked as Retired instead. See the following section for a full description of all Status Codes.

#### Status Codes

The codes in the status column are used as follows:

<empty>	active code
B	backwards-compatible use only
D	deprecated or inactive
R	retired
N	new in this release

A29	ADT/ACK - Delete person information			
A30	ADT/ACK - Merge person information		Deprecated	D
A31	ADT/ACK - Update person information			
A32	ADT/ACK - Cancel patient arriving - tracking			
A33	ADT/ACK - Cancel patient departing - tracking			
A34	ADT/ACK - Merge patient information - patient ID only		Deprecated	D
A35	ADT/ACK - Merge patient information - account number only		Deprecated	D
A36	ADT/ACK - Merge patient information - patient ID and account number		Deprecated	D
A37	ADT/ACK - Unlink patient information			
A38	ADT/ACK - Cancel pre-admit			
A39	ADT/ACK - Merge person - patient ID		Deprecated	D
A40	ADT/ACK - Merge patient - patient identifier list			
A41	ADT/ACK - Merge account - patient account number			
A42	ADT/ACK - Merge visit - visit number			
A43	ADT/ACK - Move patient information - patient identifier list			
A44	ADT/ACK - Move account information - patient account number			
A45	ADT/ACK - Move visit information - visit number			
A46	ADT/ACK - Change patient ID		Deprecated	D
A47	ADT/ACK - Change patient identifier list			
A48	ADT/ACK - Change alternate patient ID		Deprecated	D
A49	ADT/ACK - Change patient account number			
A50	ADT/ACK - Change visit number			
A51	ADT/ACK - Change alternate visit ID			
A52	ADT/ACK - Cancel leave of absence for a patient			
A53	ADT/ACK - Cancel patient returns from a leave of absence			
A54	ADT/ACK - Change attending doctor			

Value	Display Name	Definition	Comment/ Usage Note	Status
A55	ADT/ACK - Cancel change attending doctor			
A60	ADT/ACK - Update allergy information			
A61	ADT/ACK - Change consulting doctor			
A62	ADT/ACK - Cancel change consulting doctor			
B01	PMU/ACK - Add personnel record			
B02	PMU/ACK - Update personnel record			
B03	PMU/ACK - Delete personnel record			
B04	PMU/ACK - Active practicing person			
B05	PMU/ACK - Deactivate practicing person			
B06	PMU/ACK - Terminate practicing person			
B07	PMU/ACK - Grant Certificate/Permission			
B08	PMU/ACK - Revoke Certificate/Permission			
C01	CRM - Register a patient on a clinical trial			
C02	CRM - Cancel a patient registration on clinical trial (for clerical mistakes only)			
C03	CRM - Correct/update registration information			
C04	CRM - Patient has gone off a clinical trial			
C05	CRM - Patient enters phase of clinical trial			
C06	CRM - Cancel patient entering a phase (clerical mistake)			
C07	CRM - Correct/update phase information			
C08	CRM - Patient has gone off phase of clinical trial			
C09	CSU - Automated time intervals for reporting, like monthly			
C10	CSU - Patient completes the clinical trial			
C11	CSU - Patient completes a phase of the clinical trial			
C12	CSU - Update/correction of patient order/result information			
CNQ	Cancel Query			
E01	Submit HealthCare Services Invoice			
E02	Cancel HealthCare Services Invoice			
E03	HealthCare Services Invoice Status			
E04	Re-Assess HealthCare Services Invoice Request			
E10	Edit/Adjudication Results			
E12	Request Additional Information			
E13	Additional Information Response			
E15	Payment/Remittance Advice			
E20	Submit Authorization Request			
E21	Cancel Authorization Request			
E22	Authorization Request Status			
E24	Authorization Response			
E30	Submit Health Document related to Authorization Request		reserved for future/not yet defined	
E31	Cancel Health Document related to Authorization Request		reserved for future/not yet defined	
I01	RQI/RPI - Request for insurance information			

Value	Display Name	Definition	Comment/ Usage Note	Status
I02	RQI/RPL - Request/receipt of patient selection display list			
I03	RQI/RPR - Request/receipt of patient selection list			
I04	RQD/RPI - Request for patient demographic data			
I05	RQC/RCI - Request for patient clinical information		Deprecated	D
I06	RQC/RCL - Request/receipt of clinical data listing		Deprecated	D
I07	PIN/ACK - Unsolicited insurance information			
I08	RQA/RPA - Request for treatment authorization information			
I09	RQA/RPA - Request for modification to an authorization			
I10	RQA/RPA - Request for resubmission of an authorization			
I11	RQA/RPA - Request for cancellation of an authorization			
I12	REF/RRI - Patient referral			
I13	REF/RRI - Modify patient referral			
I14	REF/RRI - Cancel patient referral			
I15	REF/RRI - Request patient referral status			
I16	Collaborative Care Referral			
I17	Modify Collaborative Care Referral		Deprecated	D
I18	Cancel Collaborative Care Referral		Deprecated	D
I19	Collaborative Care Query/Collaborative Care Query Update			
I20	Asynchronous Collaborative Care Update			
I21	Collaborative Care Message			
I22	Collaborative Care Fetch / Collaborative Care Information			
J01	QCN/ACK - Cancel query/acknowledge message			
J02	QSX/ACK - Cancel subscription/acknowledge message			
K11	RSP - Segment pattern response in response to QBP^Q11			
K13	RTB - Tabular response in response to QBP^Q13			
K15	RDY - Display response in response to QBP^Q15			
K21	RSP - Get person demographics response			
K22	RSP - Find candidates response			
K23	RSP - Get corresponding identifiers response			
K24	RSP - Allocate identifiers response			
K25	RSP - Personnel Information by Segment Response			
K31	RSP -Dispense History Response			
K32	Find Candidates including Visit Information Response			

Value	Display Name	Definition	Comment/ Usage Note	Status
K33	Get Donor Record Candidates Response Message			
K34	Segment Pattern Response Message			
M01	MFN/MFK - Master file not otherwise specified		Deprecated	D
M02	MFN/MFK - Master file - staff practitioner			
M03	MFN/MFK - Master file - test/observation		Deprecated	D
M04	MFN/MFK - Master files charge description			
M05	MFN/MFK - Patient location master file			
M06	MFN/MFK - Clinical study with phases and schedules master file			
M07	MFN/MFK - Clinical study without phases but with schedules master file			
M08	MFN/MFK - Test/observation (numeric) master file			
M09	MFN/MFK - Test/observation (categorical) master file			
M10	MFN/MFK - Test /observation batteries master file			
M11	MFN/MFK - Test/calculated observations master file			
M12	MFN/MFK - Master file notification message			
M13	MFN/MFK - Master file notification - general			
M14	MFN/MFK - Master file notification - site defined			
M15	MFN/MFK - Inventory item master file notification			
M16	MFN/MFK - Master File Notification Inventory Item Enhanced			
M17	DRG Master File Message			
M18	MFN/MFK - Master file notification - Test/Observation (Payer)			
N01	NMQ/NMR - Application management query message		Deprecated	D
N02	NMD/ACK - Application management data message (unsolicited)			
O01	ORM - Order message (also RDE, RDS, RGV, RAS)		Deprecated	D
O02	ORR - Order response (also RRE, RRD, RRG, RRA)		Deprecated	D
O03	OMD - Diet order			
O04	ORD - Diet order acknowledgment			
O05	OMS - Stock requisition order			
O06	ORS - Stock requisition acknowledgment			
O07	OMN - Non-stock requisition order			
O08	ORN - Non-stock requisition acknowledgment			
O09	OMP - Pharmacy/treatment order			
O10	ORP - Pharmacy/treatment order acknowledgment			
O11	RDE - Pharmacy/treatment encoded order			

Value	Display Name	Definition	Comment/ Usage Note	Status
O12	RRE - Pharmacy/treatment encoded order acknowledgment			
O13	RDS - Pharmacy/treatment dispense			
O14	RRD - Pharmacy/treatment dispense acknowledgment			
O15	RGV - Pharmacy/treatment give			
O16	RRG - Pharmacy/treatment give acknowledgment			
O17	RAS - Pharmacy/treatment administration			
O18	RRA - Pharmacy/treatment administration acknowledgment			
O19	OMG - General clinical order			
O20	ORG/ORL - General clinical order response			
O21	OML - Laboratory order			
O22	ORL - General laboratory order response message to any OML			
O23	OMI - Imaging order			
O24	ORI - Imaging order response message to any OMI			
O25	RDE - Pharmacy/treatment refill authorization request			
O26	RRE - Pharmacy/Treatment Refill Authorization Acknowledgement			
O27	OMB - Blood product order			
O28	ORB - Blood product order acknowledgment			
O29	BPS - Blood product dispense status			
O30	BRP - Blood product dispense status acknowledgment			
O31	BTS - Blood product transfusion/disposition			
O32	BRT - Blood product transfusion/disposition acknowledgment			
O33	OML - Laboratory order for multiple orders related to a single specimen			
O34	ORL - Laboratory order response message to a multiple order related to single specimen OML			
O35	OML - Laboratory order for multiple orders related to a single container of a specimen			
O36	ORL - Laboratory order response message to a single container of a specimen OML			
O37	OPL - Population/Location-Based Laboratory Order Message			
O38	OPR - Population/Location-Based Laboratory Order Acknowledgment Message			
O39	Specimen shipment centric laboratory order			
O40	Specimen Shipment Centric Laboratory Order Acknowledgment Message			
O41	DBC - Create Donor Record Message			
O42	DBU - Update Donor Record Message			

Value	Display Name	Definition	Comment/ Usage Note	Status
O43	General Order Message with Document Payload Acknowledgement Message			
O44	Donor Registration - Minimal Message			
O45	Donor Eligibility Observations Message			
O46	Donor Eligibility Message			
O47	Donor Request to Collect Message			
O48	Donation Procedure Message			
O49	Pharmacy/Treatment Dispense Request Message			
O50	Pharmacy/Treatment Encoded Order Acknowledgment			
O51	OSU – Order Status Update			
O52	OSU – Order Status Update Acknowledgement			
O53	ORL - General Laboratory Order Acknowledgment Message (Patient Optional)			
O54	ORL - Laboratory Order Acknowledgment Message – Multiple Order Per Specimen (Patient Optional)			
O55	ORL - Laboratory Order Acknowledgment Message – Multiple Order Per Container of Specimen (Patient Optional)			
O56	ORL - Specimen Shipment Centric Laboratory Order Acknowledgment Message (Patient Optional)			
O57	OMQ- General Order Message with Document Payload			B
O58	ORX - General Order Message with Document Payload Acknowledgement Message			
O59	OML - Laboratory order for additional work up	Fulfillment order for work up on a previously communicated result or submitted specimen	An example is the IHE LCC profile which describes this message in the LAB-7 transaction	
P01	BAR/ACK - Add patient accounts			
P02	BAR/ACK - Purge patient accounts			
P03	DFT/ACK - Post detail financial transaction			
P04	QRY/DSP - Generate bill and A/R statements		Deprecated	D
P05	BAR/ACK - Update account			
P06	BAR/ACK - End account			
P07	PEX - Unsolicited initial individual product experience report			
P08	PEX - Unsolicited update individual product experience report			
P09	SUR - Summary product experience report		Deprecated	D
P10	BAR/ACK -Transmit Ambulatory Payment Classification(APC)			

Value	Display Name	Definition	Comment/ Usage Note	Status
P11	DFT/ACK - Post Detail Financial Transactions - New			
P12	BAR/ACK - Update Diagnosis/Procedure			
PC1	PPR - PC/ problem add			
PC2	PPR - PC/ problem update			
PC3	PPR - PC/ problem delete			
PC4	QRY - PC/ problem query		Deprecated	D
PC5	PRR - PC/ problem response		Deprecated	D
PC6	PGL - PC/ goal add			
PC7	PGL - PC/ goal update			
PC8	PGL - PC/ goal delete			
PC9	QRY - PC/ goal query		Deprecated	D
PCA	PPV - PC/ goal response		Deprecated	D
PCB	PPP - PC/ pathway (problem-oriented) add			
PCC	PPP - PC/ pathway (problem-oriented) update			
PCD	PPP - PC/ pathway (problem-oriented) delete			
PCE	QRY - PC/ pathway (problem-oriented) query		Deprecated	D
PCF	PTR - PC/ pathway (problem-oriented) query response		Deprecated	D
PCG	PPG - PC/ pathway (goal-oriented) add			
PCH	PPG - PC/ pathway (goal-oriented) update			
PCJ	PPG - PC/ pathway (goal-oriented) delete			
PCK	QRY - PC/ pathway (goal-oriented) query		Deprecated	D
PCL	PPT - PC/ pathway (goal-oriented) query response		Deprecated	D
Q01	QRY/DSR - Query sent for immediate response		Deprecated	D
Q02	QRY/QCK - Query sent for deferred response		Deprecated	D
Q03	DSR/ACK - Deferred response to a query		Deprecated	D
Q05	UDM/ACK - Unsolicited display update message			
Q06	OSQ/OSR - Query for order status		Deprecated	D
Q11	QBP - Query by parameter requesting an RSP segment pattern response			
Q13	QBP - Query by parameter requesting an RTB - tabular response			
Q15	QBP - Query by parameter requesting an RDY display response			
Q16	QSB - Create subscription			
Q17	QVR - Query for previous events			
Q21	QBP - Get person demographics			
Q22	QBP - Find candidates			
Q23	QBP - Get corresponding identifiers			
Q24	QBP - Allocate identifiers			
Q25	QBP - Personnel Information by Segment Query			
Q26	ROR - Pharmacy/treatment order response		Deprecated	D
Q27	RAR - Pharmacy/treatment administration information		Deprecated	D
Q28	RDR - Pharmacy/treatment dispense information		Deprecated	D

Value	Display Name	Definition	Comment/ Usage Note	Status
Q29	RER - Pharmacy/treatment encoded order information		Deprecated	D
Q30	RGR - Pharmacy/treatment dose information		Deprecated	D
Q31	QBP Query Dispense history			
Q32	Find Candidates including Visit Information			
Q33	QBP - Get Donor Record Candidates			
Q34	QBP - Get Donor Record			
R01	ORU/ACK - Unsolicited transmission of an observation message			
R02	QRY - Query for results of observation		Deprecated	D
R04	ORF - Response to query; transmission of requested observation		Deprecated	D
R21	OUL - Unsolicited laboratory observation		Deprecated	D
R22	OUL - Unsolicited Specimen Oriented Observation Message			
R23	OUL - Unsolicited Specimen Container Oriented Observation Message			
R24	OUL - Unsolicited Order Oriented Observation Message			
R25	OPU - Unsolicited Population/Location-Based Laboratory Observation Message			
R26	OSM - Unsolicited Specimen Shipment Manifest Message			
R30	ORU - Unsolicited Point-Of-Care Observation Message Without Existing Order - Place An Order			
R31	ORU - Unsolicited New Point-Of-Care Observation Message - Search For An Order			
R32	ORU - Unsolicited Pre-Ordered Point-Of-Care Observation			
R33	ORA - Observation Report Acknowledgement			
R40	ORU - Unsolicited Report Alarm			
R41	Observation Report Alert Acknowledgement			
R42	ORU – Unsolicited Device Event Observation Message			
R43	ORU – Unsolicited Patient-Device Association Observation Message			
ROR	ROR - Pharmacy prescription order query response		Deprecated	D
S01	SRM/SRR - Request new appointment booking			
S02	SRM/SRR - Request appointment rescheduling			
S03	SRM/SRR - Request appointment modification			
S04	SRM/SRR - Request appointment cancellation			
S05	SRM/SRR - Request appointment discontinuation			
S06	SRM/SRR - Request appointment deletion			
S07	SRM/SRR - Request addition of service/resource on appointment			

Value	Display Name	Definition	Comment/ Usage Note	Status
S08	SRM/SRR - Request modification of service/resource on appointment			
S09	SRM/SRR - Request cancellation of service/resource on appointment			
S10	SRM/SRR - Request discontinuation of service/resource on appointment			
S11	SRM/SRR - Request deletion of service/resource on appointment			
S12	SIU/ACK - Notification of new appointment booking			
S13	SIU/ACK - Notification of appointment rescheduling			
S14	SIU/ACK - Notification of appointment modification			
S15	SIU/ACK - Notification of appointment cancellation			
S16	SIU/ACK - Notification of appointment discontinuation			
S17	SIU/ACK - Notification of appointment deletion			
S18	SIU/ACK - Notification of addition of service/resource on appointment			
S19	SIU/ACK - Notification of modification of service/resource on appointment			
S20	SIU/ACK - Notification of cancellation of service/resource on appointment			
S21	SIU/ACK - Notification of discontinuation of service/resource on appointment			
S22	SIU/ACK - Notification of deletion of service/resource on appointment			
S23	SIU/ACK - Notification of blocked schedule time slot(s)			
S24	SIU/ACK - Notification of opened ("unblocked") schedule time slot(s)			
S25	SQM/SQR - Schedule query message and response		Deprecated	D
S26	SIU/ACK Notification that patient did not show up for schedule appointment			
S27	SIU/ACK - Broadcast Notification of Scheduled Appointments			
S28	SLR/SLS - Request new sterilization lot			
S29	SLR/SLS - Request Sterilization lot deletion			
S30	STI/STS - Request item			
S31	SDR/SDS - Request anti-microbial device data			
S32	SMD/SMS - Request anti-microbial device cycle data			
S33	STC/ACK - Notification of sterilization configuration			
S34	SLN/ACK - Notification of sterilization lot			

Value	Display Name	Definition	Comment/ Usage Note	Status
S35	SLN/ACK - Notification of sterilization lot deletion			
S36	SDN/ACK - Notification of anti-microbial device data			
S37	SCN/ACK - Notification of anti-microbial device cycle data			
S38	Containers Prepared for Specimen Collection	Describes the event before specimen collection, when containers have been prepared		
S39	Specimen Collection Successful	Describes the event when specimen collection was successful		
S40	Specimen Collection Unsuccessful	Describes the event when specimen collection was not successful and provides a means to document the reason		
S41	Specimen Departed	Describes the event when a specimen has been moved from a location		
S42	Specimen Arrived	Describes the event when a specimen has been moved to a location		
S43	Specimen Accepted	Describes the event when a specimen has been accepted on the receiver side of a specimen movement		
S44	Specimen Rejected	Describes the event when a specimen has been rejected by the receiver side of a specimen movement		

Value	Display Name	Definition	Comment/ Usage Note	Status
S45	Specimen Re-identified	Describes the event when a specimen has been assigned an identifier		
S46	Specimen De-identified	Describes the event when a specimen identifier has been removed to anonymize it		
S47	Specimen Sent to Archive	Describes the event when a specimen has been moved into storage		
S48	Specimen Retrieved from Archive	Describes the event when a specimen has been moved out of storage		
S49	Specimen Disposed of	Describes the event when a specimen has been permanently disposed of		
S50	Specimen Procedure Step Successful , with Derived Specimen(s)	Describes the event when one or more specimen(s) has(ve) been created from one or more specimen(s)		
S51	Specimen Procedure Step Successful, no Derived Specimen(s)	Describes the event when a specimen has been successfully processed without producing any child specimen(s)		
S52	Specimen Procedure Step Unsuccessful	Describes the event when a specimen could not be successfully processed and provides a means to document the reason		

Value	Display Name	Definition	Comment/ Usage Note	Status

W02	QRF - Waveform result, response to query		Deprecated	D

0004- Patient Class

#### Concept Domain Information

Concept Domain Name	DOM: 4
SymbolicName	PatientClass
Description	The domain of possible values that systems to categorize patients by site in HL7 Version 2.x interfaces.
Concept Domain Only	no

#### Code System Identification Information

Code System OID	2.16.840.1.113883.18.5
SymbolicName	patientClass
Description	Code system of concepts used by systems to categorize patients by site in HL7 Version 2.x interfaces in the PV1 segment.
Full Name	Patient Class Code System
URI	<a href="http://terminology.hl7.org/CodeSystem/v2-0004">http://terminology.hl7.org/CodeSystem/v2-0004</a>

#### Code System Version Information

Effective Date	31.12.1992
Version	3
HL7 Version Introduced	2.1

#### Value Set Information

Value Set OID	2.16.840.1.113883.21.5
SymbolicName	hl7VS-patientClass
Description	Concepts used by systems to categorize patients by sites.
Full Name	Patient Class Value Set
URI	<a href="http://terminology.hl7.org/ValueSet/v2-0004">http://terminology.hl7.org/ValueSet/v2-0004</a>
Content Logical Definition	all codes

#### **Concept Domain Information**

<b>Concept Domain Name</b>	DOM: 56
<b>SymbolicName</b>	DrgGrouperReviewCode
<b>Description</b>	The domain of possible values for that the grouper results have been reviewed and approved.
<b>Concept Domain Only</b>	yes

### Table Metadata

<b>Table</b>	0056
<b>Table OID</b>	2.16.840.1.113883.12.56
<b>SymbolicName</b>	DRG Grouper Review Code
<b>Description</b>	Table of codes specifying that the grouper results have been reviewed and approved. No suggested values.
<b>Type</b>	User
<b>Steward</b>	FM
<b>where used</b>	DRG-4
<b>HL7 Version Introduced</b>	2.1

0059- Consent Code

### Concept Domain Information

<b>Concept Domain Name</b>	DOM: 59
<b>SymbolicName</b>	ConsentCode
<b>Description</b>	The domain of possible values for the type of consent that was obtained for permission to treat the patient.
<b>Concept Domain Only</b>	yes

### Table Metadata

<b>Table</b>	0059
<b>Table OID</b>	2.16.840.1.113883.12.59
<b>SymbolicName</b>	Consent Code
<b>Description</b>	Table of codes specifying the type of consent that was obtained for permission to treat the patient. No suggested values.
<b>Type</b>	User
<b>Steward</b>	FM

## 0078- Interpretation Codes

### Concept Domain Information

Concept Domain Name	DOM: 78
SymbolicName	InterpretationCodes
Description	<p>The domain of possible values for a categorical assessment of an observation value.</p> <p>Discussion: These interpretation codes are sometimes called "abnormal flags", however, the judgment of normalcy is just one of the common rough interpretations, and is often not relevant. For example, the susceptibility interpretations are not about "normalcy", and for any observation of a pathologic condition, it does not make sense to state the normalcy, since pathologic conditions are never considered "normal."</p>
Concept Domain Only	no

### Code System Identification Information

Code System OID	2.16.840.1.113883.5.83
SymbolicName	observationInterpretation
Description	<p>HL7-defined code system of concepts which specify a categorical assessment of an observation value. Used in HL7 Version 2.x messaging in the OBX segment.</p> <p>Notes: This is being communicated in v2.x in OBX-8, in v3 in ObservationInterpretation (CWE) in R1 (Representative Realm) and in FHIR Observation.interpretation.</p>
Full Name	Interpretation Codes Code System

### Code System Version Information

Effective Date	31.12.1992
Version	4
HL7 Version Introduced	2.1

### Value Set Information

<b>Value Set OID</b>	2.16.840.1.113883.1.11.78
<b>SymbolicName</b>	hl7VS-interpretationCode
<b>Description</b>	A categorical assessment, providing a rough qualitative interpretation of the observation value, such as "normal"/ "abnormal","low" / "high", "better" / "worse", "susceptible" / "resistant", "expected"/ "not expected". The value set is intended to be for ANY use where coded representation of an interpretation is needed. Notes: This is being communicated in v2.x in OBX-8, in v3 in ObservationInterpretation (CWE) in R1 (Representative Realm) and in FHIR Observation.interpretation. Historically these values come from the laboratory domain, and these codes are extensively used. The value set binding is extensible, so codes outside the value set that are needed for interpretation concepts (i.e. particular meanings) that are not included in the value set can be used, and these new codes may also be added to the value set and published in a future version.
<b>Full Name</b>	Interpretation Codes Value Set

**Table 0085 Coded Content**

<b>Value</b>	<b>Display Name</b>	<b>Definition</b>	<b>Comment/ Usage Note</b>	<b>Status</b>
A	Amended based on adjustments provided by the Placer (Physician) regarding patient demographics (such as age and/or gender or other patient specific information)			
B	Appended Report - Final results reviewed and further information provided for clarity without change to the original result values.			
C	Record coming over is a correction and thus replaces a final result			
D	Deletes the OBX record			
F	Final results			
I	Specimen in lab; results pending			
N	Not asked; used to affirmatively document that the observation identified in the OBX was not sought when the universal service ID in OBR-4 implies that it would be sought.			
O	Order detail description only (no result)			
P	Preliminary results			
R	Results entered -- not verified			
S	Partial results. Deprecated. Retained only for backward compatibility as of V2.6.		Deprecated .	
V	Verified - Final results reviewed and confirmed to be correct, no change to result value, normal range or abnormal flag			
X	Results cannot be obtained for this observation			
U	Results status change to final without retransmitting results already sent as 'preliminary.' E.g., radiology changes status from preliminary to final			
W	Post original as wrong, e.g., transmitted for wrong patient			

## 0086- Plan ID

### Concept Domain Information

<b>Concept Domain Name</b>	DOM: 86

<b>Table OID</b>	2.16.840.1.113883.12.100
<b>SymbolicName</b>	Invocation event
<b>Description</b>	HL7-defined table of codes which specify codes for an event precipitating/triggering a charge activity.
<b>Type</b>	HL7
<b>Steward</b>	InM
<b>where used</b>	CCD.1, BLG-1
<b>HL7 Version Introduced</b>	2.1

#### Table 0100 Coded Content

Value	Display Name	Definition	Comment/ Usage Note	Status
D	On discharge			
O	On receipt of order			

Value	Display Name	Definition	Comment/ Usage Note	Status
R	At time service is completed			
S	At time service is started			
T	At a designated date/time			

0103- Processing ID

#### Concept Domain Information

Concept Domain Name	DOM: 103
SymbolicName	ProcessingId
Description	The domain of possible values for whether the message is part of a production, training or debugging system.
Concept Domain Only	no

#### Code System Identification Information

Code System OID	2.16.840.1.113883.18.40
SymbolicName	processingId
Description	HL7-defined code system of concepts which specify whether the message is part of a production, training or debugging system. Used in HL7 Version 2.x messaging in the PT datatype.
Full Name	Processing ID Code System
URI	<a href="http://terminology.hl7.org/CodeSystem/v2-0103">http://terminology.hl7.org/CodeSystem/v2-0103</a>

#### Code System Version Information

Effective Date	31.12.1992
Version	2
HL7 Version Introduced	2.1

#### Value Set Information

Value Set OID	2.16.840.1.113883.21.44
SymbolicName	hl7VS-processingId
Description	Value Set of codes that specify whether the message is part of a production, training or debugging system.
Full Name	Processing ID Value Set
URI	<a href="http://terminology.hl7.org/ValueSet/v2-0103">http://terminology.hl7.org/ValueSet/v2-0103</a>
Content Logical Definition	all codes

**Table 0119 Coded Content**

<b>Value</b>	<b>Display Name</b>	<b>Definition</b>	<b>Comment/ Usage Note</b>	<b>Status</b>
AF	Order/service refill request approval	AF is a response to RF where the placer authorizing a refill or quantity of refills.	Placer Applications .	
CA	Cancel order/service request		Placer or Filler Applications	
CH	Child order/service		Placer or Filler Applications.  Usage Note: Used in conjunction with the PA - Parent order control code. Refer to PA order control code for discussion.	
CN	Combined result		Filler Applications.	
CP	Cancel process step		Filler Applications.	
CR	Canceled as requested		Filler or Placer Applications.  Usage Note: A response by the filler or placer application that a request to cancel (CA by the placer application) was performed successfully.	
DC	Discontinue order/service request		Placer or Filler Applications.	
DE	Data errors		Placer or Filler Applications.	
DF	Order/service refill request denied		Placer Applications.	
DR	Discontinued as requested		Filler or Placer Applications.  Usage Note: The filler or placer, in response to a request to discontinue (DC from the placer or filler application), has discontinued the order/service.	
FU	Order/service refilled, unsolicited		Filler Applications.  Usage Note: FU notifies the placer that the filler issued a refill for the order at the patient's request.	
HD	Hold order request		Placer Applications.  Usage Note: Typical responses include, but are not limited to, CR - Cancelled as requested, UC - Unable to Cancel.	
HR	On hold as requested		Filler Applications.	
LI	Link order/service to patient care problem or goal		Placer or Filler Applications.	

<b>Value</b>	<b>Display Name</b>	<b>Definition</b>	<b>Comment/ Usage Note</b>	<b>Status</b>
			Usage Note: Refer to Chapter 12 Patient Care for complete discussion.	
MC	Miscellaneous Charge - not associated with an order		applies to DFT^P03^DFT_P03 and DFT^P11^DFT_P11  Usage Note: applies to DFT^P03^DFT_P03 and DFT^P11^DFT_P11	
NA	Number assigned		Placer Applications.	
NR	Notification Received	Notifies the Filler that the Placer received a cancellation, discontinuance, or other state change notice	Placer Applications.	
NW	New order/service		Placer Applications.  Usage Note: See comments for NA - Number Assigned.	
OC	Order/service canceled		Filler Applications.	
OD	Order/service discontinued		Filler Applications.	
OE	Order/service released		Filler Applications.	
OF	Order/service refilled as requested		Filler Applications.  Usage Note: OF directly responds to the placer system's request for a refill.	
OH	Order/service held		Filler Applications.	
OK	Order/service accepted & OK		Filler Applications.  Usage Note: See comments for NA - Number Assigned.	
OP	Notification of order for outside dispense		Placer Applications.	
OR	Released as requested		Filler Applications.	
PA	Parent order/service		Filler Applications.	
PR	Previous Results with new order/service		Placer Applications.	
PY	Notification of replacement order for outside dispense		Placer Applications.  Usage Note: See comments for OP - Notification of order for outside dispense.	
RA	Recommendation Accepted	Identifies that this previously recommended	Placer Applications: Used in the Recommendation Accepted message; includes the	

Value	Display Name	Definition	Comment/ Usage Note	Status
		replacement order has been accepted	assigned placer order number for the accepted replacement order Filler Applications: Used in the acknowledgment response message to the Recommendation Accepted message	
RC	Recommended Change	Identifies that this OBR represents a recommended replacement order	Filler Applications. Used in the recommendation message sent to the placer	
RD	Recommendation Declined	Identifies that this previously sent recommended replacement order has been declined	Placer Applications: Used in the Recommendation Declined message Filler Applications: Used in the acknowledgment response message to the Recommendation Declined message	
RE	Observations/Performed Service to follow		Placer or Filler Applications.	
RF	Refill order/service request		Placer or Filler Applications.	
RL	Release previous hold		Placer Applications.	
RO	Replacement order		Placer or Filler Applications.	
RP	Order/service replace request		Placer Applications.	
RQ	Replaced as requested		Filler Applications.	
RR	Request received		Placer or Filler Applications.	
RU	Replaced unsolicited		Filler Applications.	
SC	Status changed		Placer or Filler Applications.	
SN	Send order/service number		Placer Applications.  Usage Note: See comments for NA - Number Assigned.	
SQ	Supplemented as requested	Supplementation confirmation message indicating that an order was supplemented as requested.	This code is used in the acknowledgment response to the request messages.	
SR	Response to send order/service status request		Filler Applications.	
SS	Send order/service status request		Placer Applications.	
SU	Supplement this order	Identifies existing orders to be supplemented in Supplementation	For example this code is used in the filler's order message to identify an order that is missing a recommended order based on organizational	

<b>Value</b>	<b>Display Name</b>	<b>Definition</b>	<b>Comment/ Usage Note</b>	<b>Status</b>
		Recommendation (filler to placer) and Supplementation Request (placer to filler) messages.	protocol for example as described in the IHE Laboratory Communication (LCC) profile (LAB-6).	
UA	Unable to accept order/service		Filler Applications.	
UC	Unable to cancel		Filler or Placer Applications.	
UD	Unable to discontinue		Filler or Placer Applications.	
UF	Unable to refill		Filler Applications.  Usage Note: Negative response to RF Refill order/service request, indicating that the receiving application was not able to complete the refill request.	
UH	Unable to put on hold		Filler Applications.	
UM	Unable to replace		Filler Applications.	
UN	Unlink order/service from patient care problem or goal		Placer or Filler Applications.  Usage Note: Refer to Chapter 12 Patient Care for complete discussion.	
UR	Unable to release		Filler Applications.	
UX	Unable to change		Filler Applications.	
XO	Change order/service request		Placer Applications.	
XR	Changed as requested		Filler Applications.	
XX	Order/service changed, unsol.		Filler Applications.	

## 0121- Response Flag

### Concept Domain Information

<b>Concept Domain Name</b>	DOM: 121
<b>SymbolicName</b>	ResponseFlag
<b>Description</b>	The domain of possible values allowing the placer (sending) application to determine the amount of information to be returned from the filler.
<b>Concept Domain Only</b>	no

### Code System Identification Information

<b>Code System OID</b>	2.16.840.1.113883.18.49
<b>SymbolicName</b>	responseFlag
<b>Description</b>	HL7-defined code system of concepts allowing the placer (sending) application to determine the amount of information to be returned from the filler. Used in HL7 Version 2.x messaging in the ORC segment.
<b>Full Name</b>	Response Flag Code System
<b>URI</b>	<a href="http://terminology.hl7.org/CodeSystem/v2-0121">http://terminology.hl7.org/CodeSystem/v2-0121</a>

0123- Result Status

#### Concept Domain Information

Concept Domain Name	DOM: 123
SymbolicName	ResultStatus
Description	The domain of possible values for a status of results for an order.
Concept Domain Only	no

#### Code System Identification Information

Code System OID	2.16.840.1.113883.18.51
SymbolicName	resultStatus
Description	HL7-defined code system of concepts which specify a status of results for an order. Used in HL7 Version 2.x messaging in the OBR segment.
Full Name	Result Status Code System
URI	<a href="http://terminology.hl7.org/CodeSystem/v2-0123">http://terminology.hl7.org/CodeSystem/v2-0123</a>

#### Code System Version Information

Effective Date	31.12.1992
Version	4
HL7 Version Introduced	2.1

#### Value Set Information

Value Set OID	2.16.840.1.113883.21.55
SymbolicName	hl7VS-resultStatus-Obr
Description	Concepts which specify a status of results for an order. Used in HL7 Version 2.x messaging in the OBR segment.
Full Name	Result Status Value Set
URI	<a href="http://terminology.hl7.org/ValueSet/v2-0123">http://terminology.hl7.org/ValueSet/v2-0123</a>

#### Table 0123 Coded Content

Value	Display Name	Definition	Comment/ Usage Note	Status
O	Order received; specimen not yet received			
I	No results available; specimen received,			

<b>Value</b>	<b>Display Name</b>	<b>Definition</b>	<b>Comment/ Usage Note</b>	<b>Status</b>
	procedure incomplete			
S	No results available; procedure scheduled, but not done			
A	Some, but not all, results available			
P	Preliminary	A verified early result is available, final results not yet obtained		
C	Corrected, final	A result under an order, that has been finalized has been corrected		
R	Results stored; not yet verified			
F	Final results	Final results; results stored and verified.	Can only be changed with a corrected result.	
X	No results available; Order canceled	No results available; Order canceled.		
Y	No order on record for this test	No order on record for this test.	Usage Note: Used only on queries	
Z	No record of this patient	No record of this patient.	Usage Note: Used only on queries	
M	Corrected, not final	A result under an order, that has not yet been finalized has been corrected		
N	Procedure completed, results pending	No result available; requested procedure done. To indicate that a requested test is performed but results are pending/not yet available.	Usage Note: Transitions/Relationships: OBR-25 Valid preceding state (... to N): O, I, S. Succeeding state (N to ...): P, A, R, F, X OBX-11 No OBX segments can be present where OBX-29 = RSLT	

## 0124- Transportation Mode

### Concept Domain Information

<b>Concept Domain Name</b>	DOM: 124
<b>SymbolicName</b>	TransportationMode
<b>Description</b>	The domain of possible values for how (or whether) to transport a patient, when applicable, for an ordered service.
<b>Concept Domain Only</b>	no

### Code System Identification Information

<b>Code System OID</b>	2.16.840.1.113883.18.52

DLT	Delta			
DR	Date/time range			
DT	Date			
DTM	Date/time			
DTN	Day type and number			
ED	Encapsulated data			
EI	Entity identifier			
EIP	Entity identifier pair			
ERL	Error location			
FC	Financial class			
FT	Formatted text			
GTS	General timing specification			
HD	Hierarchic designator			
ICD	Insurance certification definition			
IS	Coded value for user-defined tables		This code has been marked for backwards compatibility use only as of V2.9.	B
JCC	Job code/class			
LA1	Location with address variation 1		Datatype has been Withdrawn from the Standard.	D
LA2	Location with address variation 2		Datatype has been Withdrawn from the Standard.	D
MA	Multiplexed array			
MO	Money			
MOC	Money and charge code			
MOP	Money or percentage			
MSG	Message type			
NA	Numeric array			
NDL	Name with date and location			
NM	Numeric			
NR	Numeric range			
OCD	Occurrence code and date			
OSP	Occurrence span code and date			
PIP	Practitioner institutional privileges			

Value	Display Name	Definition	Comment/ Usage Note	Status
PL	Person location			
PLN	Practitioner license or other ID number			
PPN	Performing person time stamp			
PRL	Parent result link			
PT	Processing type			
PTA	Policy type and amount			
QIP	Query input parameter list			
QSC	Query selection criteria			
RCD	Row column definition			
RFR	Reference range			
RI	Repeat interval			
RMC	Room coverage			
RP	Reference pointer			
RPT	Repeat pattern			
SCV	Scheduling class value pair			
SN	Structured numeric			
SNM	String of telephone number digits			
SPD	Specialty description			
SRT	Sort order			
ST	String data			
TM	Time			
TX	Text data			
UVC	UB value code and amount			
VH	Visiting hours			
VID	Version identifier			
VR	Value range			
WVI	Channel Identifier			
WVS	Waveform source			
XAD	Extended address			
XCN	Extended composite ID number and name for persons			
XON	Extended composite name and ID number for organizations			
XPN	Extended person name			
XTN	Extended telecommunications number			

#### 0126- Quantity Limited Request

##### Concept Domain Information

Concept Domain Name	DOM: 126
SymbolicName	QuantityLimitedRequest
Description	The domain of possible values for the maximum length of a query response that can be accepted by a requesting system, and are expressed as units of measure of query response objects.
Concept Domain Only	no

##### Code System Identification Information

Code System OID	2.16.840.1.113883.18.53

0151- Second Opinion Status

**Concept Domain Information**

<b>Concept Domain Name</b>	DOM: 151
<b>SymbolicName</b>	SecondOpinionStatus
<b>Description</b>	The domain of possible values for the status of the second opinion. No suggested values.
<b>Concept Domain Only</b>	yes

**Table Metadata**

<b>Table</b>	0151
<b>Table OID</b>	2.16.840.1.113883.12.151
<b>SymbolicName</b>	Second Opinion Status
<b>Description</b>	Table of codes specifying the status of the second opinion. No suggested values.
<b>Type</b>	User
<b>Steward</b>	FM
<b>where used</b>	IN3-23
<b>HL7 Version Introduced</b>	2.2

0152- Second Opinion Documentation Received

**Concept Domain Information**

<b>Concept Domain Name</b>	DOM: 152
<b>SymbolicName</b>	SecondOpinionDocumentationReceived
<b>Description</b>	The domain of possible values for if accompanying documentation has been received by the provider. No suggested values.
<b>Concept Domain Only</b>	yes

**Table Metadata**

<b>Table</b>	0152
<b>Table OID</b>	2.16.840.1.113883.12.152
<b>SymbolicName</b>	Second Opinion Documentation Received

<b>HL7 Version Introduced</b>	2.2

#### Table 0167 Coded Content

<b>Value</b>	<b>Display Name</b>	<b>Definition</b>	<b>Comment/ Usage Note</b>	<b>Status</b>
N	No substitute was dispensed. This is equivalent to the default (null) value.			
G	A generic substitution was dispensed.			
T	A therapeutic substitution was dispensed.			
0	No product selection indicated			
1	Substitution not allowed by prescriber			
2	Substitution allowed - patient requested product dispensed			
3	Substitution allowed - pharmacist selected product dispensed			
4	Substitution allowed - generic drug not in stock			
5	Substitution allowed - brand drug dispensed as a generic			
7	Substitution not allowed - brand drug mandated by law			
8	Substitution allowed - generic drug not available in marketplace			

#### 0168- Processing Priority

##### Concept Domain Information

<b>Concept Domain Name</b>	DOM: 168
<b>SymbolicName</b>	ProcessingPriority
<b>Description</b>	The domain of possible values for one or more available priorities for performing the observation or test.
<b>Concept Domain Only</b>	no

##### Code System Identification Information

<b>Code System OID</b>	2.16.840.1.113883.18.86
<b>SymbolicName</b>	processingPriority
<b>Description</b>	HL7-defined code system of concepts which specify one or more available priorities for performing the observation or test. Used in HL7 Version 2.x messaging in the OM1 segment.

<b>Full Name</b>	Processing Priority Code System
<b>URI</b>	<a href="http://terminology.hl7.org/CodeSystem/v2-0168">http://terminology.hl7.org/CodeSystem/v2-0168</a>

#### Table 0190 Coded Content

<b>Value</b>	<b>Display Name</b>	<b>Definition</b>	<b>Comment/ Usage Note</b>	<b>Status</b>
BA	Bad address		Retained for backward compatibility only as of v2.6. Refer to XAD.17	
BI	Billing Address		May also be used for the validation/authorization of credit cards	
N	Birth (nee) (birth address, not otherwise specified)		Refers to the birth address, not otherwise specified	
BDL	Birth delivery location (address where birth occurred)		Refers to the address where birth occurred.	
F	Country Of Origin			
C	Current Or Temporary		Retained for backward compatibility only as of v2.6. Refer to XAD.16	
B	Firm/Business		Refers to an address specific to an organization, such as an insurance company or employer,	

<b>Value</b>	<b>Display Name</b>	<b>Definition</b>	<b>Comment/ Usage Note</b>	<b>Status</b>
			versus an individual's work location or place of employment. It would be specific to a firm or organization that has some sort of business relationship with the subject	
H	Home		Refers to a residence or domicile, literally the place where the subject resides the majority of the time. Generally speaking most people will have a home address and it will represent their primary address. Home address is mutually exclusive of permanent address.	
L	Legal Address		Refers to a special case address specific to the status of a subject or legal action involving the subject. For example, prisoners being treated at a healthcare facility may have home addresses, but their status mandates an address specific to their place of incarceration. Statutes may require the health information specific to a ward of the state be sent to a legal guardian, the courts, or a state or municipal agency regardless of the ward's physical location. In cases involving civil or criminal proceedings, a record may be flagged such that all correspondence is sent to any variety of legal entities.	
M	Mailing		Retained for backward compatibility only as of v2.6. Refer to XAD.18	
O	Office/Business		Refers to a work address specific to the subject.	
P	Permanent		Refers to a place where the residents know the subject and where correspondence addressed to the subject will eventually reach the subject regardless of their physical location. A permanent address generally reflects a tax jurisdiction. Members of the military, flight attendants, and executives on rotational assignments are examples of those who typically maintain a permanent address. Although mutually exclusive of home address, in some instances, such as the executives mentioned above, it may be synonymous. In such cases upon return from assignment this address would revert to the home address.	
RH	Registry home. Refers to the information system, typically managed by a public health agency, that stores patient information		Refers to the information system, typically managed by a public health agency that stores patient information such as immunization histories or cancer data, regardless of where the patient obtains services	

Value	Display Name	Definition	Comment/ Usage Note	Status
	such as immunization histories or cancer data, regardless of where the patient obtains services.			
BR	Residence at birth (home address at time of birth)		Refers to the home address at time of birth.	
S	Service Location		Refers to the location in which service is rendered. This would be used if reimbursement is based on the location of the service (to take into account the cost of those services).	
SH	Shipping Address			
TM	Tube Address		Pneumatic tube address (to which letters may be sent). A special transport system to transport small samples/containers and/or normal mail in small carriages on rail or in a tube. (German Rohrpost)	
V	Vacation			

#### 0191- Type of Referenced Data

##### Concept Domain Information

Concept Domain Name	DOM: 191
SymbolicName	TypeOfReferencedData
Description	The domain of possible values declaring the general type of media data that is encoded.
Concept Domain Only	no

##### Code System Identification Information

Code System OID	2.16.840.1.113883.18.102
SymbolicName	typeOfReferencedData
Description	HL7-defined code system of concepts declaring the general type of media data that is encoded. Used in v2.5.1 interfaces and earlier, and replaced with the full set of IANA media types as a standard coding system for this after HL7 version 2.6 (see value set 2.16.840.1.113883.21.425 hl7VS-mimeTypes for HL7 table 0834 built on MIME types). #### Table 0200 Coded Content

Value	Display Name	Definition	Comment/ Usage Note	Status
A	Assigned		A name assigned to a person. Reasons some organizations assign alternate names may include not knowing the person's name, or to maintain anonymity. Some, but not necessarily all, of the name types that people call "alias" may fit into this category.	
B	Birth name		A name that a person had shortly after being born. Usually for family names but may be used to mark given names at birth that may have changed later. This is not for temporary names assigned at birth while a newborn is not yet named	
BAD	Bad Name		A name that was wrongly used in the past and is now maintained only for the purposes of searching	
C	Adopted Name		A name acquired by adoption	
D	Customary Name		Known as/conventional/the one you use. May also be known as a preferred name.	
F	Fathers Name		Fathers Name ( Patronymic Name)	
I	Licensing Name			

<b>Value</b>	<b>Display Name</b>	<b>Definition</b>	<b>Comment/ Usage Note</b>	<b>Status</b>
K	Business name		A name used in a Professional or Business context. Also includes writer's pseudonym, artist's name, stage name, street name, etc.  An example of use is where a person with multiple proper names (i.e. married) uses one of the particular names in a professional	
L	Official Registry Name		The formal name as registered in an official (government) registry, but which name might not be commonly used. May correspond to legal name  For many people, customary name is also their official name	
M	Maiden Name		A name you had just before you got married	
MSK	Masked		There is information on this item available but it has not been provided by the sender due to security, privacy or other reasons. There may be an alternate mechanism for gaining access to this information.  Note: using this null flavor does provide information that may be a breach of confidentiality, even though no detail data is provided. Its primary purpose is for those circumstances where it is necessary to inform the receiver that the information does exist without providing any detail.	
N	Nickname		Nickname /"Call me" Name/Street Name	
NAV	Temporarily Unavailable		Information is not available at this time but it is expected that it will be available later. Includes John or Jane Doe situations	
NB	Newborn Name		A name assigned on a temporary basis at birth. i.e. "Baby of Smith"	
NOUSE	No Longer To Be Used		Name not to be used anymore for personal reasons	
P	Name of Partner/Spouse		Retained for backward compatibility only as of v2.7.	
R	Registered Name		(animals only) Retained for backwards compatibility only as of v2.7. Use "L" instead - has same meaning	
REL	Religious		e.g. Sister Mary Francis, Brother John	
S	Pseudonym		Coded Pseudo-Name to ensure anonymity	
T	Indigenous/Tribal		Indigenous/Tribal/Community Name e.g. Chief Red Cloud	
TEMP	Temporary Name		A temporary name. Note that a name valid time can provide more detailed information.	
U	Unknown		Unknown

### Table 0203 Coded Content

<b>Value</b>	<b>Display Name</b>	<b>Definition</b>	<b>Comment/ Usage Note</b>	<b>Status</b>
AC	Accreditation/Certification Identifier	Identifier that has been assigned by an accreditation or certification organization in specific fields, indicating a recognized skill	In Ask at Order Entry (AOE) questions this can be used to identify the ID with the assigning authority. For instance, a credentialed sonographer whose identifier assigned by the credentialing body has been entered can be properly labeled.	
ACSN	Accession ID	Accession Identifier		
AIN	Animal Identification Number (US Official)	A numbering system for the official identification of individual animals in the United States that provides a nationally unique identification number for each animal. The first two numbers on a tag are the numbers assigned to a specific State.	AIN is the official acronym used by USDA	

<b>Value</b>	<b>Display Name</b>	<b>Definition</b>	<b>Comment/ Usage Note</b>	<b>Status</b>
AM	American Express		Deprecated and replaced by BC in v 2.5.	
AMA	American Medical Association Number	A physician identifier assigned by the AMA.		
AN	Account number	Account An identifier that is unique to an account.		
ANC	Account number Creditor	A more precise definition of an account number	Class: Financial Sometimes two distinct account numbers must be transmitted in the same message, one as the creditor, the other as the debtor. Kreditorenkontonummer	
AND	Account number debtor	A more precise definition of an account number	Class: Financial Sometimes two distinct account numbers must be transmitted in the same message, one as the creditor, the other as the debtor. Debitorenkontonummer	
ANON	Anonymous identifier	An identifier for a living subject whose real identity is protected or suppressed	Justification: For public health reporting purposes, anonymous identifiers are occasionally used for protecting patient identity in reporting certain results. For instance, a state health department may choose to use a scheme for generating an anonymous identifier for reporting a patient that has had a positive human immunodeficiency	

Value	Display Name	Definition	Comment/ Usage Note	Status
			virus antibody test. Anonymous identifiers can be used in PID 3 by replacing the medical record number or other non-anonymous identifier. The assigning authority for an anonymous identifier would be the state/local health department.	
ANT	Temporary Account Number	Temporary version of an Account Number	Class: Financial Use Case: An ancillary system that does not normally assign account numbers is the first time to register a patient. This ancillary system will generate a temporary account number that will only be used until an official account number is assigned.	
APRN	Advanced Practice Registered Nurse number	An identifier that is unique to an advanced practice registered nurse within the jurisdiction of a certifying board		
ASID	Ancestor Specimen ID	A unique identifier for the ancestor specimen.	All child, grandchild, etc. specimens of the ancestor specimen share the same Ancestor Specimen ID.	
BA	Bank Account Number		Class: Financial	
BC	Bank Card Number	An identifier that is unique to a person's bank card	Class: Financial Replaces AM, DI, DS, MS, and VS beginning in v 2.5.	
BCFN	Birth Certificate File Number	The identifier used within the jurisdictional vital records office file system as an auxiliary means of accessing the record associated with the birth certificate.		

<b>Value</b>	<b>Display Name</b>	<b>Definition</b>	<b>Comment/ Usage Note</b>	<b>Status</b>
BCT	Birth Certificate	A number associated with a document identifying the event of a person's birth		
BR	Birth registry number	An identifier unique within the Assigning Authority that is the official legal record of a person's birth.		
BRN	Breed Registry Number			
BSNR	Primary physician office number		Betriebsstättennummer - for use in the German realm.	
CAAI	Consumer Application Account Identifier	An identifier for the consumer (e.g., patient, caregiver) for an application such as a portal or App.	This may be the same as a username, but frequently is different.	
CC	Cost Center number		Class: Financial Use Case: needed especially for transmitting information about invoices.	
CONM	Change of Name Document	A number associated with a document identifying a person's legal change of name.		
CY	County number			
CZ	Citizenship Card	A number assigned by a person's country of residence to identify a person's citizenship.		
DC	Death Certificate ID	The identifier assigned to a death certificate, and printed on the death certificate when issued by a jurisdictional vital records office		
DCFN	Death Certificate File Number	The identifier used within the jurisdictional vital records office file system as an auxiliary means of accessing the record associated with the death certificate.		
DDS	Dentist license number	An identifier that is unique to a dentist within the jurisdiction of the licensing board		
DEA	Drug Enforcement Administration registration number	An identifier for an individual or organization relative to controlled substance regulation and transactions.	Use case: This is a registration number that identifies an individual or organization relative to controlled substance regulation and transactions.	

<b>Value</b>	<b>Display Name</b>	<b>Definition</b>	<b>Comment/ Usage Note</b>	<b>Status</b>
			A DEA number has a very precise and widely accepted meaning within the United States. Surprisingly, the US Drug Enforcement Administration does not solely assign DEA numbers in the United States. Hospitals have the authority to issue DEA numbers to their medical residents. These DEA numbers are based upon the hospital's DEA number, but the authority rests with the hospital on the assignment to the residents. Thus, DEA as an Identifier Type is necessary in addition to DEA as an Assigning Authority.	
DFN	Drug Furnishing or prescriptive authority Number	An identifier issued to a health care provider authorizing the person to write drug orders	Use Case: A nurse practitioner has authorization to furnish or prescribe pharmaceutical substances; this identifier is in component 1.	
DI	Diner's Club card		Deprecated and replaced by BC in v 2.5.	
DL	Driver's license number			
DN	Doctor number			
DO	Osteopathic License number	An identifier that is unique to an osteopath within the jurisdiction of a licensing board.		
DP	Diplomatic Passport	A number assigned to a diplomatic passport.		

<b>Value</b>	<b>Display Name</b>	<b>Definition</b>	<b>Comment/ Usage Note</b>	<b>Status</b>
DPM	Podiatrist license number	An identifier that is unique to a podiatrist within the jurisdiction of the licensing board.		
DR	Donor Registration Number			
DS	Discover Card		Deprecated and replaced by BC in v 2.5.	
DSG	Diagnostic Study Group	Unique Identifier that groups several orders that are to be performed together.	Example: Radiology studies	
EI	Employee number	A number that uniquely identifies an employee to an employer.		
EN	Employer number			
ESN	Staff Enterprise Number	An identifier that is unique to a staff member within an enterprise (as identified by the Assigning Authority).		
FDR	Fetal Death Report ID	The identifier assigned to a fetal death report, and printed on the fetal death report when issued by a jurisdictional vital records office		
FDRFN	Fetal Death Report File Number	The identifier used within the jurisdictional vital records office file system as an auxiliary means of accessing the record associated with the fetal death report certificate.		
FGN	Filler Group Number	Unique identifier assigned to a group of orders by the filler application.	This is analogous to the Placer Group Number ORC-4, except that it is assigned by the filler.	
FI	Facility ID			
FILL	Filler Identifier	An identifier for a request where the identifier is issued by the person, or service, that produces the observations or fulfills the request.		
GI	Guarantor internal identifier		Class: Financial	
GIN	Animal Group Identifier (US Official)	Identifier that can be used to unambiguously describe a specific group of animals.	GIN is the official acronym used by USDA	
GKV	insured's ID with public insurance		Class: Insurance	N
GL	General ledger number		Class: Financial	

<b>Value</b>	<b>Display Name</b>	<b>Definition</b>	<b>Comment/ Usage Note</b>	<b>Status</b>
GN	Guarantor external identifier		Class: Financial	
HC	Health Card Number			
IND	Indigenous/Abo riginal	A number assigned to a member of an indigenous or aboriginal group outside of Canada.		
JHN	Jurisdictional health number		Class: Insurance 2 uses: a) UK jurisdictional CHI number; b) Canadian provincial health card number:	
KZVA	dentist office number		Class: Insurance	N
LACSN	Laboratory Accession ID	A laboratory accession id is used in the laboratory domain.	The concept of accession is used in other domains such as radiology, so the LACSN is used to distinguish a lab accession id from an radiology accession id	
LANR	Lifelong physician number		Lebenslange Arztnummer - for use in German realm.	
LI	Labor and industries number			
LN	License number			
LR	Local Registry ID			
MA	Patient Medicaid number		Class: Insurance	
MB	Member Number	An identifier for the insured of an insurance policy (this insured always has a subscriber), usually assigned by the insurance carrier.	Use Case: Person is covered by an insurance policy. This person may or may not be the subscriber of the policy.	
MC	Patient's Medicare number		Class: Insurance	
MCD	Practitioner Medicaid number		Class: Insurance	

Value	Display Name	Definition	Comment/ Usage Note	Status
MCN	Microchip Number			
MCR	Practitioner Medicare number		Class: Insurance	
MCT	Marriage Certificate	A number associated with a document identifying the event of a person's marriage.		
MD	Medical License number	An identifier that is unique to a medical doctor within the jurisdiction of a licensing board.	Use Case: These license numbers are sometimes used as identifiers. In some states, the same authority issues all three identifiers, e.g., medical, osteopathic, and physician assistant licenses all issued by one state medical board. For this case, the CX data type requires distinct identifier types to accurately interpret component 1. Additionally, the distinction among these license types is critical in most health care settings (this is not to convey full licensing information, which requires a segment to support all related attributes).	
MI	Military ID number	A number assigned to an individual who has had military duty, but is not currently on active duty. The number is assigned by the DOD or Veterans' Affairs (VA).		
MR	Medical record number	An identifier that is unique to a patient within a set of medical records, not necessarily unique within an application.		
MRT	Temporary Medical Record Number	Temporary version of a Medical Record Number	Use Case: An ancillary system that does not normally assign medical	

Value	Display Name	Definition	Comment/ Usage Note	Status
			record numbers is the first time to register a patient. This ancillary system will generate a temporary medical record number that will only be used until an official medical record number is assigned.	
MS	MasterCard		Deprecated and replaced by BC in v 2.5.	
NBSNR	Secondary physician office number		Nebenbetriebsstättennummer - for use in the German realm.	
NCT	Naturalization Certificate	A number associated with a document identifying a person's retention of citizenship in a particular country.		
NE	National employer identifier		In the US, the Assigning Authority for this value is typically CMS, but it may be used by all providers and insurance companies in HIPAA related transactions.	
NH	National Health Plan Identifier		Class: Insurance Used for the UK NHS national identifier.	
NI	National unique individual identifier		Class: Insurance In the US, the Assigning Authority for this value is typically CMS, but it may be used by all providers and insurance companies in HIPAA related transactions.	
NII	National Insurance Organization Identifier		Class: Insurance In Germany a national identifier for an insurance company. It is printed on the insurance card	

Value	Display Name	Definition	Comment/ Usage Note	Status
			(health card). It is not to be confused with the health card number itself. Krankenkassen-ID der KV-Karte	
NIIP	National Insurance Payor Identifier (Payor)		Class: Insurance In Germany the insurance identifier addressed as the payor. Krankenkassen-ID des Rechnungsempfängers Use case: a subdivision issues the card with their identifier, but the main division is going to pay the invoices.	
NNxxx	National Person Identifier where the xxx is the ISO table 3166 3-character (alphabetic) country code			D
NP	Nurse practitioner number	An identifier that is unique to a nurse practitioner within the jurisdiction of a certifying board.		
NPI	National provider identifier		Class: Insurance In the US, the Assigning Authority for this value is typically CMS, but it may be used by all providers and insurance companies in HIPAA related transactions.	
OBI	Observation Instance Identifier	Unique and persistent identifier for an observation instance	For example in the IHE-LCC Profile this is used to identify the OBX-21 of the result for which a clarification is requested using an	

<b>Value</b>	<b>Display Name</b>	<b>Definition</b>	<b>Comment/ Usage Note</b>	<b>Status</b>
			OML^O59_OML_O5 9 message structure	
OD	Optometrist license number	A number that is unique to an individual optometrist within the jurisdiction of the licensing board.		
PA	Physician Assistant number	An identifier that is unique to a physician assistant within the jurisdiction of a licensing board		
PC	Parole Card	A number identifying a person on parole.		
PCN	Penitentiary/correctional institution Number	A number assigned to individual who is incarcerated.		
PE	Living Subject Enterprise Number	An identifier that is unique to a living subject within an enterprise (as identified by the Assigning Authority).		
PEN	Pension Number			
PGN	Placer Group Number	Unique identifier assigned to a group of orders by the placer application.	This is analogous to the Placer Group Number ORC-4.	
PHC	Public Health Case Identifier	Identifier assigned to a person during a case investigation as part of a public health event	For example every person affected by the Norovirus outbreak on a cruise ship will be assigned a case ID for investigation and follow up	
PHE	Public Health Event Identifier	Identifier assigned to an event of interest to public health	For example an outbreak of Norovirus on a cruise ship – this is assigned by a public health jurisdiction at the local, state or federal level	
PHO	Public Health Official ID	An identifier for a person working at a public health agency (PHA), assigned or issued by the agency	May need to identify contact in a PHA that approved a test request or is in charge of an investigation.	
PI	Patient internal identifier	A number that is unique to a patient within an Assigning Authority.		
PIN	Premises Identifier Number (US Official)	Identifier that uniquely identifies a geographic location in the US.	The owner of the premises, or a person designated by the owner of the	

Value	Display Name	Definition	Comment/ Usage Note	Status
			premises, can register his/her location. A premises identification number, or PIN, is then permanently assigned to that location associating it with the mailing address. If there is no mailing address at the property, geographic coordinates—latitude and longitude—can be used instead to describe the location. A premises identification number (PIN) is a unique, 7-digit code that includes both letters and numbers. Example: A123R69	
PKV	insured's ID with private insurance		Class: Insurance	N
PLAC	Placer Identifier	An identifier for a request where the identifier is issued by the person or service making the request.		
PN	Person number	A number that is unique to a living subject within an Assigning Authority.		
PNT	Temporary Living Subject Number	Temporary version of a Living Subject Number.		
PPIN	Medicare/CMS Performing Provider Identification Number		Class: Insurance  Usage Note: Class: Insurance	
PPN	Passport number	A unique number assigned to the document affirming that a person is a citizen of the country.	In the US this number is issued only by the State Department.	
PRC	Permanent Resident Card Number			

Value	Display Name	Definition	Comment/ Usage Note	Status
PRN	Provider number	A number that is unique to an individual provider, a provider group or an organization within an Assigning Authority.	Use case: This allows PRN to represent either an individual (a nurse) or a group/organization (orthopedic surgery team).	
PT	Patient external identifier			
QA	QA number			
RI	Resource identifier	A generalized resource identifier.	Use Case: An identifier type is needed to accommodate what are commonly known as resources. The resources can include human (e.g. a respiratory therapist), non-human (e.g., a companion animal), inanimate object (e.g., an exam room), organization (e.g., diabetic education class) or any other physical or logical entity.	
RN	Registered Nurse Number	An identifier that is unique to a registered nurse within the jurisdiction of the licensing board.		
RPH	Pharmacist license number	An identifier that is unique to a pharmacist within the jurisdiction of the licensing board.		
RR	Railroad Retirement number	An identifier for an individual enrolled with the Railroad Retirement Administration. Analogous to, but distinct from, a Social Security Number		
RRI	Regional registry ID			
RRP	Railroad Retirement Provider		Class: Insurance	
SAMN	SAMN# accession Number	The accession number for the BioSample data repository at the National Center for Biotechnology Information (NCBI)	This accession is a permanent record locator for the BioSample record which contains	

<b>Value</b>	<b>Display Name</b>	<b>Definition</b>	<b>Comment/ Usage Note</b>	<b>Status</b>
			metadata about the biological sample.	
SB	Social Beneficiary Identifier	An identifier issued by a governmental organization to a person to identify the person should they apply for or receive social services and/or benefits		
SID	Specimen ID	Identifier for a specimen.	Used when it is not known if the specimen ID is a unique specimen ID (USID) or an ancestor ID (ASID).	
SL	State license			
SN	Subscriber Number	An identifier for a subscriber of an insurance policy which is unique for, and usually assigned by, the insurance carrier.	Class: Insurance Use Case: A person is the subscriber of an insurance policy. The person's family may be plan members, but are not the subscriber.	
SNSN	State assigned NDBS card Identifier	The identifier on a Newborn Screening Dried Bloodspot (NDBS) card that is assigned by the state which provided the sample collection cards and to whom this information must be reported	For use either with OBX-5 as CX datatype, where OBX-3 uses LOINC 57716-3^State printed on filter paper card [Identifier] in NBS card^LN, or in SPM-31	
SNO	Serial Number	An identifier affixed to an item by the manufacturer when it is first made, where each item has a different identifier.		
SP	Study Permit	A number associated with a permit identifying a person who is a resident of a jurisdiction for the purpose of education.		
SR	State registry ID			
SRX	SRA Accession number	The accession number generated by the Sequence Read Archive (SRA) at the National Center for Biotechnology Information (NCBI) when sequence data are uploaded to NCBI.	This provides both the sequence data and metadata on how the sample was sequenced. – This accession is a permanent record locator for the submitted un-	

<b>Value</b>	<b>Display Name</b>	<b>Definition</b>	<b>Comment/ Usage Note</b>	<b>Status</b>
			assembled sequence data.	
SS	Social Security number			
STN	Shipment Tracking Number	Identifier assigned to a package being shipped	For example the Fed Ex / UPS / DHS / USPS tracking number	
TAX	Tax ID number			
TN	Treaty Number/ (Canada)	A number assigned to a member of an indigenous group in Canada.	Use Case: First Nation.	
TPR	Temporary Permanent Resident (Canada)	A number associated with a document identifying a person's temporary permanent resident status.		
TRL	Training License Number	The license number used during training.		
U	Unspecified identifier			
UDI	Universal Device Identifier	An identifier assigned to a device using the Unique Device Identification framework as defined by IMDRF ( <a href="http://imdrf.org">http://imdrf.org</a> ).		
UPIN	Medicare/CMS (formerly HCFA)'s Universal Physician Identification numbers	An identifier for a provider within the CMS/Medicare program. A globally unique identifier for the provider in the Medicare program.	Class: Insurance	
USID	Unique Specimen ID	A unique identifier for a specimen.		
VN	Visit number			
VP	Visitor Permit	A number associated with a document identifying a person as a visitor of a jurisdiction or country.		
VS	VISA		Deprecated and replaced by BC in v 2.5.	
WC	WIC identifier			
WCN	Workers' Comp Number			
WP	Work Permit	A number associated with a permit for a person who is granted permission to work in a country for a specified time period.		
XV	Health Plan Identifier	National unique health plan identifier required by the US Department of Health and Human Services, Centers	Also referred to as HPID (Health Plan Identifier).	

Value	Display Name	Definition	Comment/ Usage Note	Status
		for Medicare and Medicaid Services (CMS) in the US Realm.	Usage Note: The code value 'XV' is used in CMS mandated Health Insurance Portability and Accountability Act (HIPAA) transactions.	
XX	Organization identifier			
ZANR	dentist identifier		Class: Insurance	N

0204- Organizational Name Type

#### Concept Domain Information

Concept Domain Name	DOM: 204
SymbolicName	OrganizationalNameType
Description	The domain of possible values that specify the type of name for an organization i.e., legal name, display name.
Concept Domain Only	no

#### Code System Identification Information

Code System OID	2.16.840.1.113883.18.109

<b>HL7 Version Introduced</b>	2.3

#### Table 0211 Coded Content

<b>Value</b>	<b>Display Name</b>	<b>Definition</b>	<b>Comment/ Usage Note</b>	<b>Status</b>
ASCII	The printable 7-bit ASCII character set.		(This is the default if this field is omitted)	
8859/1	The printable characters from the ISO 8859/1 Character set			
8859/2	The printable characters from the ISO 8859/2 Character set			
8859/3	The printable characters from the ISO 8859/3 Character set			
8859/4	The printable characters from the ISO 8859/4 Character set			
8859/5	The printable characters from the ISO 8859/5 Character set			
8859/6	The printable characters from the ISO 8859/6 Character set			
8859/7	The printable characters from the ISO 8859/7 Character set			
8859/8	The printable characters from the ISO 8859/8 Character set			
8859/9	The printable characters from the ISO 8859/9 Character set			
8859/15	The printable characters from the ISO 8859/15 (Latin-15)			
ISO IR6	ASCII graphic character set consisting of 94 characters.		<a href="http://www.itscj.ipsj.or.jp/ISO-IR/006.pdf">http://www.itscj.ipsj.or.jp/ISO-IR/006.pdf</a>	
ISO IR14	Code for Information Exchange (one byte)(JIS X 0201-1976).		Note that the code contains a space, i.e., "ISO IR14".	

Value	Display Name	Definition	Comment/ Usage Note	Status
ISO IR87	Code for the Japanese Graphic Character set for information interchange (JIS X 0208-1990),		Note that the code contains a space, i.e., "ISO IR87".  The JIS X 0208 needs an escape sequence. In Japan, the escape technique is ISO 2022. From basic ASCII, escape sequence "escape" \$ B (in HEX, 1B 24 42) lets the parser know that following bytes should be handled 2-byte wise. Back to ASCII is 1B 28 42.	
ISO IR159	Code of the supplementary Japanese Graphic Character set for information interchange (JIS X 0212-1990).		Note that the code contains a space, i.e., "ISO IR159".	
GB 18030-2000	Code for Chinese Character Set (GB 18030-2000)		Does not need an escape sequence.	
KS X 1001	Code for Korean Character Set (KS X 1001)			
CNS 11643-1992	Code for Taiwanese Character Set (CNS 11643-1992)		Does not need an escape sequence.	
BIG-5	Code for Taiwanese Character Set (BIG-5)		Does not need an escape sequence.  BIG-5 does not need an escape sequence. ASCII is a 7 bit character set, which means that the top bit of the byte is "0". The parser knows that when the top bit of the byte is "0", the character set is ASCII. When it is "1", the following bytes should be handled as 2 bytes (or more). No escape technique is needed. However, since some servers do not correctly interpret when they receive a top bit "1", it is advised, in internet RFC, to not use these kind of non-safe non-escape extension.	
UNICODE	The world wide character standard from ISO/IEC 10646-1-1993		Deprecated. Retained for backward compatibility only as v 2.5. Replaced by specific Unicode encoding codes.  Usage Note: Available from The Unicode Consortium, P.O. Box 700519, San Jose, CA 95170-0519. See	

Value	Display Name	Definition	Comment/ Usage Note	Status
			<a href="http://www.unicode.org/unicode/consortium/consort.html">http://www.unicode.org/unicode/consortium/consort.html</a>	
UNICODE UTF-8	UCS Transformation Format, 8-bit form		<p>UTF-8 is a variable-length encoding, each code value is represented by 1,2 or 3 bytes, depending on the code value. 7 bit ASCII is a proper subset of UTF-8. Note that the code contains a space before UTF but not before and after the hyphen. Since UTF-8 represents the full UNICODE character set, the following restriction apply to its use:</p> <ol style="list-style-type: none"> <li>1. UTF-8 must be the default encoding of the message, UTF-8 cannot be specified as an additional character set in MSH-18</li> <li>2. There are no other character sets allowed in a message where UTF-8 is the default encoding in the message. In other words, UNICODE UTF-8 can only be specified as a single value in MSH-18</li> <li>3. A message encoded in UTF-8 must not use a Byte Order Mark (BOM).</li> </ol>	

0212- Nationality

#### Concept Domain Information

<b>Concept Domain Name</b>	DOM: 212
<b>SymbolicName</b>	Nationality
<b>Description</b>	The domain of possible values that identify the nation or national grouping to which the person belongs. This information may be different from a person's citizenship in countries in which multiple nationalities are recognized (for example, Spain: Basque, Catalan, etc.).
<b>Concept Domain Only</b>	yes

## 0215- Publicity Code

### Concept Domain Information

Concept Domain Name	DOM: 215
SymbolicName	PublicityCode
Description	The domain of possible values for a level of publicity of information about a patient for a specific visit.
Concept Domain Only	no

### Code System Identification Information

Code System OID	2.16.840.1.113883.18.119
SymbolicName	publicity
Description	Code system of concepts specifying a level of publicity of information about a patient for a specific visit. Used in HL7 Version 2.x messaging in the PV2 and PD1 segments.
Full Name	Publicity Code Code System
URI	<a href="http://terminology.hl7.org/CodeSystem/v2-0215">http://terminology.hl7.org/CodeSystem/v2-0215</a>

### Code System Version Information

Effective Date	30.08.2003
Version	1
HL7 Version Introduced	2.5

### Value Set Information

Value Set OID	2.16.840.1.113883.21.131
SymbolicName	hl7VS-publicityCode
Description	Concepts specifying a level of publicity of information about a patient for a specific visit.
Full Name	Publicity Code Value Set

0254- Kind of Quantity

**Concept Domain Information**

Concept Domain Name	DOM: 254
SymbolicName	KindOfQuantity
Description	The domain of possible values that describe the underlying kind of property represented by an observation. The categories distinguish concentrations from total amounts, molar concentrations from mass concentrations, partial pressures from colors, and so forth. These are discussed more fully in the LOINC Users' Manual. They are derived from the approach described in 1995 edition of the IUPAC Silver Book. These distinctions are used in IUPAC and LOINC standard codes. The distinctions of true quantities in this table are based primarily on dimensional analyses. The table contains a number of "families," those related to simple counts (number, number concentration, etc.), to mass (mass, mass concentration, etc.), to enzyme activity (catalytic content, catalytic concentration, etc.), and molar or equivalents (substance content, substance concentration).
Concept Domain Only	no

**Code System Identification Information**

Code System OID	2.16.840.1.113883.18.149
SymbolicName	kindOfQuantity
Description	HL7 published code system of concepts that describe categories of an underlying kind of property represented by an observation. These are intended to distinguish concentrations from total amounts, molar concentrations from mass concentrations, partial pressures from colors, and so forth. These are discussed more fully in the LOINC Users' Manual. These defined categories are derived from the approach described in 1995 edition of the IUPAC Silver Book. These distinctions are used in IUPAC and LOINC standard codes. Needs review by OO and HTA to determine if this is a value set built on LOINC part codes or some other external vocabulary.

## 0255- Duration Categories

### Concept Domain Information

Concept Domain Name	DOM: 255
SymbolicName	DurationCategories
Description	The domain of possible values that classify an observation definition as intended to measure a patient's state at a point in time.
Concept Domain Only	no

### Code System Identification Information

Code System OID	2.16.840.1.113883.18.150
SymbolicName	durationCategories
Description	Code system of concepts used to classify an observation definition as intended to measure a patient's state at a point in time. Used in HL7 Version 2.x messaging in the OM1 segment.

### Table 0255 Coded Content

Value	Display Name	Definition	Comment/ Usage Note	Status
*	(asterisk) Life of the "unit"		Used for blood products.  Usage Note: Deprecated March 2016; use code LU instead.	D
30M	30 minutes			
1H	1 hour			
2H	2 hours			
2.5H	2 1/2 hours			
3H	3 hours			
4H	4 hours			
5H	5 hours			
6H	6 hours			
7H	7 hours			
8H	8 hours			
12H	12 hours			
24H	24 hours			
2D	2 days			
3D	3 days			
4D	4 days			
5D	5 days			
6D	6 days			
1W	1 week			
2W	2 weeks			
3W	3 weeks			

Value	Display Name	Definition	Comment/ Usage Note	Status
4W	4 weeks			
1L	1 months (30 days)			
2L	2 months			
3L	3 months			
LU	Life of the "unit"	Life of the "unit" (for blood products).	Usage Note: In a master file update for blood products, no specific duration value can be specified (see OM1-43 "Point Versus Interval" field definition).	
PT	point in time	To identify measures at a point in time. This is a synonym for "spot" or "random" as applied to urine measurements.		

## 0256- Time Delay Post Challenge

### Concept Domain Information

Concept Domain Name	DOM: 256
SymbolicName	TimeDelayPostChallenge
Description	The domain of possible values to classify an observation definition as being a component of a challenge test.
Concept Domain Only	no

### Code System Identification Information

Code System OID	2.16.840.1.113883.18.151
SymbolicName	timeDelayPostChallenge
Description	HL7-defined code system of concepts used to classify an observation definition as being a component of a challenge test. Used in HL7 Version 2.x messaging in the OM1 segment.
Full Name	Time Delay Post Challenge Code System

0315- Living Will Code

### Concept Domain Information

<b>Concept Domain Name</b>	DOM: 315
<b>SymbolicName</b>	LivingWillCode
<b>Description</b>	The domain of possible values for whether or not the patient has a living will and, if so, whether a copy fo the living will is on file at the healthcare facility. If the patient does not have a living will, the value of this field indicates whether the patient was provided information on living wills.
<b>Concept Domain Only</b>	no

### Code System Identification Information

<b>Code System OID</b>	2.16.840.1.113883.18.190
<b>SymbolicName</b>	livingWillCodes
<b>Description</b>	Code system of concepts specifying whether or not the patient has a living will and, if so, whether a copy fo the living will is on file at the healthcare facility. If the patient does not have a living will, the value of this field indicates whether the patient was provided information on living wills. Used in HL7 Version 2.x messaging in the Patient Visit - Additional Information ( PV2) and Patient Additional Demographic (PD1) segments.
<b>Full Name</b>	Living Will Code Code System

### 0339- Advanced Beneficiary Notice Code

#### Concept Domain Information

Concept Domain Name	DOM: 339
SymbolicName	AdvancedBeneficiaryNoticeCode
Description	The domain of possible values for the status of the patient's or the patient's representative's consent for responsibility to pay for potentially uninsured services. This element was introduced to satisfy CMS Medical Necessity requirements for outpatient services in the United States. Includes concepts such as (a) whether the associated diagnosis codes for the service are subject to medical necessity procedures, (b) whether, for this type of service, the patient has been informed that they may be responsible for payment for the service, and (c) whether the patient agrees to be billed for this service.
Concept Domain Only	no

#### Code System Identification Information

Code System OID	2.16.840.1.113883.18.209
SymbolicName	advancedBeneficiaryNotice
Description	Code system of concepts specifying the status of the patient's or the patient's representative's consent for responsibility to pay for potentially uninsured services. This element was introduced to satisfy CMS Medical Necessity requirements for outpatient services in the United States. Includes concepts such as (a) whether the associated diagnosis codes for the service are subject to medical necessity procedures, (b) whether, for this type of service, the patient has been informed that they may be responsible for payment for the service, and (c) whether the patient agrees to be billed for this service. Used in HL7 Version 2.x messaging in the ORC and FT1 segments.

## 0340- Procedure Code Modifier

#### Concept Domain Information

<b>Concept Domain Name</b>	DOM: 340
<b>SymbolicName</b>	ProcedureCodeModifier
<b>Description</b>	The domain of possible values that specify a procedure code modifier to a procedure code. Procedure code modifiers are defined by regulatory agencies such as CMS and the AMA. Multiple modifiers may be reported. The modifiers are sequenced in priority according to user entry. This is a requirement of the UB and the 1500 claim forms. Multiple modifiers are allowed and the order placed on the form affects reimbursement.

<b>Concept Domain Only</b>	yes
----------------------------	-----

**Table Metadata**

SET_S38	Specimen Container Preparation and Specimen Collection Event	This message structure supports tracking of information related to preparations for specimen collection and the collection event.	It can be used to describe the container preparation for collection as well as the successful collection of one or more specimen(s).	
SET_S40	Specimen Collection Event unsuccessful	This message structure supports tracking of information when specimen collection is not successful.	It can be used to describe the reason why a specimen collection was unsuccessful.	
SET_S41	Specimen Movement Event	This message structure supports tracking of information related to the movements of specimens across locations, and placement in and out of storage.	It can be used to report on specimen departing, arriving, being accepted or rejected, including moving the specimen into storage or retrieving it from storage (e.g. in biobanking).	
SET_S45	Specimen Identification Events	This message structure supports tracking of information to identify or de-identify specimens or at time of final disposal.	It can be used to report the de-and re-identification of specimen(s) as well as the final disposition of a specimen.	
SET_S50	Specimen Procedure Step successful	This message structure supports tracking of information related to processing of one or more specimen that may result in derived (child) specimen or not.

-------------------------------	-------

**Table 0357 Coded Content**

<b>Value</b>	<b>Display Name</b>	<b>Definition</b>	<b>Comment/ Usage Note</b>	<b>Status</b>
0	Message accepted		Success. Optional, as the AA conveys success. Used for systems that must always return a status code.	
100	Segment sequence error		Error: The message segments were not in the proper order, or required segments are missing.	
101	Required field missing		Error: A required field is missing from a segment	
102	Data type error		Error: The field contained data of the wrong data type, e.g., an NM field contained "FOO".	
103	Table value not found		Error: A field of data type ID or IS was compared against the corresponding table, and no match was found.	
104	Value too long		Error: a value exceeded the normative length, or the length that the application is able to safely handle.	
198	Non-Conformant Cardinality	An error has been encountered related to HL7 message content. Message is not - conformant with the applicable specification's (base standard, conformance profile or implementation profile) cardinality.	Error: Cardinality is listed as [0..3] and more than 3 of the identified element are present in the message.	
199	Other HL7 Error	Any other error with the HL7 syntax that is not captured in any of the other error codes in this set.	Error	
200	Unsupported message type		Rejection: The Message Type is not supported.	
201	Unsupported event code		Rejection: The Event Code is not supported.	
202	Unsupported processing id		Rejection: The Processing ID is not supported.	
203	Unsupported version id		Rejection: The Version ID is not supported.	
204	Unknown key identifier	Retained for backwards compatibility only:	ERR-3 (HL7 Error Code) should be used to convey errors at the structural level and this is an application level error, which	B

Value	Display Name	Definition	Comment/ Usage Note	Status
		This situation should be reported in ERR-5 (Application Error Code) using code 101 (Unknown Key Identifier) from code system HL70533.	should be reported in ERR-5 (Application Error Code).	
205	Duplicate key identifier	Retained for backwards compatibility only: This situation should be reported in ERR-5 (Application Error Code) using code 102 (Duplicate Key Identifier) from code system HL70533.	ERR-3 (HL7 Error Code) should be used to convey errors at the structural level and this is an application level error, which should be reported in ERR-5 (Application Error Code).	B
206	Application record locked	Retained for backwards compatibility only: This situation should be reported in ERR-5 (Application Error Code) using code 103 (Application record locked) from code system HL70533.	ERR-3 (HL7 Error Code) should be used to convey errors at the structural level and this is an application level error, which should be reported in ERR-5 (Application Error Code).	B
207	Application error	An application level error has occurred and the detail for that error is identified in ERR-5.	This value is used when no other value in this list is applicable and there is an application error reported in ERR-5. It is applicable when ERR-3 is required in an implementation guide.	

## 0358- Practitioner Group

### Concept Domain Information

Concept Domain Name	DOM: 358
SymbolicName	PractitionerGroup
Description	The domain of possible values for the name and/or code of a group of practitioners to which this practitioner belongs. No suggested values.
Concept Domain Only	yes

### Table Metadata

Table	0358
Table OID	2.16.840.1.113883.12.358

<b>SymbolicName</b>	Practitioner Group

<b>HL7 Version Introduced</b>	2.3.1

0359- Diagnosis Priority

#### Concept Domain Information

<b>Concept Domain Name</b>	DOM: 359
<b>SymbolicName</b>	DiagnosisPriority
<b>Description</b>	The domain of possible values that identify the significance or priority of the diagnosis code. Note that the codes are numeric, and the number of the code represents the ordinal priority of the associated diagnosis. The predefined codes are the most common, and just a starter set, as the codes are an unbounded list; additional ranked procedures may be signified by incrementing the code value as needed.
<b>Concept Domain Only</b>	no

#### Code System Identification Information

<b>Code System OID</b>	2.16.840.1.113883.18.218
<b>SymbolicName</b>	diagnosisPriority
<b>Description</b>	Code system of concepts that identify the significance or priority of the diagnosis code. Note that the codes are numeric, and the number of the code represents the ordinal priority of the associated diagnosis. Used in the DG1 segment in HL7 Version 2.x messaging. The predefined codes are the most common, and just a starter set, as the codes are an unbounded list; additional ranked procedures may be signified by incrementing the code value as needed.
<b>Full Name</b>	Diagnosis Priority Code System

### Table 0365 Coded Content

Value	Display Name	Definition	Comment/ Usage Note	Status
IN	Initializing	Software is ready, hardware not yet		
CO	Configuring			
PU	Powered Up	Software and hardware are not yet ready		
RS	Ready to start	Software and hardware are ready, but user action is required to start		
ID	Idle	Successfully started, new orders can be accepted, currently no orders are present		
OP	Normal Operation	Successfully started, new orders can be accepted		
CL	Clearing			
PA	Pausing			
PD	Paused	User action is required to continue		
ES	E-stopped	Error, remaining orders can be finished, new orders cannot be accepted		
TS	Transport stopped			
SS	Sampling stopped			
SD	Shutting down			
DI	Diagnose			
MA	Maintenance			
FL	Failure	Failure, remaining orders are aborted, new orders cannot be accepted		
UNK	Unknown			
LT	Limited test menu	For diagnostic instruments: some test types are unavailable		

0366- Local/Remote Control State

### Concept Domain Information

<b>Concept Domain Name</b>	DOM: 366
<b>SymbolicName</b>	Local_RemoteControlState

<b>Description</b>	The domain of possible values that identify the current state of control associated with the equipment. Equipment can either work autonomously ('Local' control state) or it can be controlled by another system, e.g., LAS computer ('Remote' control state).
<b>Concept Domain Only</b>	no

#### Code System Identification Information

<b>Code System OID</b>	2.16.840.1.113883.18.224
<b>SymbolicName</b>	local-remoteControlState
<b>Description</b>	HL7-defined code system of concepts that identify the current state of control associated with the equipment. Equipment can either work autonomously ('Local' control state) or it can be controlled by another system, e.g., LAS computer ('Remote' control state). Used in the Equipment Detail (EQU) segment in HL7 Version 2.x messaging.
<b>Full Name</b>	Local/Remote Control State Code System

### Table 0369 Coded Content

<b>Value</b>	<b>Display Name</b>	<b>Definition</b>	<b>Comment/ Usage Note</b>	<b>Status</b>
B	Blind Sample	Used to test the validity of the measurement process, where the composition of the sample is unknown except to the person submitting it.		
C	Calibrator	Used for initial setting of calibration of the instrument.		
E	Electronic QC	Used with manufactured reference providing signals that simulate QC results		
F	Filler Organization Proficiency	Specimen used for testing proficiency of the organization performing the testing (Filler).		
G	Group	Used when solid specimens consist of multiple individual elements that are not individually identified but can be separated again into the original specimens. The		

Value	Display Name	Definition	Comment/ Usage Note	Status
		identifiers of the original specimens may be tracked.		
H	Historical Specimen	This identifies a parent specimen to the specimen that is submitted for testing	The order of specimen processing can be derived from the SPM-3 value in all SPM segments in the message. More than one historical SPM can be submitted, each SPM describes one step in the derivation process of the specimen submitted for testing.	
L	Pool	Used when aliquots of liquid individual specimens are combined to form a single specimen representing all of the components that are not individually identified. The identifiers of the original specimens may be tracked.		
O	Operator Proficiency	Specimen used for testing Operator Proficiency.		
P	Patient	Used for any patient sample.	If the component is not valued (blank) this represents the default meaning.	
Q	Control specimen	Used when specimen is the control specimen (either positive or negative).		
R	Replicate (of patient sample as a control)	Used when a patient sample is re-run as a control for a repeat test.		
V	Verifying Calibrator	Used for periodic calibration checks.		

## 0370- Container Status

### Concept Domain Information

Concept Domain Name	DOM: 370
SymbolicName	ContainerStatus
Description	The domain of possible values that identify the status of the unique container in which the specimen resides at the time the transaction was initiated.
Concept Domain Only	no

### Code System Identification Information

Code System OID	2.16.840.1.113883.18.228
SymbolicName	containerStatus
Description	HL7-defined code system of concepts that identify the status of the unique container in which the specimen resides at the time the transaction was

	initiated. Used in the Interaction Specimen Container Detail (SAC) segment in HL7 Version 2.x messaging.
<b>Full Name</b>	Container Status Code System
<b>URI</b>	<a href="http://terminology.hl7.org/CodeSystem/v2-0370">http://terminology.hl7.org/CodeSystem/v2-0370</a>

<b>Table</b>	0370
<b>Table OID</b>	2.16.840.1.113883.12.370
<b>SymbolicName</b>	Container Status
<b>Description</b>	HL7-defined table of codes that identify the status of the unique container in which the specimen resides at the time the transaction was initiated.
<b>Type</b>	HL7
<b>Steward</b>	OO
<b>where used</b>	SAC-8
<b>HL7 Version Introduced</b>	2.4

#### Table 0370 Coded Content

<b>Value</b>	<b>Display Name</b>	<b>Definition</b>	<b>Comment/ Usage Note</b>	<b>Status</b>
A	Archived	Archived status is used by one system to inform another that the container was already processed by this system, archived for a longer time period and is re-introduced to the automation system for re-processing.		
I	Identified	Identified status is used by one system to inform another that it has received a container. In the exchange between the LAS and LIS the Identified status can be used for reporting of the "In Lab" (Specimen Received) status. In some cases this may not be equal to the first event of sample recognition.		

Value	Display Name	Definition	Comment/ Usage Note	Status
L	Left Equipment	Left Equipment status is used by one system to inform another that the container has been released from that system.		
M	Missing	Missing status is used by one system to inform another that the container did not arrive at its next expected location.		
O	In Process	In Process status is used by one system to inform another that the specific container is being processed by the equipment. It is useful as a response to a query about Container Status, when the specific step of the process is not relevant.		
P	In Position	In Position status is used by one system to inform another that the container is in position for specimen transfer (e.g., container removal from track, pipetting, etc.).		
R	Process Completed	Process Completed status is used by one system to inform another that the processing has been completed, but the container has not been released from that system.		
U	Unknown	Unknown status is used by one system to inform another that the container has not been identified.		
X	Container Unavailable	Cancelled status is used by one system to inform another that the container is no longer available within the scope of the system (e.g., tube broken or discarded).		

#### 0371- Additive/Preservative

##### Concept Domain Information

Concept Domain Name	DOM: 371
SymbolicName	Additive/Preservative
Description	The domain of possible values for any additive introduced to the specimen before or at the time of collection. These additives may be introduced in order to preserve, maintain or enhance the particular nature or component of the specimen.
Concept Domain Only	no

##### Code System Identification Information

Code System OID	2.16.840.1.113883.18.229
SymbolicName	additivePreservative
Description	HL7-defined code system of concepts specifying any additive introduced to the specimen before or at the time of collection. These additives may be introduced in order to preserve, maintain or enhance the particular nature or component of the specimen. Used in HL7 Version 2.x messaging in the SPM and SAC segments.

<b>Value</b>	<b>Display Name</b>	<b>Definition</b>	<b>Comment/ Usage Note</b>	<b>Status</b>
F10	10% Formalin		Tissue preservative	
C32	3.2% Citrate		Blue top tube	
C38	3.8% Citrate		Blue top tube	
HCL6	6N HCL		24 HR Urine Additive	
ACDA	ACD Solution A		Yellow top tube	
ACDB	ACD Solution B		Yellow top tube	
ACET	Acetic Acid		Urine preservative	
AMIES	Amies transport medium		Protozoa	
HEPA	Ammonium heparin		Green top tube	
BACTM	Bacterial Transport medium		Microbiological culture	
BOR	Borate Boric Acid		24HR Urine Additive	
BOUIN	Bouin's solution		Tissue	
BF10	Buffered 10% formalin		Tissue	
WEST	Buffered Citrate (Westergren Sedimentation Rate)		Black top tube	
BSKM	Buffered skim milk		Viral isolation	
CARS	Carson's Modified 10% formalin		Tissue	
CARY	Cary Blair Medium		Stool Cultures	

Value	Display Name	Definition	Comment/ Usage Note	Status
CHLTM	Chlamydia transport medium		Chlamydia culture	
CTAD	CTAD (this should be spelled out if not universally understood)		Blue top tube	
ENT	Enteric bacteria transport medium		Bacterial culture	
ENT+	Enteric plus		Stool Cultures	
JKM	Jones Kendrick Medium		Bordetella pertussis	
KARN	Karnovsky's fixative		Tissue	
LIA	Lithium iodoacetate		Gray top tube	
HEPL	Lithium/Li Heparin		Green top tube	
M4	M4		Microbiological culture	
M4RT	M4-RT		Microbiological culture	
M5	M5		Microbiological culture	
MICHTM	Michel's transport medium		IF tests	
MMDTM	MMD transport medium		Immunofluorescence	
HNO3	Nitric Acid		Urine	
NONE	None		Red or Pink top tube	
PAGE	Pages's Saline		Acanthaoemba	
PHENOL	Phenol		24 Hr Urine Additive	
KOX	Potassium Oxalate		Gray top tube	
EDTK	Potassium/K EDTA		Deprecated. Replaced by EDTK15 and EDTK75	
EDTK15	Potassium/K EDTA 15%		Purple top tube	
EDTK75	Potassium/K EDTA 7.5%		Purple top tube	
PVA	PVA (polyvinylalcohol)		O&P	
RLM	Reagan Lowe Medium		Bordetella pertussis cultures	
SST	Serum Separator Tube (Polymer Gel)		'Tiger' Top tube	
SILICA	Siliceous earth, 12 mg		Gray top tube	
NAF	Sodium Fluoride		Gray top tube	
FL100	Sodium Fluoride, 100mg		Urine	
FL10	Sodium Fluoride, 10mg		Urine	
NAPS	Sodium polyanethol sulfonate 0.35% in 0.85% sodium chloride		Yellow (Blood Culture)	
HEPN	Sodium/Na Heparin		Green top tube	
EDTN	Sodium/Na EDTA		Dark Blue top tube	
SPS	SPS(this should be spelled out if not universally understood)		Anticoagulant w/o bacteriocidal properties	
STUTM	Stuart transport medium		Bacterial culture	
THROM	Thrombin		Orange or Grey/Yellow (STAT Chem)	
FDP	Thrombin NIH; soybean trypsin inhibitor (Fibrin Degradation Products)		Dark Blue top tube	
THYMOL	Thymol		24 Hr Urine Additive	
THYO	Thyoglycollate broth		Bacterial Isolation	
TOLU	Toluene		24 Hr Urine Additive	
URETM	Ureaplasma transport medium		Ureaplasma culture	
VIRTM	Viral Transport medium		Virus cultures	

## 0372- Specimen Component

### Concept Domain Information

<b>Concept Domain Name</b>	DOM: 372

### Table 0376 Coded Content

<b>Value</b>	<b>Display Name</b>	<b>Definition</b>	<b>Comment/ Usage Note</b>	<b>Status</b>
C37	Body temperature		Critical to keep at body temperature: 36 - 38( C.	
AMB	Ambient temperature		Keep at ambient (room) temperature, approximately 22 ( 2 degrees C. Accidental refrigeration or freezing is of little consequence	
CAMB	Critical ambient temperature		Critical ambient - must not be refrigerated or frozen.	
REF	Refrigerated temperature		Keep at refrigerated temperature: 4-8( C. Accidental warming or freezing is of little consequence	
CREF	Critical refrigerated temperature		Critical refrigerated - must not be allowed to freeze or warm until immediately prior to testing	
FRZ	Frozen temperature		Keep at frozen temperature: -4( C. Accidental thawing is of little consequence	
CFRZ	Critical frozen temperature		Critical frozen - must not be allowed to thaw until immediately prior to testing	
DFRZ	Deep frozen		Deep frozen: -16 to -20( C.	

Value	Display Name	Definition	Comment/ Usage Note	Status
UFRZ	Ultra frozen		Ultra cold frozen: ~ -75 to -85( C. (ultra cold freezer is typically at temperature of dry ice).	
NTR	Liquid nitrogen		Keep in liquid nitrogen.	
PRTL	Protect from light		Protect from light (e.g., wrap in aluminum foil).	
CATM	Protect from air		Critical. Do not expose to atmosphere. Do not uncap.	
DRY	Dry		Keep in a dry environment.	
PSO	No shock		Protect from shock.	
PSA	Do not shake		Do not shake.	
UPR	Upright		Keep upright. Do not turn upside down.	
MTLF	Metal Free		Container is free of heavy metals including lead.	

## 0377- Other Environmental Factors

### Concept Domain Information

Concept Domain Name	DOM: 377
SymbolicName	OtherEnvironmentalFactors
Description	The domain of possible values that identify the other environmental factors associated with the specimen in a specific container, e.g., atmospheric exposure.
Concept Domain Only	no

### Code System Identification Information

Code System OID	2.16.840.1.113883.18.235
SymbolicName	environmentalFactors
Description	Code system of concepts that identify the other environmental factors associated with the specimen in a specific container, e.g., atmospheric exposure. Used in the Interaction Specimen Container Detail (SAC) segment in HL7 Version 2.x messaging.
Full Name	Other Environmental Factors Code System

0389- Analyte Repeat Status

#### Concept Domain Information

<b>Concept Domain Name</b>	DOM: 389
<b>SymbolicName</b>	AnalyteRepeatStatus
<b>Description</b>	The domain of possible values identifying the repeat status for the analyte/result (e.g. original, rerun, repeat, reflex). The following are assumptions regarding the table values: Repeated without dilution — performed usually to confirm correctness of results (e.g., in case of results flagged as "Panic" or mechanical failures). Repeated with dilution — performed usually in the case the original result exceeded the measurement range (technical limits). Reflex test — this test is performed as the consequence of rules triggered based on other test result(s).
<b>Concept Domain Only</b>	no

#### Code System Identification Information

<b>Code System OID</b>	2.16.840.1.113883.18.240
<b>SymbolicName</b>	analyteRepeatStatus

0392- Match Reason

#### Concept Domain Information

Concept Domain Name	DOM: 392
SymbolicName	MatchReason

<b>Description</b>	The domain of possible values identifying what search components (e.g., name, birthdate, social security number) of the record returned matched the original query where the responding system does not assign numeric match weights or confidence levels. It provides a method for passing a descriptive indication of the reason a particular record was found.
<b>Concept Domain Only</b>	no

#### Code System Identification Information

<b>Code System OID</b>	2.16.840.1.113883.18.243
<b>SymbolicName</b>	matchReason
<b>Description</b>	Code system of concepts identifying what search components (e.g., name, birthdate, social security number) of the record returned matched the original query where the responding system does not assign numeric match weights or confidence levels. It provides a method for passing a descriptive indication of the reason a particular record was found. Used in HL7 Version 2.x messaging in the Query Response Instance (QRI) segment.

### Table 0396 Coded Content

<b>Value</b>	<b>Display Name</b>	<b>Definition</b>	<b>Comment/ Usage Note</b>	<b>Status</b>
99zzz	Local general code for a site-defined code system used for a specific set of trading partners. The 'zzz' SHALL be any printable ASCII string. Length of the name SHALL not exceed field width, and is subject to local implementation.		The 'zzz' may be any printable ASCII string of variable length, but the recommendation is to generally use only numbers and uppercase letters, as that is how all of the currently existent table 396 entries have been created for many years. In addition, there is no explicit length restriction, but it is recommended that the string be kept below a 20 character maximum.	D
ACR	American College of Radiology finding codes		Index for Radiological Diagnosis Revised, 3rd Edition 1986, American College of Radiology, Reston, VA.	

<b>Value</b>	<b>Display Name</b>	<b>Definition</b>	<b>Comment/ Usage Note</b>	<b>Status</b>
ACTCODE	Table of HL7 Version 3 ActCode values		For use in v2.x systems interoperating with V3 systems. Identical to the code system 2.16.840.1.113883.5.4 ActCode in the Version 3 vocabulary.	
ACTRELSS	Used to indicate that the target of the relationship will be a filtered subset of the total related set of targets. Used when there is a need to limit the number of components to the first, the last, the next, the total, the average or some other filtere		V3 coding system. Download with V3 materials.

AMTv2	Australian Medicines Terminology (v2)		The national terminology to identify medicines used in Australia, using unique codes to deliver unambiguous, accurate and standardised names for both branded (trade) and generic (medicinal) products.	
ANS+	HL7 set of units of measure		HL7 set of units of measure based upon ANSI X3.50 - 1986, ISO 2988-83, and US customary units / see chapter 7, section 7.4.2.6.	
ART	WHO Adverse Reaction Terms		WHO Collaborating Centre for International Drug Monitoring, Box 26, S-751 03, Uppsala, Sweden.	
AS4	ASTM E1238/E1467 Universal		American Society for Testing & Materials and CPT4 (see Appendix X1 of Specification E1238 and Appendix X2 of Specification E1467).	
AS4E	AS4 Neurophysiology Codes		ASTM's diagnostic codes and test result coding/grading systems for clinical neurophysiology. See ASTM Specification E1467, Appendix 2.	
ATC	American Type Culture Collection		Reference cultures (microorganisms, tissue cultures, etc.), related biological materials and associated data. American Type Culture Collection, 12301 Parklawn Dr, Rockville MD, 20852. (301) 881-2600.	
C4	CPT-4		American Medical Association, P.O. Box 10946, Chicago IL 60610.	
C5	CPT-5		Not currently being worked on, no proposed release date at this time. American Medical Association, P.O. Box 10946, Chicago IL 60610.	D
CAPECC	College of American Pathologists Electronic Cancer Checklist		Each code in this system represents a single line in a database template for the College of American Pathologists Electronic Cancer Checklist (CAP eCC). Each line and its code corresponds to either a question or an answer selection. The code is in a decimal format of #####.#####.#####.#####, where each "#" is an optional number. The nine digits to the right of the Ckey decimal point make up a namespace identifier, which is specific to the center that created the database entries for the checklist line items with their unique Ckey values. The namespace identifier for SNOMED Terminology Solutions at the College of	

<b>Value</b>	<b>Display Name</b>	<b>Definition</b>	<b>Comment/ Usage Note</b>	<b>Status</b>
			American Pathologists is 1000043. All Ckey values in the 2008 release use namespace 1000043. The digits to the left of the decimal point are a locally assigned sequential key for the ChecklistTemplateItems table in the local CAP eCC database. These codes are used to specify questions and answers selected in a CAP eCC template for transmission in an HL7 message, as defined by the NAACCR Pathology Workgroup and the CDC/NPCR Reporting Pathology Protocols II (RPP II) project. SNOMED Terminology Solutions, College of American Pathologists, 325 Waukegan Road, Northfield, Illinois, 60093, snomedolutions@cap.org	
CAS	Chemical abstract codes		These include unique codes for each unique chemical, including all generic drugs. The codes do not distinguish among different dosing forms. When multiple equivalent CAS numbers exist, use the first one listed in USAN. USAN 1990 and the USP dictionary of drug names, William M. Heller, Ph.D., Executive Editor, United States Pharmacopeial Convention, Inc., 12601 Twinbrook Parkway, Rockville, MD 20852.	
CCC	Clinical Care Classification system		Clinical Care Classification System (formerly Home Health Care Classification system) codes. The Clinical Care Classification (CCC) consists of two terminologies: CCC of Nursing Diagnoses and CCC of Nursing Interventions both of which are classified by 21 Care Components. Virginia Saba, EdD, RN; Georgetown University School of Nursing; Washington, DC.	
CD2	CDT-2 Codes		American Dental Association's Current Dental Terminology (CDT-2) code. American Dental Association, 211 E. Chicago Avenue., Chicago, Illinois 60611.	
CDCA	CDC Analyte Codes		Public Health Practice Program Office, Centers for Disease Control and Prevention, 4770 Buford Highway, Atlanta, GA, 30421. Also available via FTP: <a href="ftp://ftp.cdc.gov/pub/laboratory_info/CLIA">ftp://ftp.cdc.gov/pub/laboratory_info/CLIA</a> and Gopher: <a href="gopher://gopher.cdc.gov:70/11/laboratory_info/CLIA">gopher://gopher.cdc.gov:70/11/laboratory_info/CLIA</a>	
CDCEDACUTY	CDC Emergency Department Acuity		Patient Acuity indicates level of care required (Acute, Chronic, Critical)	

<b>Value</b>	<b>Display Name</b>	<b>Definition</b>	<b>Comment/ Usage Note</b>	<b>Status</b>
cdcg51vis	VIS Bar Codes (IIS)		The purpose of the barcode on the bottom of the Vaccine Information Statement (VIS) is to provide an opportunity to electronically capture the VIS document type (e.g. influenza, MMR) and the edition date of the VIS, as required by the National Childhood Vaccine Injury Act (NCVIA). For more information, please visit - <a href="http://www.cdc.gov/vaccines/pubs/vis/vis-barcodes.htm">http://www.cdc.gov/vaccines/pubs/vis/vis-barcodes.htm</a>	
CDCINDUSTRY2010	Industry CDC Census 2010		For more information and instructions on using this coding system, see the instruction manual for CDC-Census I&O coding at: <a href="http://www.cdc.gov/niosh/topics/coding/">http://www.cdc.gov/niosh/topics/coding/</a>	
CDCM	CDC Methods/Instruments Codes		Public Health Practice Program Office, Centers for Disease Control and Prevention, 4770 Buford Highway, Atlanta, GA, 30421. Also available via FTP	
CDCNHSN	CDC National Healthcare Safety Network Codes		A set of patient safety and healthcare personnel safety vocabulary concepts and associated identifiers maintained as a code system by the CDC's National Healthcare Safety Network.	
CDCOBS	CDC BioSense RT observations (Census) - CDC		List of BioSense RT observations (Clinical) used in OBX-3 like Temperature, Bloodpressure and Census related observations.	
CDCOCCUPATION2010	Occupation CDC Census 2010		For more information and instructions on using this coding system, see the instruction manual for CDC-Census I&O coding at: <a href="http://www.cdc.gov/niosh/topics/coding/">http://www.cdc.gov/niosh/topics/coding/</a>	
CDCODH	Occupational Data for Health (ODH)		Code System Source URL: <a href="https://phinvads.cdc.gov/vads/ViewCodeSystem.action?id=2.16.840.1.114222.4.5.327">https://phinvads.cdc.gov/vads/ViewCodeSystem.action?id=2.16.840.1.114222.4.5.327</a> Code System OID: 2.16.840.1.114222.4.5.327	
CDCPHINVS	CDC PHIN Vocabulary Coding System		CDC Public Health Information Network Vocabulary Service (PHIN VS) coding system concepts are used when the public health concepts are not available in the Standard Development Organization(SDO) Vocabulary like SNOMED CT, LOINC, ICD-9, etc.. The concepts in this coding system will be mapped to SDO Vocabulary when it is available.	
CDCREC	Race & Ethnicity - CDC		The U.S. Centers for Disease Control and Prevention (CDC) has prepared a code set for use in coding race and ethnicity data. This code set is based on current federal	

Value	Display Name	Definition	Comment/ Usage Note	Status
			standards for classifying data on race and ethnicity, specifically the minimum race and ethnicity categories defined by the U.S. Office of Management and Budget (OMB) and a more detailed set of race and ethnicity categories maintained by the U.S. Bureau of the Census (BC). The main purpose of the code set is to facilitate use of federal standards for classifying data on race and ethnicity when these data are exchanged, stored, retrieved, or analyzed in electronic form. At the same time, the code set can be applied to paper-based record systems to the extent that these systems are used to collect, maintain, and report data on race and ethnicity in accordance with current federal standards.	
CDS	CDC Surveillance		CDC Surveillance Codes. For data unique to specific public health surveillance requirements. Epidemiology Program Office, Centers for Disease Control and Prevention, 1600 Clifton Rd, Atlanta, GA, 30333. (404) 639-3661.	
CE	CEN ECG diagnostic codes		CEN ECG diagnostic codes – (Obsolete, retained for backwards compatibility only. See the entry for the MDC coding system.)	D
Chrom-Loc	Cytogenetic (chromosome) location		Chromosome location (AKA chromosome locus or cytogenetic location), is the standardized syntax for recording the position of genes and large mutations. It consists of three parts: the Chromosome number (e 1-22, X, Y), an indicator of which arm – either “p” for the short or “q” for the long, and then a series of numbers separated by dots that indicate the band, sub band and sub-sub band of the locus - e.g. 2p16.3 . There are other conventions for reporting ranges and locations at the end of the chromosomes. The table of these chromosome locations was loaded initially with the all of the locations found in NCBI's ClinVar variation tables. It will expand as additional sources become available.	
CLINVAR-V	ClinVar Variant ID		ClinVar processes submissions reporting variants found in patient samples, assertions made regarding their clinical significance, information about the submitter, and other supporting data. The alleles described in submissions are	

<b>Value</b>	<b>Display Name</b>	<b>Definition</b>	<b>Comment/ Usage Note</b>	<b>Status</b>
			mapped to reference sequences, and reported according to the HGVS standard.	
CLP	CLIP		Codes for radiology reports. Simon Leeming, Beth Israel Hospital, Boston MA.	
CMSOEC	OCE Edit Code		U.S. Centers for Medicare and Medicaid Services (CMS) Integrated Outpatient Code Editor (I/OCE). The edits that applied to the billing code. The OCE not only identifies individual errors but also indicates what actions should be taken and the reasons why these actions are necessary. In order to accommodate this functionality, the OCE is structured to return lists of edit numbers. This structure facilitates the linkage between the actions being taken, the reasons for the actions and the information on the claim (e.g., a specific diagnosis) that caused the action.	
CMSOMC	OCE Modifier Code		U.S. Centers for Medicare and Medicaid Services (CMS) Integrated Outpatient Code Editor (I/OCE). The edits that applied to the code modifier. The OCE not only identifies individual errors but also indicates what actions should be taken and the reasons why these actions are necessary. In order to accommodate this functionality, the OCE is structured to return lists of edit numbers. This structure facilitates the linkage between the actions being taken, the reasons for the actions and the information on the claim (e.g., a specific diagnosis) that caused the action.	
COSMIC-Smpl	COSMIC – Simple variants		This table includes only simple somatic (cancer) mutations, one per unique mutation ID. The codes is the COSMIC mutation ID, and the name uses Ensembl RefSeqs and the single letter code for p.HGVS. It carries fields analogous to most of the key fields in ClinVar, but its reference sequences are Ensembl transcript reference sequences with prefixes of ENST; it specifies amino acid changes with the older, HGVS, single letter codes and it carries examples of primary cancers and primary tissues, fields that are not in ClinVar. COSMIC's source table includes multiple records per mutation - one per submission. The COSMIC-Simple Variants table carries only includes one record per unique mutation- more than 3 million of them. These contents are copyright COSMIC	

Value	Display Name	Definition	Comment/ Usage Note	Status
			( <a href="http://cancer.sanger.ac.uk/cosmic/license">http://cancer.sanger.ac.uk/cosmic/license</a> ) LHC has produced a look up table for these records, and for users to look up particular mutation IDs with permission from COSMIC. However, interested parties must contact COSMIC for permission to download these records.	
COSMIC-Strc	COSMIC-Structural variants		COSMIC has divided structural variants into two tables one called structural variants and one called copy number variants, both kinds of which are carried in NCBIs dbVar table.	
CPTM	CPT Modifier Code		Available for the AMA at the address listed for CPT above. These codes are found in Appendix A of CPT 2000 Standard Edition. (CPT 2000 Standard Edition, American Medical Association, Chicago, IL).	
CST	COSTART		International coding system for adverse drug reactions. In the USA, maintained by the FDA, Rockville, MD.	
CVX	CDC Vaccine Codes		National Immunization Program, Centers for Disease Control and Prevention, 1660 Clifton Road, Atlanta, GA, 30333	
DAR	dataAbsentReason		HL7 International maintained code system to specify why the normally expected content of the data element is missing. <a href="https://terminology.hl7.org/CodeSystem-data-absent-reason.html">&lt;https://terminology.hl7.org/CodeSystem-data-absent-reason.html&gt;</a>	
dbVar-GL	dbVar-Germline		dbVar is NCBI's database of genomic structural variations (including copy number variants) that are larger than 50 contiguous base pairs. It is the complement of dbSNP, which only contains variants occurring in 50 or fewer contiguous base pairs. It contains insertions, deletions, duplications, inversions, multi-nucleotide substitutions, mobile element insertions, translocations, and complex chromosomal rearrangements.	
dbVar-som	dbVar-Somatic		dbVar is NCBI's database of genomic structural variations (including copy number variants) that are larger than 50 contiguous base pairs. It is the complement of dbSNP, which only contains variants occurring in 50 or fewer contiguous base pairs. It contains insertions, deletions, duplications, inversions, multi-nucleotide substitutions, mobile element insertions, translocations, and complex chromosomal rearrangements.	

<b>Value</b>	<b>Display Name</b>	<b>Definition</b>	<b>Comment/ Usage Note</b>	<b>Status</b>
DCM	DICOM Controlled Terminology		Codes defined in DICOM Content Mapping Resource. Digital Imaging and Communications in Medicine (DICOM). NEMA Publication PS-3.16 National Electrical Manufacturers Association (NEMA). Rosslyn, VA, 22209. Available at:	
E	EUCLIDES		Available from Euclides Foundation International nv, Excelsiorlaan 4A, B-1930 Zaventem, Belgium; Phone: 32 2 720 90 60.	
E5	Euclides quantity codes		Available from Euclides Foundation International nv (see above)	
E6	Euclides Lab method codes		Available from Euclides Foundation International nv, Excelsiorlaan 4A, B-1930 Zaventem, Belgium; Phone: 32 2 720 90 60.	
E7	Euclides Lab equipment codes		Available from Euclides Foundation International nv (see above)	
EDLEVEL	Education Level		For use in v2.x systems interoperating with V3 systems. Identical to the code system 2.16.840.1.113883.5.1077 EducationLevel in the Version 3 vocabulary.	
ensembl-G	Ensembl genomic reference sequence		Set of Ensembl genomic reference sequences whose identifiers have a prefix of "ENSG." It only includes genomic sequences associated with genes and uses the whole build plus the chromosome number to identify chromosome reference sequences, rather than a separate set of reference sequence identifier as NCBI does.	
Ensembl-P	Ensembl protein reference sequence		Set of Ensembl protein reference sequences. Their identifiers are distinguished by the prefix of "ENSP," and correspond to NCBI's "NP_" identifiers.	
ensembl-T	Ensembl transcript reference sequence		Set of reference sequences for transcripts of coding regions. Their identifiers all have a prefix of "ENST." There are parallels for most (if not all) of what is in Ensembl within NCBI. "ENST" parallels NCBI's "NM_" identifiers. In general, Ensembl takes its reference sequences directly from the build. NCBI adjusts its reference sequences by replacing known "mutations" with sequences that better reflect the population "normal".	
ENTITYCODE	Entity Code		For use in v2.x systems interoperating with V3 systems. Identical to the code system 2.16.840.1.113883.5.1060 EntityCode in the Version 3 vocabulary.	
ENTITYHDLG	Entity Handling Code		For use in v2.x systems interoperating with V3 systems. Identical to the code system 2.16.840.1.113883.5.42 EntityHandling in the Version 3 vocabulary.	

<b>Value</b>	<b>Display Name</b>	<b>Definition</b>	<b>Comment/ Usage Note</b>	<b>Status</b>
ENZC	Enzyme Codes		Enzyme Committee of the International Union of Biochemistry and Molecular Biology. Enzyme Nomenclature: Recommendations on the Nomenclature and Classification of Enzyme-Catalysed Reactions. London: Academic Press, 1992.	
EPASRS	EPA SRS		Subset of EPA SRS listing chemicals that are present in ECOTOX, STORET and TRI.	
FDAUNII	Unique Ingredient Identifier (UNII)		The Unique Ingredient Identifier (UNII) generated from the FDA Substance Registration System (SRS).	
FDDC	First DataBank Drug Codes		National Drug Data File. Proprietary product of First DataBank, Inc. (800) 633-3453, or <a href="http://www.firstdatabank.com">http://www.firstdatabank.com</a> .	
FDDX	First DataBank Diagnostic Codes		Used for drug-diagnosis interaction checking. Proprietary product of First DataBank, Inc. As above for FDDC.	
FDK	FDA K10		Dept. of Health & Human Services, Food & Drug Administration, Rockville, MD 20857. (device & analyte process codes).	
FIPS5_2	FIPS 5-2 (State)		Codes for the Identification of the States, the District of Columbia and the Outlying Areas of the United States, and Associated Areas.	
FIPS55_3	Populated Places (FIPS 55-3)		Codes for Named Populated Places, Primary County Divisions, and Other Locational Entities of the United States, Puerto Rico, and the Outlying Areas (without codes)	
FIPS6_4	FIPS 6-4 (County)		Federal Information Processing Standard (FIPS) 6-4 provides the names and codes that represent the counties and other entities treated as equivalent legal and/or statistical subdivisions of the 50 States, the District of Columbia, and the possessions and freely associated areas of the United States.

HB	HIBCC		Health Industry Business Communications Council, 5110 N. 40th St., Ste 120, Phoenix, AZ 85018.	
HCPCS	CMS (formerly HCFA) Common Procedure Coding System		HCPCS: contains codes for medical equipment, injectable drugs, transportation services, and other services not found in CPT4. <a href="http://www.cms.hhs.gov/MedHCPCSGenInfo/">http://www.cms.hhs.gov/MedHCPCSGenInfo/</a>	
HCPT	Health Care Provider Taxonomy		Formerly the responsibility of Workgroup 15 (Provider Information) within ANSI ASC X12N, all maintenance is now done by NUCC (turned over in 2001). Primary distribution is the responsibility of Washington Publishing Company, through its World Wide Web Site <a href="http://www.wpc-edi.com">http://www.wpc-edi.com</a> . Requests for new codes or changes may be done through the same website. For further information, NUCC may be contacted at: Stephanie Moncada, NUCC Secretary American Medical Association 515 N. State St. Chicago, IL 60610 Email: <a href="mailto:stephanie.moncada@ama-assn.org">stephanie.moncada@ama-assn.org</a>	
HGNC-Symb	HGNC-symb		The HGNC gene table carries the GENE ID, gene symbol and full gene name. The GENE ID is specific to the species. The gene symbol and name will be shared by all species with the same gene. The HGNC-Symb table carries only human genes. The code for this coding system is the HGNC gene code, the "name" or print string is the HGNC gene symbol. More than 28,000 human gene symbols and names have been assigned so far, but some human genes lack an HGNC code and symbol. These are mostly non protein coding genes.	

<b>Value</b>	<b>Display Name</b>	<b>Definition</b>	<b>Comment/ Usage Note</b>	<b>Status</b>
HGVS.c	HGVS- Transcript syntax		Syntax that describes variations (mutations) at the transcript (messenger RNA) level. The transcript syntax statements, which can describe simple and complex variants, are distinguished by a leading "c."	
HGVS.g	HGVS- Genomic syntax		Syntax that describes the variations (mutations) at the genome level (the DNA before it is spliced to remove introns). The genomic syntax statements are distinguished by a leading "g."	
HGVS.p	HGVS-Protein syntax		Syntax that specifies the variations (mutations) at the amino acid level, which is induced by underlying DNA variants. The protein change statements are distinguished by a leading "p."	
HHC	Home Health Care		Home Health Care Classification System; Virginia Saba, EdD, RN; Georgetown University School of Nursing; Washington, DC. Superceded by 'CCC' (see above); this entry is retained for backward-compatibility.	
HI	Health Outcomes		Health Outcomes Institute codes for outcome variables available (with responses) from Stratis Health (formerly Foundation for Health Care Evaluation and Health Outcomes Institute), 2901 Metro Drive, Suite 400, Bloomington, MN, 55425-1525; (612) 854-3306 (voice); (612) 853-8503 (fax); <a href="mailto:dziegen@winternet.com">dziegen@winternet.com</a> . See examples in the Implementation Guide.	
HL7nnnn	Health Level Seven defined table of codes, where nnnn is the HL7 table number. The number is four numeric digits as published in HL7 Version 2 chapter 2C. For example, HL70001.		The table value HL7nnnn is meant to restrict the value to the characters 'HL7' and four numeric digits e.g. HL70001 is valid, examples of invalid values include HL71, HL701, HL7001.	D
HOT	Japanese Nationwide Medicine Code			
HPC	CMS (formerly HCFA )Procedure Codes (HCPCS)		Health Care Financing Administration (HCFA) Common Procedure Coding System (HCPCS) including modifiers.[1]	
HSLOC	Healthcare Service Location		A comprehensive classification of locations and settings where healthcare services are provided. This code system is based on the	

<b>Value</b>	<b>Display Name</b>	<b>Definition</b>	<b>Comment/ Usage Note</b>	<b>Status</b>
			NHSN location code system that has been developed over a number of years through CDC's interaction with a variety of healthcare facilities and is intended to serve a variety of reporting needs where coding of healthcare service locations is required.	
I10	ICD-10		World Health Publications, Albany, NY.	
I10C	International Classification of Diseases, 10th Revision, Clinical Modification (ICD-10-CM)		ICD-10-CM is a clinical modification of the International Statistical Classification of Diseases and Related Health Problems, 10th revision (ICD-10) published by the United States for reporting diagnosis in morbidity settings. Additional information is available at: <a href="http://www.cdc.gov/nchs/icd/icd10cm.htm">http://www.cdc.gov/nchs/icd/icd10cm.htm</a> .	
I10G2004	ICD 10 Germany 2004		Three code sets exist I10G2004, I10G2005, I10G2006	D
I10G2005	ICD 10 Germany 2005		Three code sets exist I10G2004	D
I10G2006	ICD 10 Germany 2006		Three code sets exist I10G2004	
I10P	International Classification of Diseases, 10th Revision, Procedure Coding System (ICD-10-PCS)		ICD-10-PCS is a procedure classification published by the United States for classifying procedures performed in hospital inpatient health care settings. Additional information is available at: <a href="http://www.cms.gov/Medicare/Coding/ICD10/2013-ICD-10-PCS-GEMs.html">http://www.cms.gov/Medicare/Coding/ICD10/2013-ICD-10-PCS-GEMs.html</a> .	
I10PO	ICD-10 Place of Occurrence			
I9	ICD9		World Health Publications, Albany, NY.	
I9C	International Classification of Diseases, 9th Revision, Clinical Modification (ICD-9-CM)		ICD-9-CM is a clinical modification of the World Health Organization's 9th Revision, International Classification of Diseases (ICD-9). ICD-9-CM is the official system of assigning codes to diagnoses and procedures associated with healthcare utilization in the United States. Additional information is available at: <a href="http://www.cms.hhs.gov/ICD9ProviderDiagnosticCodes/08_ICD10.asp">http://www.cms.hhs.gov/ICD9ProviderDiagnosticCodes/08_ICD10.asp</a> .	
I9CDX	ICD-9CM Diagnosis codes		Indicates codes from ICD-9-CM drawn from Volumes 1 and 2, which cover diagnosis codes only.	
I9CP	ICD-9CM Procedure codes		Indicates codes from ICD-9-CM drawn from Volume 3, which covers procedure codes only.	
IBT	ISBT		Retained for backward compatibility only as of v 2.5. This code value has been superceded by the individual codes IBTnnnn	D

<b>Value</b>	<b>Display Name</b>	<b>Definition</b>	<b>Comment/ Usage Note</b>	<b>Status</b>
			(where nnn identifies a specific table in ISBT 128). Tables commencing with IBT are used in transfusion/transplantation and maintained by ICCBBA, PO Box 11309, San Bernardino, CA

ICDO	International Classification of Diseases for Oncology		International Classification of Diseases for Oncology, 2nd Edition. World Health Organization: Geneva, Switzerland, 1990. Order from: College of American Pathologists, 325 Waukegan Road, Northfield, IL, 60093-2750. (847) 446-8800.	
ICDO2	International Classification of Disease for Oncology Second Edition		<p>Percy C, VanHolten V, and Muir C, editors. International Classification of Diseases for Oncology. Second Edition. Geneva: World Health Organization; 1990.</p> <p>The ICD-9 neoplasm structure did not include morphology and there was a growing interest by physicians to establish a coding system for morphology. ICD-O is used in cancer registries (and other related areas) for coding the topography (site) and morphology of a neoplasm. The topography code uses similar categories as ICD-10 for malignant neoplasms allowing greater specificity for the site of non-malignant neoplasms than in ICD-10. The topography code consists of an alphabetic character (the letter C) followed by two numeric digits, a decimal point, and a numeric digit. The morphology code consists of a 6-digit numeric code which consists of three parts: histologic type (4-digit), behavior code (1-digit), and grading or differentiation (1-digit). ICD-O-2 is used for tumors diagnosed prior to 2001.</p>	
ICDO3	International Classification of Disease for Oncology Third Edition		<p>Fritz A, Percy C, Jack A, Shanmugaratnam K, Sabin L, Parkin D, et al, editors. International Classification of Diseases for Oncology. Third Edition. Geneva: World Health Organization; 2000.</p> <p>The ICD-9 neoplasm structure did not include morphology and there was a growing interest by physicians to establish a coding system for morphology. ICD-O is used in cancer registries (and other related areas) for coding the topography (site) and morphology of a neoplasm. The topography code uses similar categories as ICD-10 for malignant neoplasms allowing greater specificity for the site of non-malignant</p>

			neoplasms than in ICD-10. The topography code consists of an alphabetic character (the letter C) followed by two numeric digits, a decimal point, and a numeric digit. The morphology code consists of a 6-digit numeric code which consists of three parts: histologic type, behavior code, and grading or differentiation. In the third edition the morphology codes were revised, especially for leukemias and lymphomas. ICD-O-3 is used for tumors diagnosed in 2001 and later.	
ICF	International Classification of Functioning, Disability and Health (ICF)		ICF is a classification of those characteristics of health involving functional impairments, activity limitations, or participation restrictions that are often associated with disability. The ICF classification complements the World Health Organization's (WHO) International Classification of Diseases-10th Revision (ICD), which contains information on diagnosis and health condition, but not on functional status. The ICD and ICF constitute the core classifications in the WHO Family of International Classifications (WHO-FIC). Additional information is available at: <a href="http://www.cdc.gov/nchs/icd/icf.htm">http://www.cdc.gov/nchs/icd/icf.htm</a> .	
ICS	ICCS		Commission on Professional and Hospital Activities, 1968 Green Road, Ann Arbor, MI 48105.	
ICSD	International Classification of Sleep Disorders		International Classification of Sleep Disorders Diagnostic and Coding Manual, 1990, available from American Sleep Disorders Association, 604 Second Street SW, Rochester, MN 55902	
IHELAW	IHE Laboratory Analytical Workflow (LAW) Profile Codes.		The codes are part of the IHE LAW Profile, and it will be published as part of the IHE Laboratory Technical Framework. The technical framework documents can be found with the following link: <a href="http://www.ihe.net/Technical_Frameworks/#laboratory">http://www.ihe.net/Technical_Frameworks/#laboratory</a>	
ISCN	International System for Human Cytogenetic Nomenclature (ISCN)		The International System for Human Cytogenetic Nomenclature (ISCN) has served as the central reference for describing the human chromosome complement.	
ISO+	ISO 2955.83 (units of measure) with HL7 extensions		See chapter 7, section 7.4.2.6	

<b>Value</b>	<b>Display Name</b>	<b>Definition</b>	<b>Comment/ Usage Note</b>	<b>Status</b>
ISO	ISO 2955.83 (units of measure) with HL7 extensions		See chapter 7, section 7.4.2.6	
ISO3166_1	ISO 3166-1 Country Codes		International Standards Organization standard 3166 contains 3 parts. Part 1 contains three tables for codes for countries of the world. These are 2-character alphabetic, 3-character alphabetic, and numeric codes.	
ISO3166_2	ISO 3166-2 Country subdivisions		International Standards Organization standard 3166 contains 3 parts. Part 2 contains a complete breakdown into a relevant level of administrative subdivisions of all countries listed in ISO 3166-1. The code elements used consist of the alpha-2 code element from ISO 3166-1 followed by a separator and a further string of up to three alphanumeric characters e. g. DK-025 for the Danish county Roskilde.	
ISO4217	ISO4217 Currency Codes		ISO's currency codes, which are based on the ISO country codes are published in the standard ISO 4217:2008 Codes for the representation of currencies and funds. This International Standard specifies the structure for a three-letter alphabetic code and an equivalent three-digit numeric code for the representation of currencies and funds. For those currencies having minor units, it also shows the decimal relationship between such units and the currency itself.	
ISO639	ISO 639 Language		International Standards Organization codes for the representation of names of languages. ISO 639 provides two sets of language codes, one as a two-character code set (639-1) and another as a three-character code set (639-2) for the representation of names of languages. ISO 639-3, Codes for the representation of names of languages - Part 3: Alpha-3 code for comprehensive coverage of languages, is a code list that aims to define three-letter identifiers for all known human languages.	
ISOnnnn	ISO Defined Codes where nnnn is the ISO table number. (deprecated)		International Standards Organization tables. This has been deprecated since the ISO numbered standards are not the same as tables, and there are no "ISO table numbers". Some standards contain tables of values, and some contain more than one table. In the future, specific tables of values drawn from ISO standards will have explicit entries here in table 0396. Use the	D

<b>Value</b>	<b>Display Name</b>	<b>Definition</b>	<b>Comment/ Usage Note</b>	<b>Status</b>
			specific entries for identified tables instead of this one.	
ITIS	Integrated Taxonomic Information System		This is a taxonomic hierarchy for living organisms.	
IUPC	IUPAC/IFCC Component Codes		Codes used by IUPAC/IFF to identify the component (analyte) measured. Contact Henrik Olesen, as above for IUPP.	
IUPP	IUPAC/IFCC Property Codes		International Union of Pure and Applied Chemistry/International Federation of Clinical Chemistry. The Silver Book: Compendium of terminology and nomenclature of properties in clinical laboratory sciences. Oxford: Blackwell Scientific Publishers, 1995. Henrik Olesen, M.D., D.M.Sc., Chairperson, Department of Clinical Chemistry, KK76.4.2, Rigshospitalet, University Hospital of Copenhagen, DK-2200, Copenhagen. <a href="http://inet.uni-c.dk/~qukb7642/">http://inet.uni-c.dk/~qukb7642/</a>	
JC10	JLAC/JSLM, nationwide laboratory code		Source: Classification & Coding for Clinical Laboratory. Japanese Society of Laboratory Medicine(JSLM, Old:Japan Society of Clinical Pathology). Version 10, 1997. A multiaxial code including a analyte code (e.g., Rubella = 5f395), identification code (e.g., virus ab IGG=1431), a specimen code (e.g., serum =023) and a method code (e.g., ELISA = 022)	
JC8	Japanese Chemistry		Clinical examination classification code. Japan Association of Clinical Pathology. Version 8, 1990. A multiaxial code including a subject code (e.g., Rubella = 5f395, identification code (e.g., virus ab IGG), a specimen code (e.g., serum =023) and a method code (e.g., ELISA = 022)	
JJ1017	Japanese Image Examination Cache			
L	Local general code for a site-defined code system used for a specific set of trading partners. The 'zzz' SHALL be any printable ASCII string. Length of the name SHALL not exceed field width, and is subject to local implementation.		The 'zzz' may be any printable ASCII string of variable length, but the recommendation is to generally use only numbers and uppercase letters, as that is how all of the currently existent table 396 entries have been created for many years. In addition, there is no explicit length restriction, but it is recommended that the string be kept below a 20 character maximum.	

<b>Value</b>	<b>Display Name</b>	<b>Definition</b>	<b>Comment/ Usage Note</b>	<b>Status</b>
LANGUAL	LangualL		LangualL stands for "Langua aLimentaria" or "language of food" LangualL is a multilingual thesaural system using faceted classification about food. Terms reprinted in PHIN VADS will be limited to the English language version.	
LB	Local billing code		Local billing codes/names (with extensions if needed).	
LN	Logical Observation Identifier Names and Codes (LOINC®)		<p>Logical Observation Identifiers Names and Codes (LOINC®) provides a set of universal codes and names for identifying laboratory and other clinical observations. One of the main goals of LOINC is to facilitate the exchange and pooling of results for clinical care, outcomes management, and research. LOINC was initiated by Regenstrief Institute research scientists who continue to develop it with the collaboration of the LOINC Committee. The LOINC table, LOINC codes, and LOINC panels and forms file are copyright © 1995-2011, Regenstrief Institute, Inc. and the LOINC Committee and available at no cost (<a href="http://loinc.org">http://loinc.org</a>) under the license at <a href="http://loinc.org/terms-of-use">http://loinc.org/terms-of-use</a>.</p> <p>The laboratory portion of the LOINC database contains the usual clinical laboratory categories of chemistry, hematology, serology, microbiology (including parasitology and virology), toxicology; as well as categories for drugs and the cell counts, antibiotic susceptibilities, and more. The clinical portion of the LOINC database includes entries for vital signs, hemodynamics, intake/output, EKG, obstetric ultrasound, cardiac echo, radiology report titles, pulmonary ventilator management, document and section titles, patient assessment instruments (e.g. Glasgow Coma Score, PHQ-9 depression scale, CMS-required patient assessment instruments), and other clinical observations.</p>	
LRG-RefSeq	Locus Reference Genomic (LRG)		<p>LRG is a manually curated record that contains stable and thus, un-versioned reference sequences designed specifically for reporting sequence variants with clinical implications.</p> <p>It provides a genomic DNA sequence representation of a single gene that is</p>	

<b>Value</b>	<b>Display Name</b>	<b>Definition</b>	<b>Comment/ Usage Note</b>	<b>Status</b>
			idealized, has a permanent ID (with no versioning), and core content that never changes. Their database includes maps to NCBI, Ensembl and USCS reference sequences.	
MCD	Medicaid		Medicaid billing codes/names.	
MCR	Medicare		Medicare billing codes/names.	
MDC	Medical Device Communication		EN ISO/IEEE 11073-10101 Health informatics – Point-of-care medical device communication - Nomenclature	
MDDX	Medispan Diagnostic Codes		Codes Used for drug-diagnosis interaction checking. Proprietary product. Hierarchical drug codes for identifying drugs down to manufacturer and pill size. MediSpan, Inc., 8425 Woodfield Crossing Boulevard, Indianapolis, IN 46240. Tel: (800) 428-4495. URL: <a href="http://www.medispan.com/Products/index.aspx?cat=1">http://www.medispan.com/Products/index.aspx?cat=1</a> . As above for MGPI.	
MEDC	Medical Economics Drug Codes		Proprietary Codes for identifying drugs. Proprietary product of Medical Economics Data, Inc. (800) 223-0581.	
Medgen-Dis	NCBI MedGen disease subset		MedGen-disease is a subset disease concepts (about 20,000 as of January 2016) taken from the MedGEN table. It includes most known genetic and clinical diseases.	
MEDIATYPE	MIME Media Type IANA		Encoding as defined by MIME (Multipurpose Internet Mail Extensions)	
MEDR	Medical Dictionary for Drug Regulatory Affairs (MEDDRA)		Patrick Revelle, Director MSSO 12011 Sunset Hills Road, VAR1/7B52 Reston, VA 20190 <a href="mailto:Patrick.Revelle@ngc.com">Patrick.Revelle@ngc.com</a> <a href="http://www.meddramsso.com/MSSOWeb/index.htm">http://www.meddramsso.com/MSSOWeb/index.htm</a>	
MEDX	Medical Economics Diagnostic Codes		Used for drug-diagnosis interaction checking. Proprietary product of Medical Economics Data, Inc. (800) 223-0581.	
MGPI	Medispan GPI		Medispan hierarchical drug codes for identifying drugs down to manufacturer and pill size. Proprietary product of MediSpan, Inc., 8425 Woodfield Crossing Boulevard, Indianapolis, IN 46240. Tel: (800) 428-4495.	
MVX	CDC Vaccine Manufacturer Codes		As above, for CVX	
NAICS	Industry (NAICS)		The North American Industry Classification System (NAICS) consists of a set of six digit codes that classify and categorize industries. It also organizes the categories on a production/process-oriented basis.	

Value	Display Name	Definition	Comment/ Usage Note	Status
			This new, uniform, industry-wide classification system has been designed as the index for statistical reporting of all economic activities of the U.S., Canada, and Mexico. Mapping is available between SIC 1987 and NAICS 2002 codes at U.S. Census Bureau website. Mapping is also available between NAICS 2002 and NAICS 2007 at U.S. Census Bureau website	
NCPDPnnnnsss	NCPDP code list for data element nnnn [as used in segment sss]		<p>NCPDP maintain code list associated with the specified Data Element (nnnn) and Segment (sss). The Segment portion is optional if there is no specialization of the Data Element codes between segments.</p> <p>Examples:</p> <ul style="list-style-type: none"> <li>NCPDP1131RES = code set defined for NCPDP data element 1131 as used in the RES segment (Code List Qualifier – Response Code)</li> <li>NCPDP1131STS = code set defined for NCPDP data element 1131 as used in the STS segment (Code List Qualifier – Reject Code)</li> <li>NCPDP9701 = code set defined for NCPDP data element 9701 (Individual Relationship, Coded). No specialization to a segment exists for this data element.</li> </ul> <p>National Council for Prescription Drug Programs, 924Ø East Raintree Drive, Scottsdale, AZ 8526Ø.  Phone: (48Ø) 477-1ØØØ  Fax: (48Ø) 767-1Ø42  e-mail: ncpdp@ncpdp.org  www.ncpdp.org</p>	D
NDA	NANDA		North American Nursing Diagnosis Association, Philadelphia, PA.	
NDC	National drug codes		These provide unique codes for each distinct drug, dosing form, manufacturer, and packaging. (Available from the National Drug Code Directory, FDA, Rockville, MD, and other sources.)	
NDFRT	NDF-RT (Drug Classification)		The National Drug File RT (NDF-RT) is published by the US Veterans' Administration (VA). NDF-RT covers clinical drugs used at the VA. The NCI version of NDF-RT is used by NCI to provide automated terminology access to the Food and Drug Administration (FDA) Structured Product Label (SPL) initiative.	

<b>Value</b>	<b>Display Name</b>	<b>Definition</b>	<b>Comment/ Usage Note</b>	<b>Status</b>
NIC	Nursing Interventions Classification		Iowa Intervention Project, College of Nursing, University of Iowa, Iowa City, Iowa	
NIP001	Source of Information (Immunization)		CDC National Immunization Program's (NIP) defined table to be used in HL7 2.x message RXA-9 for documenting the source of information regarding immunization. E.g. From school, provider, public health agency.	
NIP002	Substance refusal reason		CDC National Immunization Program's (NIP) defined table to be used in HL7 2.x message RXA-18 for substance refusal reason (reasons for not having vaccination). E.g. Religious exemption, parental decision	
NIP004	Vaccination - Contraindications, Precautions, and Immunities		CDC National Immunization Program's (NIP) defined table for vaccine contraindications and precautions. E.g. Allergy to egg ingestion, thimerosol	
NIP007	Vaccinated at location (facility)		CDC National Immunization Program's (NIP) defined table for vaccinated at location (facility). E.g. Private doctor's office, Public Health Clinic	
NIP008	Vaccine purchased with (Type of funding)		CDC National Immunization Program's (NIP) defined table enumerates the type of funds used for purchasing vaccine. E.g. Public funds, Military funds	
NIP009	Reported adverse event previously		CDC National Immunization Program's (NIP) defined table enumerates the authorities to whom the vaccination related adverse events were previously reported. E.g. To health department, To manufacturer	
NIP010	VAERS Report type		CDC National Immunization Program's (NIP) defined table enumerates the type of report used in VAERS (Vaccination Adverse Event Reporting System). E.g. Initial, Follow-up	
NND	Notifiable Event (Disease/Condition) Code List		List of notifiable events, which includes infectious and non-infectious disease or conditions. This list includes events that are notifiable at the state and national level.	
NPI	National Provider Identifier		Health Care Finance Administration, US Dept. of Health and Human Services, 7500 Security Blvd., Baltimore, MD 21244.	
NUBC	National Uniform Billing Committee Code		<a href="http://www.nubc.org/">http://www.nubc.org/</a>	
NULLFL	Flavors of NULL		System of coded values for Flavors of Null, as used in HL7 Version 3 standards. Identical to the HL7 version 3 coding system 2.16.840.1.113883.5.1008 NullFlavor

PHDSCSOPT	Source of Payment Typology		The Source of Payment Typology was developed and is maintained by the Public Health Data Standards Consortium's Payer Type Subcommittee. The purpose of the Payer Typology Subcommittee is to create and refine a standard to allow consistent reporting of payer data to public health agencies for health care services and research.	
PHINQUESTION	CDC Public Health Information Network (PHIN) Question		CDC Public Health Questions used in HL7 Message as observation identifiers. These question or observation identifiers are used in CDC's message implementation guides and will be passed in HL7 OBX-3 or Observation.Code	
PLR	CDC PHLIP Lab result codes that are not covered in SNOMED at the time of this implementation		APHL CDC co-sponsored PHLIP	
PLT	CDC PHLIP Lab test codes, where LOINC concept is too broad or not yet available, especially as needed for ordering and or lab to lab reporting )		APHL CDC co-sponsored PHLIP	
POS	POS Codes		HCFA Place of Service Codes for Professional Claims (see <a href="http://www.cms.hhs.gov/PlaceofServiceCodes/">http://www.cms.hhs.gov/PlaceofServiceCodes/</a> ).	
PRTCPTNMODE	Paticipation Mode Code		For use in v2.x systems interoperating with V3 systems. Identical to the code system 2.16.840.1.113883.5.1064 ParticipationMode in the Version 3 vocabulary.	
RC	Read Classification		The Read Clinical Classification of Medicine, Park View Surgery, 26 Leicester Rd., Loughborough LE11 2AG (includes drug procedure and other codes, as well as diagnostic codes).	
refSeq-G	NCBI - genomic and chromosome reference sequences		Subset of NLM Human RefSeqs with prefix of "NG_ or NC_". Those prefixed with "NC_" represent the whole genomic RefSeq for individual chromosomes. Those prefixed with "NG_" represent genes with all of their introns and	

<b>Value</b>	<b>Display Name</b>	<b>Definition</b>	<b>Comment/ Usage Note</b>	<b>Status</b>
			flanking regions and other larger or smaller genomic sequences.	
RefSeq-P	NCBI - protein reference sequence		Reference sequences for proteins. Not commonly reported because Amino acid changes can be computed directly from DNA changes based on transcript reference sequence. However some fields are interested only in the protein sequence change, and proteins can be sequenced independently of DNA sequencing.	
refSeq-T	NCBI-transcript reference sequences (RefSeq)		Subset of NLM RefSeq records with prefix of "NM_" are reference sequences that represent messenger RNA.	
ROLECLASS	Used initially for contact roles.		For use in v2.x systems interoperating with V3 systems. Identical to the code system 2.16.840.1.113883.5.110 RoleCode in the Version 3 vocabulary.	
ROLECODE	Participation Mode		For use in v2.x systems interoperating with V3 systems. Identical to the code system 2.16.840.1.113883.5.111 RoleCode in the Version 3 vocabulary.	
RSPMODE	Specifies the mode, immediate versus deferred or queued, by which a receiver should communicate its receiver responsibilities.		V3 coding system, available in RIM download materials.	
RXNORM	RxNorm		RxNorm provides standard names for clinical drugs (active ingredient + strength + dose form) and for dose forms as administered to a patient. It provides links from clinical drugs, both branded and generic, to their active ingredients, drug components (active ingredient + strength), and related brand names. NDCs (National Drug Codes) for specific drug products (where there are often many NDC codes for a single product) are linked to that product in RxNorm. RxNorm links its names to many of the drug vocabularies commonly used in pharmacy management and drug interaction software, including those of First Databank, Micromedex, MediSpan, and Multum. By providing links between these vocabularies, RxNorm can mediate messages between systems not using the same software and vocabulary. RxNorm is one of a suite of designated standards for use in U.S. Federal Government systems for	

<b>Value</b>	<b>Display Name</b>	<b>Definition</b>	<b>Comment/ Usage Note</b>	<b>Status</b>
			the electronic exchange of clinical health information.	
RxT-Ingrd	RxTerms-Ingredients Subset		RxT-Ingrd is a specialization of the RxNorm database that includes the ingredients in RxTerms except allergens (used for allergy testing), combination ingredients, and inactive ingredients. The subset is designed for identifying drugs that might be the focus of pharmacogenetic testing.	
SCT	SNOMED Clinical Terms		SNOMED-CT concept identifier codes. SNOMED International, I325 Waukegan Rd, Northfield, IL, 60093, +1 800-323-4040, mailto:snomed@cap.org <a href="http://www.snomed.org">http://www.snomed.org</a>	
SCT2	SNOMED Clinical Terms alphanumeric codes		Used to indicate that the code value is the legacy-style SNOMED alphanumeric codes, rather than the concept identifier codes. SNOMED International, I325 Waukegan Rd, Northfield, IL, 60093, +1 800-323-4040, mailto:snomed@cap.org <a href="http://www.snomed.org">http://www.snomed.org</a>	
SDM	SNOMED- DICOM Microglossary		College of American Pathologists, Skokie, IL, 60077-1034. (formerly designated as 99SDM).	
SIC	Industry (SIC)		Standard Industry Classification - 1987. Use NAICS 2002. This is mainly for mapping and backward compatibility purposes.	
SNM	Systemized Nomenclature of Medicine (SNOMED)		Systemized Nomenclature of Medicine, 2nd Edition 1984 Vols 1, 2, College of American Pathologists, Skokie, IL.	
SNM3	SNOMED International		SNOMED International, 1993 Vols 1-4, College of American Pathologists, Skokie, IL, 60077-1034.	
SNT	SNOMED topology codes (anatomic sites)		College of American Pathologists, 5202 Old Orchard Road, Skokie, IL 60077-1034.	
SOC	Occupation (SOC 2000)		The 2000 Standard Occupational Classification (SOC) system is used by Federal statistical agencies to classify workers into occupational categories for the purpose of collecting, calculating, or disseminating data.	
SPCU	Sex Parameter For Clinical Use		HL7 International maintained code system for parameter values that provide guidance on how a receiver should apply settings or reference ranges that are derived from observable information such as an organ inventory, recent hormone lab tests, genetic testing, menstrual status, obstetric history, etc.	

<b>Value</b>	<b>Display Name</b>	<b>Definition</b>	<b>Comment/ Usage Note</b>	<b>Status</b>

	recipient of a vaccination. This code system contains codes that identify the document type and the owner of the document.		stem.action?id=2.16.840.1.113883.6.304 and at <a href="http://www.cdc.gov/phin/activities/vocabulary.html">http://www.cdc.gov/phin/activities/vocabulary.html</a> .	
W1	WHO record # drug codes (6 digit)		World Health organization record number code. A unique sequential number is assigned to each unique single component drug and to each multi-component drug. Eight digits are allotted to each such code, six to identify the active agent, and 2 to identify the salt, of single content drugs. Six digits are assigned to each unique combination of drugs in a dispensing unit. The six digit code is identified by W1, the 8 digit code by W2.	
W2	WHO record # drug codes (8 digit)		World Health organization record number code. A unique sequential number is assigned to each unique single component drug and to each multi-component drug. Eight digits are allotted to each such code, six to identify the active agent, and 2 to identify the salt, of single content drugs. Six digits are assigned to each unique combination of drugs in a dispensing unit. The six digit code is identified by W1, the 8 digit code by W2.	
W4	WHO record # code with ASTM extension		With ASTM extensions (see Implementation Guide), the WHO codes can be used to report serum (and other) levels, patient compliance with drug usage instructions, average daily doses and more (see Appendix X1 the Implementation Guide).	
WC	WHO ATC		WHO's ATC codes provide a hierarchical classification of drugs by therapeutic class. They are linked to the record number codes listed above.	
X12DEnnnn	ASC X12 Code List nnnn		Code list associated with X12 Data Element nnnn. Example:: X12DE738 – code set defined for X12 data element 738 (Measurement Qualifier)  The Accredited Standards Committee (ASC) X12  <a href="http://www.x12.org">www.x12.org</a>	D

0430- Mode of Arrival Code

#### Concept Domain Information

Concept Domain Name	DOM: 430
SymbolicName	ModeOfArrivalCode
Description	The domain of possible values specifying how the patient was brought to the healthcare facility.
Concept Domain Only	no

#### Code System Identification Information

Code System OID	2.16.840.1.113883.18.271
SymbolicName	arrivalMode
Description	Code system of concepts specifying how the patient was brought to the healthcare facility. Used in HL7 Version 2.x messaging in the PV2 segment.
Full Name	Mode of Arrival Code Code System
URI	<a href="http://terminology.hl7.org/CodeSystem/v2-0430">http://terminology.hl7.org/CodeSystem/v2-0430</a>

#### Code System Version Information

Effective Date	01.11.2000
Version	1
HL7 Version Introduced	2.4

#### Value Set Information

Value Set OID	2.16.840.1.113883.21.287
SymbolicName	hl7VS-modeOfArrivalCode
Description	Value Set of codes specifying how the patient was brought to the healthcare facility.
Full Name	Mode of Arrival Code Value Set

### Table 0440 Coded Content

Value	Display Name	Definition	Comment/ Usage Note	Status
AD	Address		WITHDRAWN	D
AUI	Authorization information		Replaces the CM data type used in sections 6.5.6.14 IN1-14, as of v 2.5.	
CCD	Charge code and date		Replaces the CM data type used in section 4.5.2.1 BLG-1, as of v 2.5.	
CCP	Channel calibration parameters		Replaces the CM data type used in 7.14.1.5 OBX-5.3 where OBX-5Observation value (*) is data type CD as of v 2.5.	
CD	Channel definition		For waveform data only;.	
CE	Coded element		WITHDRAWN	D
CF	Coded element with formatted values			
CK	Composite ID with check digit		WITHDRAWN	D
CM	Composite		WITHDRAWN Replaced by numerous new unambiguous data types in v 2.5	D
CN	Composite ID number and name		WITHDRAWN. Replaced by XCN as of v 2.3	D
CNE	Coded with no exceptions			
CNN	Composite ID number and name simplified		Restores the original data type CN as was initially implementable in the CM used in sections 4.5.3.32 and 7.4.1.32-(OBR-32), 4.5.3.33 and 7.4.1.33 - (OBR-33) 4.5.3.34 and 7.4.1.34 - (OBR-34) 4.5.3.35 and 7.4.1.35 - (OBR-35). Components 7 and 8, however, have been promoted to data type IS to be consistent with current practice without violating backward compatibility.	
CP	Composite price		.	
CQ	Composite quantity with units		CQ cannot be legally expressed when embedded within another data type. Its use is constrained to a segment field.	
CSU	Channel sensitivity and units		Replaces the CM data type used in 7.14.1.5 OBX-5.3 where OBX-5Observation value (*) is data type CD as of v 2.5.	D

<b>Value</b>	<b>Display Name</b>	<b>Definition</b>	<b>Comment/ Usage Note</b>	<b>Status</b>
CWE	Coded with exceptions			
CX	Extended composite ID with check digit			
DDI	Daily deductible information		Replaces the CM data type used in section 6.5.7.30 IN2-30, as of v 2.5.	
DIN	Date and institution name		Replaces the CM data type used in sections 15.4.6.12 STF-12 and 15.4.6.14 STF-13, as of v 2.5.	
DLD	Discharge to location and date		Replaces the CM data type used in section 8.8.4.9 - OM2-9, as of v 2.5	
DLN	Driver's license number			
DLT	Delta			
DR	Date/time range			
DT	Date			
DTM	Date/time			
DTN	Day type and number		Replaces the CM data type used in section 6.5.8.11 IN3-11, as of v 2.5.	
ED	Encapsulated data		Supports ASCII MIME-encoding of binary data.	
EI	Entity identifier			
EIP	Entity identifier pair		Replaces the CM data type used in sections 4.5.1.8 - ORC-8, 4.5.3.29 - OBR-29, 7.3.1.29 - OBR-29, as of v 2.5.	
ELD	Error location and description		WITHDRAWN	D
ERL	Error location			
FC	Financial class			
FN	Family name		Appears ONLY in the PPN, XCN, and XPN.	
FT	Formatted text			
GTS	General timing specification			
HD	Hierachic designator			
ICD	Insurance certification definition		Replaces the CM data type used in section 6.5.8.20 IN3-20, as of v 2.5.	
ID	Coded values for HL7 tables			
IS	Coded value for user-defined tables			
JCC	Job code/class			
LA1	Location with address variation 1		Datatype has been withdrawn from the Standard; the segments RXO-8 and RXE-8 were deprecated, and kept for backward compatibility only as of v2.5, and as of v2.9 they have been withdrawn so the code for the datatype is here marked as backwards-compatible use (for historical records only)	D
LA2	Location with address variation 2		Datatype has been withdrawn from the Standard; the segments RXD-13, RXG-11 and RXA-11 were deprecated, and kept	D

Value	Display Name	Definition	Comment/ Usage Note	Status
			for backward compatibility only as of v2.5, and as of v2.9 they have been withdrawn so the code for the datatype is here marked as backwards-compatible use (for historical records only)	
MA	Multiplexed array		For waveform data only	
MO	Money			
MOC	Money and charge code		Replaces the CM data type used in sections 4.5.3.23 OBR-23 and 7.4.1.23-OBR-23 as of v 2.5.	
MOP	Money or percentage		Replaces the CM data type used in section 6.5.8.5 IN3-5, as of v 2.5. This data type is restricted to this field.	
MSG	Message type		Replaces the CM data type used in 2.16.9.9 MSH-9 as of v 2.5.	
NA	Numeric array		For waveform data only	
NDL	Name with date and location		Replaces the CM data type used in sections 4.5.3.32 and 7.4.1.32-( OBR-32) , 4.5.3.33 and 7.4.1.33 - ( OBR-33) 4.5.3.34 and 7.4.1.34 - ( OBR-34) 4.5.3.35 and 7.4.1.35 - ( OBR-35) as of v 2.5.	
NM	Numeric			
NR	Numeric range		Replaces the CM data type used in sections 8.8.4.6.1- OM2-6.1, 8.8.4.6.3- OM2-6.3and 8.8.4.6.4- OM2-6.4, as of v 2.5.	
OCD	Occurrence code and date		Replaces the CM data type used in sections 6.5.10.10 UB1-16 and 6.5.11.7 UB2-7, as of v 2.5.	
OSD	Order sequence definition		WITHDRAWN	D
OSP	Occurrence span code and date		Replaces the CM data type used in section 6.5.11.8 UB2-8, as of v 2.5.	
PIP	Practitioner institutional privileges		Replaces the CM data type used in 15.4.5.7 PRA-7 as of v 2.5.	
PL	Person location			
PLN	Practitioner license or other ID number		Replaces the CM data type used in 15.4.5.6 PRA-6, 11.6.3.7 PRD-7 and 11.6.4.7 CTD-7 as of v 2.5.	
PN	Person name		WITHDRAWN	D
PPN	Performing person time stamp		equivalent of an XCN joined with a TS	
PRL	Parent result link		Replaces the CM data type used in sections 4.5.3.26 - OBR-26 and 7.4.1.26 - OBR-26 as of v 2.5.	
PT	Processing type			
PTA	Policy type and amount		Replaces the CM data type used in section 6.5.7.29 IN2-29, as of v 2.5.	
QIP	Query input parameter list			

<b>Value</b>	<b>Display Name</b>	<b>Definition</b>	<b>Comment/ Usage Note</b>	<b>Status</b>
QSC	Query selection criteria			
RCD	Row column definition			
RFR	Reference range		Replaces the CM data type used in sections 8.8.4.6 - OM2-6, 8.8.4.7 - OM2-7 and 8.8.4.8 - OM2-8 as of v 2.5.	
RI	Repeat interval			
RMC	Room coverage		Replaces the CM data type used in section 6.5.7.28 IN2-28, as of v 2.5.	
RP	Reference pointer			
RPT	Repeat pattern			
SAD	Street Address		Appears ONLY in the XAD data type.	
SCV	Scheduling class value pair		For scheduling data only. See Chapter 10	
SI	Sequence ID			
SN	Structured numeric			
SNM	String of telephone number digits		Definition: a string whose characters are limited to "+" and the decimal digits 0 through 9. As a string, leading zeros are always considered significant. Maximum length: Not specified for the type. May be specified in the context of use.	
SPD	Specialty description		Replaces the CM data type used in 15.4.5.5 PRA-5 as of v 2.5.	
SPS	Specimen source		WITHDRAWN	D
SRT	Sort order			
ST	String data			
TM	Time			
TN	Telephone number		WITHDRAWN	D
TQ	Timing/quantity		WITHDRAWN	D
TS	Time stamp		WITHDRAWN	D
TX	Text data			
UVC	UB value code and amount		Replaces the CM data type used in sections 6.5.10.10 UB1-10 and 6.5.11.6 UB2-6, as of v 2.5.	
VH	Visiting hours			
VID	Version identifier			
VR	Value range		Replaces the CM data type used in 5.10.5.3.11 QRD-11 as of v 2.5.	
WVI	Channel Identifier		Replaces the CM data type used in 7.14.1.3.1 OBX-5.1 where OBX-5 Observation value (*) is data type CD as of v 2.5.	
WVS	Waveform source		Replaces the CM data type used in 7.14.1.4 OBX-5.2 where OBX-5 Observation value (*) is data type CD as of v 2.5.	
XAD	Extended address		Replaces AD as of v 2.3	
XCN	Extended composite ID number and name for persons		Replaces CN as of v 2.3	

Value	Display Name	Definition	Comment/ Usage Note	Status
XON	Extended composite name and ID number for organizations			
XPN	Extended person name		Replaces PN as of v 2.3.	
XTN	Extended telecommunications number		Replaces TN as of v 2.3	

#### 0441- Immunization Registry Status

##### Concept Domain Information

Concept Domain Name	DOM: 441
SymbolicName	ImmunizationRegistryStatus
Description	The domain of possible values for the immunization registry status of the patient.
Concept Domain Only	no

##### Code System Identification Information

Code System OID	2.16.840.1.113883.18.281
SymbolicName	immunizationRegistryStatus
Description	Code system of concepts specifying the immunization registry status of the patient. Used in HL7 Version 2.x messaging in the PD1 segment.
Full Name	Immunization Registry Status Code System

#### Code System Identification Information

<b>Code System OID</b>	2.16.840.1.113883.6.301.10
<b>SymbolicName</b>	cms-OCEModifierEditCode-cs
<b>Description</b>	<p>The OPPS functionality of the Integrated Outpatient Code Editor (I/OCE) software was developed for the implementation of the Medicare outpatient prospective payment system mandated by the 1997 Balanced Budget Act. CMS released the proposed OPPS rules using the Ambulatory Payment Classification (APC) system in the September 8, 1998 Federal Register. Final regulations were published in the April 7, 2000 Federal Register and the system became effective for Medicare on August 1, 2000. Used in HL7 Version 2.x messaging in the GP1 segment.</p> <p>The APC-based OPPS developed by CMS is the outpatient equivalent of the inpatient, DRG-based PPS. The APC system establishes groups of covered services so that the services within each group are comparable clinically and with respect to the use of resources.</p> <p>Hospitals are required to use HCPCS when billing for outpatient services.</p>

	<p>The OCE not only identifies individual errors but also indicates what actions should be taken and the reasons why these actions are necessary. In order to accommodate this functionality, the OCE is structured to return lists of edit numbers. This structure facilitates the linkage between the actions being taken, the reasons for the actions and the information on the claim (e.g., a specific diagnosis) that caused the action.</p> <p>In general, the OCE performs all functions that require specific reference to HCPCS codes, HCPCS modifiers and ICD-10-CM diagnosis codes (ICD-9-CM diagnosis codes for historical claims with From Dates prior to 10/1/2015). Since these coding systems are complex and annually updated, the centralization of the direct reference to these codes and modifiers in a single program reduces effort and reduces the chance of inconsistent processing.</p> <p>This is a CMS maintained list of edits: Please see the following for additional information:</p> <ul style="list-style-type: none"> <li>• <a href="https://www.cms.gov/Medicare/Coding/OutpatientCodeEdit/index.html">https://www.cms.gov/Medicare/Coding/OutpatientCodeEdit/index.html</a></li> <li>• <a href="https://www.cms.gov/Medicare/Coding/OutpatientCodeEdit/Background.html">https://www.cms.gov/Medicare/Coding/OutpatientCodeEdit/Background.html</a></li> <li>• <a href="https://www.cms.gov/Medicare/Coding/OutpatientCodeEdit/OCEQtrReleaseSpecs.html">https://www.cms.gov/Medicare/Coding/OutpatientCodeEdit/OCEQtrReleaseSpecs.html</a></li> </ul>

<b>Table</b>	0472
<b>Table OID</b>	2.16.840.1.113883.12.472
<b>SymbolicName</b>	TQ Conjunction ID
<b>Description</b>	HL7-defined table of codes specifying that a second timing specification is to follow using the repeat delimiter.
<b>Type</b>	HL7
<b>Steward</b>	OO
<b>where used</b>	TQ1-12
<b>HL7 Version Introduced</b>	2.4

**Table 0472 Coded Content**

Value	Display Name	Definition	Comment/ Usage Note	Status
S	Synchronous		Do the next specification after this one (unless otherwise constrained by the following fields: TQ1-7-start date/time and TQ1-8-end date/time). An "S" specification implies that the second timing sequence follows the first, e.g., when a service request is written to measure blood pressure Q15 minutes for the 1st hour, then every 2 hours for the next day.	
A	Asynchronous		Do the next specification in parallel with this one (unless otherwise constrained by the following fields: TQ1-7-start date/time and TQ1-8-end date/time). The conjunction of "A" specifies two parallel instructions, as are sometimes used in medication, e.g., prednisone given at 1 tab on Monday, Wednesday, Friday, and at 1/2 tab on Tuesday, Thursday, Saturday, Sunday.	
C	Actuation Time		It will be followed by a completion time for the service. This code allows one to distinguish between the time and priority at which a service should be actuated (e.g., blood should be drawn) and the time and priority at which a service should be completed (e.g., results should be reported).	

#### 0473- Formulary Status

### Table Metadata

<b>Table</b>	0485
<b>Table OID</b>	2.16.840.1.113883.12.485
<b>SymbolicName</b>	Extended Priority Codes
<b>Description</b>	Table of codes describing the urgency of a request carried in an order. See the Comment/Usage Note in the table below, as the table contains both precoordinated codes that may be used in an HL7 field or component and also explanatory patterns illustrating the syntax used to construct expressions using the codes and other modifiers.
<b>Type</b>	User

<b>Steward</b>	OO
<b>where used</b>	TQ1-9
<b>HL7 Version Introduced</b>	2.5

**Table 0485 Coded Content**

<b>Value</b>	<b>Display Name</b>	<b>Definition</b>	<b>Comment/ Usage Note</b>	<b>Status</b>
S	Stat		With highest priority	
A	ASAP		Fill after S orders	
R	Routine		Default	
P	Preop			
C	Callback			
T	Timing critical		A request implying that it is critical to come as close as possible to the requested time, e.g., for a trough anti-microbial level.	
TS<integer>	Timing critical within <integer> seconds.		This is not a real code, but guidelines how to construct the codes.	D
TM<integer>	Timing critical within <integer> minutes.		This is not a real code, but guidelines how to construct the codes.	D
TH<integer>	Timing critical within <integer> hours.		This is not a real code, but guidelines how to construct the codes.	D
TD<integer>	Timing critical within <integer> days.		This is not a real code, but guidelines how to construct the codes.	D
TW<integer>	Timing critical within <integer> weeks.		This is not a real code, but guidelines how to construct the codes.	D
TL<integer>	Timing critical within <integer> months.		This is not a real code, but guidelines how to construct the codes.	D
PRN	As needed			

0487- Specimen Type

#### Concept Domain Information

<b>Concept Domain Name</b>	DOM: 487
<b>SymbolicName</b>	SpecimenType
<b>Description</b>	The domain of possible values that describe the precise nature of an entity that may be used as the source material for an observation.
<b>Concept Domain Only</b>	no

#### Code System Identification Information

<b>Code System OID</b>	2.16.840.1.113883.18.311
<b>SymbolicName</b>	specimenType

<b>Description</b>	HL7-defined code system of concepts that describe the precise nature of an entity that may be used as the source material for an observation. This is one of two code systems that are used instead of table 0070 (code system 2.16.840.1.113883.18.28) which conflated specimen types and specimen collection methods. Used in HL7 Version 2.x messaging in the SPM segment.
<b>Full Name</b>	Specimen Type Code System
<b>URI</b>	<a href="http://terminology.hl7.org/CodeSystem/v2-0487">http://terminology.hl7.org/CodeSystem/v2-0487</a>

#### Code System Version Information

#### Table 0487 Coded Content

Value	Display Name	Definition	Comment/ Usage Note	Status
ABS	Abscess			
ACNE	Tissue, Acne		Tissue	
ACNFLD	Fluid, Acne		Fluid	
AIRS	Air Sample		Environment	
ALL	Allograft		Tissue	
AMN	Amniotic fluid			
AMP	Amputation		Tissue	
ANGI	Catheter Tip, Angio		Device	

Value	Display Name	Definition	Comment/ Usage Note	Status
ARTC	Catheter Tip, Arterial		Device	
ASERU	Serum, Acute		Blood	
ASP	Aspirate			
ATTE	Environment, Attest		Environment	D
AUTOA	Environmental, Autoclave Ampule		Environment	
AUTOC	Environmental, Autoclave Capsule		Environment	D
AUTP	Autopsy		Tissue	
BBL	Blood bag		Blood	
BCYST	Cyst, Baker's		Condition	
BDY	Whole body		Body submitted for autopsy / carcass submitted	
BIFL	Bile Fluid			
BITE	Bite		Conditions	
BLD	Whole blood			
BLDA	Blood arterial			
BLDCO	Cord blood			
BLDV	Blood venous			
BLEB	Bleb		Condition, Fluid/Tissue	
BLIST	Blister		Condition, Fluid/Tissue	
BOIL	Boil		Condition	
BON	Bone			
BOWL	Bowel contents		Condition	
BPH	Basophils			
BPU	Blood product unit		Blood	
BRN	Burn			
BRSH	Brush		Product; Brush or brushing (these may be 2 separate entries as in a physical brush or a portion thereof vs the substance obtained after a surface has been brushed)	
BRTH	Breath (use EXHLD)			
BRUS	Brushing		Product	
BUB	Bubo		Condition	
BULLA	Bulla/Bullae		Condition	
BX	Biopsy		Tissue	
CALC	Calculus (=Stone)			
CARBU	Carbuncle		Condition	
CAT	Catheter		Device	
CBITE	Bite, Cat		Conditions	
CDM	Cardiac muscle			
CLIPP	Clippings		Condition	
CNJT	Conjunctiva			
CNL	Cannula			
COL	Colostrum			
CONE	Biospy, Cone		Tissue	
CSCR	Scratch, Cat		Condition	
CSERU	Serum, Convalescent		Blood	
CSF	Cerebral spinal fluid			

Value	Display Name	Definition	Comment/ Usage Note	Status
CSITE	Catheter Insertion Site		Device	
CSMY	Fluid, Cystostomy Tube		Fluid	
CST	Fluid, Cyst		Fluid	
CSVR	Blood, Cell Saver		Transfusion	
CTP	Catheter tip		Device	
CUR	Curretage		Uterine specimen obtained by curettage = Currettings	
CVM	Cervical Mucus			
CVPS	Site, CVP		Site	
CVPT	Catheter Tip, CVP		Device	
CYN	Nodule, Cystic		Condition	
CYST	Cyst			
DBITE	Bite, Dog		Conditions	
DCS	Sputum, Deep Cough		Condition	
DEC	Ulcer, Decubitus		Condition	
DEION	Environmental, Water (Deionized)		Environment	
DIA	Dialysate		Condition	
DIAF	Dialysis Fluid		Fluid used for dialysis - is a product	
DISCHG	Discharge		Condition	
DIV	Diverticulum		Condition	
DRN	Drain		Device	
DRNG	Drainage, Tube		Device	
DRNGP	Drainage, Penrose		Condition	
DUFL	Duodenal fluid			
EARW	Ear wax (cerumen)			
EBRUSH	Brush, Esophageal		Product	
EEYE	Environmental, Eye Wash		Environment	
EFF	Environmental, Effluent		Environment	
EFFUS	Effusion		Condition	
EFOD	Environmental, Food		Environment	
EISO	Environmental, Isolette		Environment	
ELT	Electrode			
ENVIR	Environmental, Unidentified Substance		Environment	
EOS	Eosinophils			
EOTH	Environmental, Other Substance		Environment; (Substance is Known but not in code Table)	
ESOI	Environmental, Soil		Environment	
ESOS	Environmental, Solution (Sterile)		Environment	
ETA	Aspirate, Endotrach		Aspirate	
ETTP	Catheter Tip, Endotracheal		Device	
ETTUB	Tube, Endotracheal		Device	
EWHI	Environmental, Whirlpool		Environment	
EXG	Gas, exhaled (=breath)			
EXS	Shunt, External		Condition	
EXUDTE	Exudate		Condition	
FAW	Environmental, Water (Well)		Environment	

<b>Value</b>	<b>Display Name</b>	<b>Definition</b>	<b>Comment/ Usage Note</b>	<b>Status</b>
FBLOOD	Blood, Fetal		Blood	
FGA	Fluid, Abdomen		Fluid	
FIB	Fibroblasts			
FIST	Fistula			
FLD	Fluid, Other		Fluid	
FLT	Filter			
FLU	Fluid, Body unsp			
FLUID	Fluid		Fluid	
FOLEY	Catheter Tip, Foley		Device	
FRS	Fluid, Respiratory		Fluid	
FSCLP	Scalp, Fetal		Condition	
FUR	Furuncle		Condition	
GAS	Gas			
GASA	Aspirate, Gastric		Aspirate	
GASAN	Antrum, Gastric		Tissue	
GASBR	Brushing, Gastric		Product	
GASD	Drainage, Gastric		Condition	
GAST	Fluid/contents, Gastric			
GENL	Genital lochia			
GENV	Genital vaginal			
GRAFT	Graft		Condition	
GRAFTS	Graft Site		Condition	
GRANU	Granuloma		Condition	
GROSH	Catheter, Groshong		Device	
GSOL	Solution, Gastrostomy		Product	
GSPEC	Biopsy, Gastric		Tissue	
GT	Tube, Gastric		Device	
GTUBE	Drainage Tube, Drainage (Gastrostomy)		Condition	
HAR	Hair			
HBITE	Bite, Human		Conditions	
HBLUD	Blood, Autopsy		Blood	
HEMAQ	Catheter Tip, Hemaquit		Device	
HEMO	Catheter Tip, Hemovac		Device	
HERNI	Tissue, Herniated		Tissue	
HEV	Drain, Hemovac		Device	
HIC	Catheter, Hickman		Device	
HYDC	Fluid, Hydrocele		Fluid	
IBITE	Bite, Insect		Conditions	
ICYST	Cyst, Inclusion		Condition	
IDC	Catheter Tip, Indwelling		Device	
IHG	Gas, Inhaled			
ILEO	Drainage, Ileostomy		Condition	
ILLEG	Source of Specimen Is Illegible			
IMP	Implant		Device	
INCI	Site, Incision/Surgical		Site	
INFIL	Infiltrate		Condition	
INS	Insect		Object	
INTRD	Catheter Tip, Introducer		Device	

Value	Display Name	Definition	Comment/ Usage Note	Status
ISLT	Isolate			
IT	Intubation tube			
IUD	Intrauterine Device		Device (Common Usage)	
IVCAT	Catheter Tip, IV		Device	
IVFLD	Fluid, IV		Fluid	
IVTIP	Tubing Tip, IV		Device	
JEJU	Drainage, Jejunal		Condition	
JNTFLD	Fluid, Joint		Fluid	
JP	Drainage, Jackson Pratt		Condition	
KELOI	Lavage		Product	
KIDFLD	Fluid, Kidney		Fluid	
LAVG	Lavage, Bronhial		Product	
LAVGG	Lavage, Gastric		Product	
LAVGP	Lavage, Peritoneal		Product	
LAVPG	Lavage, Pre-Bronch		Product	
LENS1	Contact Lens		Device	
LENS2	Contact Lens Case		Device	
LESN	Lesion		Condition	
LIQ	Liquid, Unspecified			
LIQO	Liquid, Other			
LNA	Line arterial		Arterial blood collected via arterial line	
LNV	Line venous		Venous blood collected via venous line	
LSAC	Fluid, Lumbar Sac		Fluid	
LYM	Lymphocytes			
MAC	Macrophages			
MAHUR	Catheter Tip, Makurkour		Device	
MAR	Marrow		Bone marrow	
MASS	Mass		Condition	
MBLD	Blood, Menstrual		Blood	
MEC	Meconium			
MILK	Breast milk		Mother's milk specimen	
MLK	Milk		Food specimen	
MUCOS	Mucosa		Condition	
MUCUS	Mucus		Condition	
NAIL	Nail		Finger or toe nail sample	
NASDR	Drainage, Nasal		Condition	
NEDL	Needle		Device	
NEPH	Site, Nephrostomy		Site	
NGASP	Aspirate, Nasogastric		Aspirate	
NGAST	Drainage, Nasogastric		Condition	
NGS	Site, Naso/Gastric		Site	
NODUL	Nodule(s)		Condition	
NSECR	Secretion, Nasal		Condition	
ORH	Other			
ORL	Lesion, Oral		Condition (Common Usage)	
OTH	Source, Other			
PACEM	Pacemaker		Device	
PAFL	Pancreatic fluid			

<b>Value</b>	<b>Display Name</b>	<b>Definition</b>	<b>Comment/ Usage Note</b>	<b>Status</b>
PCFL	Fluid, Pericardial			
PDSIT	Site, Peritoneal Dialysis		Site	
PDTS	Site, Peritoneal Dialysis Tunnel		Site	
PELVA	Abscess, Pelvic		Condition	
PENIL	Lesion, Penile		Condition (Common Usage)	
PERIA	Abscess, Perianal		Condition, Abscess & Body Part	
PILOC	Cyst, Pilonidal		Condition	
PINS	Site, Pin		Site	
PIS	Site, Pacemaker Insetion		Site	
PLAN	Plant Material		Object	
PLAS	Plasma		Blood	
PLB	Plasma bag		Blood	
PLC	Placenta			
PLEVS	Serum, Peak Level		Blood	
PLR	Pleural fluid (thoracentesis fluid)			
PMN	Polymorphonuclear neutrophils			
PND	Drainage, Penile		Condition	
POL	Polyps		Condition	
POPGS	Graft Site, Popliteal		Condition	
POPLG	Graft, Popliteal		Condition	
POPLV	Site, Popliteal Vein		Site	
PORTA	Catheter, Porta		Device	
PPP	Plasma, Platelet poor		Blood	
PROST	Prosthetic Device		Device	
PRP	Plasma, Platelet rich		Blood	
PSC	Pseudocyst		Condition	
PUNCT	Wound, Puncture		Condition	
PUS	Pus			
PUSFR	Pustule		Condition	
PUST	Pus		Condition	
QC3	Quality Control		Environment	
RANDU	Urine, Random		Condition	
RBC	Erythrocytes			
RBITE	Bite, Reptile		Conditions	
RECT	Drainage, Rectal		Condition	
RECTA	Abscess, Rectal		Condition	
RENALC	Cyst, Renal		Condition	
RENC	Fluid, Renal Cyst		Fluid	
RES	Respiratory		Condition (Ambiguous)	
SAL	Saliva			
SCAR	Tissue, Keloid (Scar)		Tissue	
SCLV	Catheter Tip, Subclavian		Device	
SCROA	Abscess, Scrotal		Condition	
SECRE	Secretion(s)		Fluid/Secretion	
SER	Serum			
SHU	Site, Shunt		Site	
SHUNF	Fluid, Shunt		Fluid	

Value	Display Name	Definition	Comment/ Usage Note	Status
SHUNT	Shunt		Condition	
SITE	Site		Site	
SKBP	Biopsy, Skin		Tissue	
SKN	Skin			
SMM	Mass, Sub-Mandibular		Condition	
SMN	Seminal fluid			
SNV	Fluid, synovial (Joint fluid)			
SPRM	Spermatozoa			
SPRP	Catheter Tip, Suprapubic		Device	
SPRPB	Cathether Tip, Suprapubic		Device	
SPS	Environmental, Spore Strip		Environment	
SPT	Sputum			
SPTC	Sputum - coughed			
SPTT	Sputum - tracheal aspirate			
SPUT1	Sputum, Simulated		Condition	
SPUTIN	Sputum, Inducted		Condition	
SPUTSP	Sputum, Spontaneous		Condition	
STER	Environmental, Sterrad		Environment	
STL	Stool = Fecal			
STONE	Stone, Kidney		Condition	
SUBMA	Abscess, Submandibular		Condition	
SUBMX	Abscess, Submaxillary		Condition	
SUMP	Drainage, Sump		Condition	
SUP	Suprapubic Tap		Product	
SUTUR	Suture		Object	
SWGZ	Catheter Tip, Swan Gantz		Device	
SWT	Sweat			
TASP	Aspirate, Tracheal		Aspirate	
TEAR	Tears			
THRIB	Thrombocyte (platelet)			
TISS	Tissue			
TISU	Tissue ulcer			
TLC	Cathether Tip, Triple Lumen		Device	
TRAC	Site, Tracheostomy		Site	
TRANS	Transudate		Condition	
TSERU	Serum, Trough		Blood	
TSTES	Abscess, Testicular		Condition	
TTRA	Aspirate, Transtracheal		Aspirate	
TUBES	Tubes		Device	
TUMOR	Tumor		Condition	
TZANC	Smear, Tzanck			
UDENT	Source, Unidentified			
UMED	Unknown Medicine		for forensic and possibly chemistry testing	
UR	Urine			
URC	Urine clean catch			
URINB	Urine, Bladder Washings		Condition	
URINC	Urine, Catheterized		Condition	
URINM	Urine, Midstream		Condition	
URINN	Urine, Nephrostomy		Condition	

<b>Value</b>	<b>Display Name</b>	<b>Definition</b>	<b>Comment/ Usage Note</b>	<b>Status</b>
URINP	Urine, Pedibag		Device	
URNS	Urine sediment			
URT	Urine catheter			
USCOP	Urine, Cystoscopy		Condition	
USPEC	Source, Unspecified			
USUB	Unkown substance			
VASTIP	Catheter Tip, Vas		Device	
VENT	Catheter Tip, Ventricular		Device	
VITF	Vitreous Fluid			
VOM	Vomitus			
WASH	Wash		Product	
WASI	Washing, e.g. bronchial washing		Product	
WAT	Water			
WB	Blood, Whole		Blood	
WBC	Leukocytes			
WEN	Wen		Tissue	
WICK	Wick			
WND	Wound			
WNDA	Wound abscess			
WNDD	Wound drainage			
WNDE	Wound exudate			
WORM	Worm		Object	
WRT	Wart		Tissue	
WWA	Environmental, Water		Environment	
WWO	Environmental, Water (Ocean)			
WWT	Environmental, Water (Tap)		Environment	

#### 0488- Specimen Collection Method

##### Concept Domain Information

<b>Concept Domain Name</b>	DOM: 488
<b>SymbolicName</b>	SpecimenCollectionMethod
<b>Description</b>	The domain of possible values for the specimen collection method.
<b>Concept Domain Only</b>	no

##### Code System Identification Information

<b>Code System OID</b>	2.16.840.1.113883.18.312
<b>SymbolicName</b>	specimenCollectionMethod
<b>Description</b>	HL7-defined code system of concepts specifying the specimen collection method. Used in HL7 Version 2.x messaging in the SPM segment.
<b>Full Name</b>	Specimen Collection Method Code System
<b>URI</b>	<a href="http://terminology.hl7.org/CodeSystem/v2-0488">http://terminology.hl7.org/CodeSystem/v2-0488</a>

### Table 0488 Coded Content

<b>Value</b>	<b>Display Name</b>	<b>Definition</b>	<b>Comment/ Usage Note</b>	<b>Status</b>
FNA	Aspiration, Fine Needle			
PNA	Arterial puncture			
BIO	Biopsy			
BCAE	Blood Culture, Aerobic Bottle			
BCAN	Blood Culture, Anaerobic Bottle			
BCPD	Blood Culture, Pediatric Bottle			
CAP	Capillary Specimen			
CATH	Catheterized			
EPLA	Environmental, Plate			
ESWA	Environmental, Swab			
LNA	Line, Arterial			
CVP	Line, CVP			
LNV	Line, Venous			
MARTL	Martin-Lewis Agar			
ML11	Mod. Martin-Lewis Agar			
PACE	Pace, Gen-Probe			
PIN	Pinworm Prep			
KOFFP	Plate, Cough			
MLP	Plate, Martin-Lewis			
NYP	Plate, New York City			
TMP	Plate, Thayer-Martin			
ANP	Plates, Anaerobic			

Value	Display Name	Definition	Comment/ Usage Note	Status
BAP	Plates, Blood Agar			
PRIME	Pump Prime			
PUMP	Pump Specimen			
QC5	Quality Control For Micro			
SCLP	Scalp, Fetal Vein			
SCRAPS	Scrapings			
SHA	Shaving			
SWA	Swab			
SWD	Swab, Dacron tipped			
WOOD	Swab, Wooden Shaft			
TMOT	Transport Media,			
TMAN	Transport Media, Anaerobic			
TMCH	Transport Media, Chlamydia			
TMM4	Transport Media, M4			
TMY	Transport Media, Mycoplasma			
TMPV	Transport Media, PVA			
TMSC	Transport Media, Stool Culture			
TMUP	Transport Media, Ureaplasma			
TMVI	Transport Media, Viral			
VENIP	Venipuncture			

0489- Risk Codes

#### Concept Domain Information

Concept Domain Name	DOM: 489
SymbolicName	RiskCodes
Description	The domain of possible values for any known or suspected specimen hazards, e.g., exceptionally infectious agent or blood from a hepatitis patient.
Concept Domain Only	no

#### Code System Identification Information

Code System OID	2.16.840.1.113883.18.313
SymbolicName	risks
Description	Code system of concepts specifying any known or suspected specimen hazards, e.g., exceptionally infectious agent or blood from a hepatitis patient. Used in HL7 Version 2.x messaging in the SPM and PAC segments.
Full Name	Risk Codes Code System
URI	<a href="http://terminology.hl7.org/CodeSystem/v2-0489">http://terminology.hl7.org/CodeSystem/v2-0489</a>

<b>Type</b>	User
<b>Steward</b>	OO
<b>where used</b>	SPM-16, PAC-8
<b>HL7 Version Introduced</b>	2.5

#### Table 0489 Coded Content

<b>Value</b>	<b>Display Name</b>	<b>Definition</b>	<b>Comment/ Usage Note</b>	<b>Status</b>
BIO	Biological		The dangers associated with normal biological materials. I.e. potential risk of unknown infections. Routine biological materials from living subjects.	
COR	Corrosive		Material is corrosive and may cause severe injury to skin, mucous membranes and eyes. Avoid any unprotected contact.	
ESC	Escape Risk		The entity is at risk for escaping from containment or control.	
AGG	Aggressive		A danger that can be associated with certain living subjects, including humans.	
IFL	MaterialDangerInflammable		Material is highly inflammable and in certain mixtures (with air) may lead to explosions. Keep away from fire, sparks and excessive heat.	
EXP	Explosive		Material is an explosive mixture. Keep away from fire, sparks, and heat.	
INF	MaterialDangerInfectious		Material known to be infectious with human pathogenic microorganisms. Those who handle this material must take precautions for their protection.	
BHZ	Biohazard		Material contains microorganisms that are an environmental hazard. Must be handled with special care.	
INJ	Injury Hazard		Material is solid and sharp (e.g., cannulas.) Dispose in hard container.	
POI	Poison		Material is poisonous to humans and/or animals. Special care must be taken to avoid incorporation, even of small amounts.	

Value	Display Name	Definition	Comment/ Usage Note	Status
RAD	Radioactive		Material is a source for ionizing radiation and must be handled with special care to avoid injury of those who handle it and to avoid environmental hazards.	

0490- Specimen Reject Reason

#### Concept Domain Information

Concept Domain Name	DOM: 490
SymbolicName	SpecimenRejectReason
Description	The domain of possible values for the reasons a specimen may be rejected for a specified observation/result/analysis.
Concept Domain Only	no

#### Code System Identification Information

Code System OID	2.16.840.1.113883.18.314
SymbolicName	specimenRejectReason
Description	HL7-defined code system of reasons a specimen may be rejected for a specified observation/result/analysis. Used in HL7 Version 2.x messaging in the SPM segment.
Full Name	Specimen Reject Reason Code System
URI	<a href="http://terminology.hl7.org/CodeSystem/v2-0490">http://terminology.hl7.org/CodeSystem/v2-0490</a>

#### Code System Version Information

Effective Date	30.08.2003

<b>HL7 Version Introduced</b>	2.5

#### Table 0506 Coded Content

<b>Value</b>	<b>Display Name</b>	<b>Definition</b>	<b>Comment/ Usage Note</b>	<b>Status</b>
N	Nurse prerogative		Where a set of two or more orders exist and the Nurse, or other caregiver, has the prerogative to choose which order will be administered at a particular point in time. For example, Milk of Magnesia PO 30 ml qhs (at bedtime)	

<b>Value</b>	<b>Display Name</b>	<b>Definition</b>	<b>Comment/ Usage Note</b>	<b>Status</b>
			Dulcolax Supp R @ hs prn Colace 100 mg capsule PO bid The nurse would be administering MOM, but may add the Colace and may also give the Dulcolax Supp as needed to promote and maintain regularity.	
C	Compound		A compound is an extempo order which may be made up of multiple drugs. For example, many hospitals have a standard item called "Magic Mouthwash". The item is ordered that way by the physician. The extempo items will contain multiple products, such as Maalox, Benadryl, Xylocaine, etc. They will all be mixed together and will be dispensed in a single container.	
T	Tapering		A tapering order is one in which the same drug is used, but it has a declining dosage over a number of days. For example, Decadron 0.5 mg is often ordered this way. The order would look like this:  Decadron 0.5 mg qid (four times a day) for 2 days, then Decadron 0.5 mg tid (three times a day) for 2 days, then Decadron 0.5 mg bid (twice a day) for 2 days, then Decadron 0.5 mg qd (daily) for 2 days, then stop.	
E	Exclusive		An exclusive order is an order where only one of the multiple items should be administered at any one dosage time. The nurse may chose between the alternatives, but should only give ONE of them. An example would be: Phenergan 25 mg PO, IM or R q6h prn (orally, intramuscularly, or rectally every 6 hours as needed).	
S	Simultaneous		A simultaneous order is 2 or more drugs which are ordered to be given at the same time. A common example of this would be Demerol and Phenergan (Phenergan is given with the Demerol to control the nausea that Demerol can cause). The order could be: Demerol 50 mg IM with Phenergan 25 mg IM q4h prn (every 4 hours as needed).	

## 0507- Observation Result Handling

### Concept Domain Information

<b>Concept Domain Name</b>	DOM: 507
<b>SymbolicName</b>	ObservationResultHandling

<b>Description</b>	The domain of possible values regarding the handling of a result. For example, an order may specify that the result (e.g., an x-ray film) should be given to the patient for return to the requestor.
<b>Concept Domain Only</b>	no

#### Code System Identification Information

<b>Code System OID</b>	2.16.840.1.113883.18.331

<b>Value</b>	<b>Display Name</b>	<b>Definition</b>	<b>Comment/ Usage Note</b>	<b>Status</b>
RI	Received into inventory (for specified patient)		Status determined by Filler	
RD	Reserved and ready to dispense		Status determined by Filler	
RS	Reserved (ordered and product allocated for the patient)		Status determined by Filler	
RE	Released (no longer allocated for the patient)		Status determined by Placer or Filler	
DS	Dispensed to patient location		Status determined by Filler	
RA	Returned unused/no longer needed		Status determined by Filler	
RL	Returned unused/keep linked to patient for possible use later		Status determined by Filler	
WA	Wasted (product no longer viable)		Status determined by Filler	
PT	Presumed transfused (dispensed and not returned)		Status determined by Filler	
CR	Released into inventory for general availability		Status determined by Filler	
RQ	Request to dispense blood product		Status determined by Placer	

## 0511- BP Observation Status Codes Interpretation

### Concept Domain Information

<b>Concept Domain Name</b>	DOM: 511
<b>SymbolicName</b>	BpObservationStatusCodesInterpretation
<b>Description</b>	The domain of possible values to specify the interpretation for the blood product observation status codes. A status is considered preliminary until a blood product has reached a final disposition for the patient. For example, when the product is first cross-matched and a status message is sent, it would be considered preliminary. When the product is dispensed to the patient, that status would also be considered preliminary. However, once the product is transfused, the status would be considered final.

<b>Concept Domain Only</b>	no
----------------------------	----

#### Code System Identification Information

<b>Code System OID</b>	2.16.840.1.113883.18.334
<b>SymbolicName</b>	bpObservationStatusCodesInterpretation
<b>Description</b>	HL7-defined code system of concepts used to specify the interpretation for the blood product observation status codes. A status is considered preliminary until a blood product has reached a final disposition for the patient. For example, when the product is first cross-matched and a status message is sent, it would be considered preliminary. When the product is dispensed to the patient, that status would also be considered preliminary. However, once the product is transfused, the status would be considered final. Used in the Blood Product Dispense Status (BPX) and Blood Product Transfusion/Disposition (BTX) segments in HL7 Version 2.x messaging.

0513- Blood Product Transfusion/Disposition Status

**Concept Domain Information**

<b>Concept Domain Name</b>	DOM: 513
<b>SymbolicName</b>	BloodProductTransfusion_DispositionStatus
<b>Description</b>	The domain of possible values to specify the current status of the specified blood product as indicated by the placer. For example, the placer may return the blood product to the transfusion service unused because an IV could not be started. The blood component may have been entered, but the line was clogged and could not be used, in which case the component must be wasted. A final status would indicate that the product has actually been "transfused."
<b>Concept Domain Only</b>	no

### Code System Identification Information

<b>Code System OID</b>	2.16.840.1.113883.18.335

**Table 0513 Coded Content**

Value	Display Name	Definition	Comment/ Usage Note	Status
RA	Returned unused and unlinked	Blood product was returned unused, because it is no longer needed.		
RL	Returned unused but linked	Blood product was returned unused, because it is not currently needed, but should remain linked to the patient for future use.		
WA	Wasted	The blood product is no longer viable.		
TI	Transfusion Interrupted	Transfusion of the blood product was interrupted and considered ended; a reason for interruption is usually also reported.	This is not expected to be an end state; transfusion will either be ended or restarted.	
TR	Transfusion Ended with Reactions	The blood product has been transfused and it caused an adverse reaction.		
TS	Transfusion Started	Transfusion of the blood product has been started and is in progress	This code may be used for restart if interrupted as well.	
TX	Transfusion Ended	The blood product has been transfused with a normal end to the transfusion.		

#### 0514- Transfusion Adverse Reaction

##### Concept Domain Information

Concept Domain Name	DOM: 514
SymbolicName	TransfusionAdverseReaction
Description	The domain of possible values that specify the type of adverse reaction that the recipient of the blood product experienced.
Concept Domain Only	no

### Table 0530 Coded Content

Value	Display Name	Definition	Comment/ Usage Note	Status
AE	American Express			
DEA	Drug Enforcement Agency		The US Drug Enforcement Administration does not solely assign DEA numbers in the United States. Hospitals have the authority to issue DEA numbers to their medical residents. These DEA numbers are based upon the hospital's DEA number, but the authority rests with the hospital on the	

Value	Display Name	Definition	Comment/ Usage Note	Status
			assignment to the residents. Thus, DEA as an Assigning Authority is necessary in addition to DEA as an Identifier Type.	
DOD	Department of Defense		In some countries e.g., the US, more than one department may issue a military identifier. Hence, US is not sufficient as the Assigning Authority.	
MC	Master Card			
VA	Veterans Affairs			
VI	Visa			

0531- Institution

#### Concept Domain Information

<b>Concept Domain Name</b>	DOM: 531

<b>SymbolicName</b>	SpecimenCollectionSite
<b>Description</b>	The domain of possible values that specify the modifying or qualifying description(s) about the specimen collection site. This Domain differs from SpecimenSourceSite in those cases where the source site must be approached via a particular site (e.g., anatomic location). For example, in the case where a liver biopsy is obtained via a percutaneous needle, the collection site would be the point of entry of the needle. For venous blood collected from the left radial vein, the collection site could be "antecubital fossa".
<b>Concept Domain Only</b>	yes

0544- Container Condition

#### Concept Domain Information

<b>Concept Domain Name</b>	DOM: 544
<b>SymbolicName</b>	ContainerCondition

<b>Description</b>	The domain of possible values to specify at each receipt the status of the container in which the specimen is shipped in chain of custody cases where specimens are moved from lab to lab. If the container is compromised in any way (seal broken, container cracked or leaking, etc.), then this status needs to be recorded for legal reasons.
<b>Concept Domain Only</b>	no

#### **Code System Identification Information**

<b>Code System OID</b>	2.16.840.1.113883.18.353
<b>SymbolicName</b>	containerCondition
<b>Description</b>	HL7-defined code system of concepts used to specify at each receipt the status of the container in which the specimen is shipped in chain of custody cases where specimens are moved from lab to lab. If the container is compromised in any way (seal broken, container cracked or leaking, etc.), then this status needs to be recorded for legal reasons. Used in the Specimen (SPM), Shipment (SHP) and Shipment Package (PAC) segments in HL7 Version 2.x messaging.

### Table 0617 Coded Content

<b>Value</b>	<b>Display Name</b>	<b>Definition</b>	<b>Comment/ Usage Note</b>	<b>Status</b>
M	Mailing		<p>Identifies an address for mail correspondence from a healthcare provider as stipulated by the subject.</p> <p>For example, under the tenets of certain privacy regulations, it is exclusive to the patient and is typically maintained at the encounter or visit level versus the person level as it only has relevance to the specifics of a given encounter. This is an exception category of address in that the patient has stipulated that they want all correspondence relevant to a given encounter sent to this address in lieu of any other address on file. Providers are required to accommodate such requests under HIPAA promulgated regulation. Note that mailing and legal address may be mutually exclusive as defined below. (Implementors are reminded that although the privacy regulation requires the provider to honor such requests, it does require the provider to enquire whether the patient has a preferred address other than the one volunteered.)</p>	
V	Visit		Identifies an address at which the individual is physically located and may be visited.	
C	Classification		Identifies an address used for the purpose of demographic classification or searching. Such	

Value	Display Name	Definition	Comment/ Usage Note	Status
			addresses frequently contain insufficient information to be used as mailing or visit addresses. For example, they may only indicate country and postal code, without providing a street address.

#### Table 0642 Coded Content

<b>Value</b>	<b>Display Name</b>	<b>Definition</b>	<b>Comment/ Usage Note</b>	<b>Status</b>
D	DOP/DOQ		Corresponds to the theory that calculates the appropriate order point and recommends the quantity to order based on system parameters and historical trends. DOP stands for Dynamic Order Point, and DOQ stands for Dynamic Order Quantity.	

<b>Value</b>	<b>Display Name</b>	<b>Definition</b>	<b>Comment/ Usage Note</b>	<b>Status</b>
M	MIN/MAX		Corresponds to theory - the quantity recommended is the Order Quantity, less the On Hand Quantity, and less the On Order Quantity. The Order Amount is the desired Maximum On Hand Quantity.	
O	Override		The quantity recommended is the Order Quantity, less the On Order Quantity. The Order Amount is the amount to order when the On Hand reaches the Order Point.

### Table 0702 Coded Content

<b>Value</b>	<b>Display Name</b>	<b>Definition</b>	<b>Comment/ Usage Note</b>	<b>Status</b>
FLS	Flash		Used to quickly sterilize instruments that were dropped during surgery.	
PRV	Prevac		A prevac cycle is vacuum assisted.	
GRV	Gravity		A gravity cycle is executed at atmospheric pressure.	
LQD	Liquid		A cycle specific to sterilizing liquids.	
EXP	Express		An express cycle is similar to a flash cycle but the supply item is wrapped.	
DRT	Dart		A dart cycle is a special cycle used to test the integrity of the sterilizer chamber to hold a vacuum.	
DRW	Dart Warm-up Cycle		A dart warm-up cycle is used to bring the sterilizer chamber up to operating temperature in order to run a dart test cycle.	
THR	Thermal			
ISO	Isothermal			
BWD	Bowie-Dick Test		A Bowie-Dick test cycle is a special cycle used to test the integrity of the sterilizer chamber to hold a vacuum.	
LKT	Leak Test		A leak test cycle tests the integrity of the sterilizer chamber to hold a vacuum over a specific period of time.	
WFP	Wrap/Steam Flush Pressure Pulse (Wrap/SFPP)		A Wrap/SFPP cycle uses steam pulses instead of a vacuum during the conditioning phase of the cycle when the supply item is unwrapped.	
SFP	Steam Flush Pressure Pulse		An SFPP cycle uses steam pulses instead of a vacuum during the conditioning phase of the cycle when the supply item is wrapped.	
CMW	Chemical Wash		A chemical wash cycle.	
PEA	Peracetic Acid		A peracetic acid cycle.	
EOH	EO High Temperature

<b>Value</b>	<b>Display Name</b>	<b>Definition</b>	<b>Comment/ Usage Note</b>	<b>Status</b>
PersDEID	personal de-identified	Personal policy on collection, access, use, or disclosure of de-		

<b>Value</b>	<b>Display Name</b>	<b>Definition</b>	<b>Comment/ Usage Note</b>	<b>Status</b>
	information policy	identified information as defined by the information subject or by applicable jurisdictional law.		
ALL	All		This code is for backwards compatibility only as of v2.9. If any of 1..* ARV-4 sensitivity codes (Table 0179) apply to the entire message, then ERL is not populated. This emulates the current Table 0717 code "ALL".	D
DEM	All demographic data		This code has been replaced by the v3 concept "DEMO" as of v2.9. Since this is describing a sensitivity, it will be sent in ARV-4.	D
LOC	Patient Location		This code has been replaced by the v3 concept "PATLOC" as of v2.9. Since this is describing a sensitivity, it will be sent in ARV-4.	D
PID-7	Date of Birth		This code has been replaced by the v3 concept "DOB" as of v2.9. Since this is describing a sensitivity, it will be sent in ARV-4.	D
PID-17	Religion		This code has been replaced by the v3 concept "REL" as of v2.9. Since this is describing a sensitivity, it will be sent in ARV-4.	D
HIV	HIV status and results		This code has been replaced by the v3 concept "HIV" as of v2.9. Since this is describing a sensitivity, it will be sent in ARV-4.	D
STD	Sexually transmitted diseases		This code has been replaced by the v3 concept "STD" as of v2.9. Since this is describing a sensitivity, it will be sent in ARV-4.	D
PSY	Psychiatric Mental health		This code has been replaced by the v3 concept "SPI" as of v2.9. Since this is describing a sensitivity, it will be sent in ARV-4.	D
DRG	Drug		This code has been replaced by the v3 concept "DRGIS" as of v2.9. Since this is describing a sensitivity, it will be sent in ARV-4.	D
SMD	Sensitive medical data		This code has been replaced by the several concepts that are more granular v3 <a href="#">ActCode_ActPrivacyPolicy_Inform</a>	D

<b>Value</b>	<b>Display Name</b>	<b>Definition</b>	<b>Comment/ Usage Note</b>	<b>Status</b>
			ationSensitivityPolicy code, e.g., DIA (diagnosis information sensitivity) and PRS (patient requested information sensitivity) as of v2.9. Since this is describing a sensitivity, it will be sent in ARV-4.	
NO	None		This code is for backwards compatibility only as of v2.9. If no restrictions, don't send an ARV segment altogether. If sent, ARV-3 is a required element however. To emulate 0717 "NONE", populate ARV-3 with code from new ActCode_ActPolicyType__ActInformationPolicy such as OrgNSI (organizational non-sensitive information policy) or PersNSI (personal non-sensitive information policy). Don't populate ARV-7. E.g., Device record that is not sensitive. If you have a situation where an ARV-4 is valued, as required by, e.g., an organizational policy related to disclosure of a VIP's health status or location at a facility, and the VIP has authorized disclosure as public information, one may use OrgPI (organizational public information policy - Organizational policy on collection, access, use, or disclosure of public information as defined by the organization or governing jurisdiction) to value ARV-3 indicating that the policy permits the disclosure of VIP sensitive information as coded in ARV-4.	D
OO	Opt out all registries (HIPAA)		Map to similar code in new ActCode_ActPolicyType_ActConsent_ActPrivacyConsentDirective_RegistryConsentDirective, which are any of these: OPTOUT, OPTOUTE, OOC, OOS	D

	information policy	by the organization or by applicable jurisdictional law.		
OrgUII	organizational uncontrolled unclassified information policy	Organizational policy on collection, access, use, or disclosure of uncontrolled unclassified information as defined by the organization or by applicable jurisdictional law.		
PersIP	personal information policy	Personal policy on collection, access, use, or disclosure of information.		
PersNSI	personal non-sensitive information policy	Personal policy on collection, access, use, or disclosure of information deemed non-sensitive by the information subject.		
PersLDS	personal limited data set information policy	Personal policy on collection, access, use, or disclosure of information in a limited data set by the information subject.		
PersPI	personal public information policy	Personal policy on collection, access, use, or disclosure of information deemed public by the information subject.		
GRANTORCHOICE	grantor choice	A grantor's terms of agreement to which a grantee may assent or dissent, and which may include an opportunity for a grantee to request restrictions or extensions.  Comment: A grantor typically is able to stipulate preferred terms of agreement when the grantor has control over the topic of the agreement, which a grantee must accept in full or may be offered an opportunity to extend or restrict certain terms.	If the grantor's term of agreement must be accepted in full, then this is considered ""basic consent"". If a grantee is offered an opportunity to extend or restrict certain terms, then the agreement is considered ""granular consent"".  Examples: (1) Healthcare: A PHR account holder [grantor] may require any PHR user [grantee] to accept the terms of agreement in full, or may permit a PHR user to extend or restrict terms selected by the account holder or requested by the PHR user. (2) Non-healthcare: The owner of a resource server [grantor] may require any authorization server [grantee] to meet authorization	

Value	Display Name	Definition	Comment/ Usage Note	Status
			requirements stipulated in the grantor's terms of agreement.	
IMPLIED	implied consent	<p>A grantor's presumed assent to the grantee's terms of agreement is based on the grantor's behavior, which may result from not expressly assenting to the consent directive offered, or from having no right to assent or dissent offered by the grantee.</p> <p>Comment: Implied or ""implicit"" consent occurs when the behavior of the grantor is understood by a reasonable person to signal agreement to the grantee's terms.</p>	<p>Implied consent with no opportunity to assent or dissent to certain terms is considered ""basic consent"".</p> <p>Examples: (1) Healthcare: (a) A patient schedules an appointment with a provider, and either does not take the opportunity to expressly assent or dissent to the provider's consent directive, does not have an opportunity to do so, as in the case where emergency care is required, or simply behaves as though the patient [grantor] agrees to the rights granted to the provider [grantee] in an implicit consent directive. (b) An injured and unconscious patient is deemed to have assented to emergency treatment by those permitted to do so under jurisdictional laws, e.g., Good Samaritan laws. (2) Non-healthcare: (a) Upon receiving a driver's license, the driver is deemed to have assented without explicitly consenting to undergoing field sobriety tests. (b) A corporation that does business in a foreign nation is deemed to have deemed to have assented without explicitly consenting to abide by that nation's laws.</p>	
IMPLIEDD	implied consent with opportunity to dissent	<p>A grantor's presumed assent to the grantee's terms of agreement, which is based on the grantor's behavior, and includes a right to dissent to certain terms.</p> <p>Comment: A grantor assenting to the grantee's terms of agreement may or may not exercise a right to dissent to grantor selected terms or to</p>	<p>Implied or ""implicit"" consent with an ""opportunity to dissent"" occurs when the grantor's behavior is understood by a reasonable person to signal assent to the grantee's terms of agreement whether the grantor requests or the grantee approves further restrictions, is considered ""granular consent"".</p> <p>Examples: (1) Healthcare: (a) A healthcare provider deems a patient's assent to disclosure of health information to family members and friends, but offers</p>	

Value	Display Name	Definition	Comment/ Usage Note	Status
		grantee's selected terms to which a grantor may dissent.	an opportunity or permits the patient to dissent to such disclosures.(b) A health information exchanges deems a patient to have assented to disclosure of health information for treatment purposes, but offers the patient an opportunity to dissent to disclosure to particular provider organizations. (2) Non-healthcare: A bank deems a banking customer's assent to specified collection, access, use, or disclosure of financial information as a requirement of holding a bank account, but provides the user an opportunity to limit third-party collection, access, use or disclosure of that information for marketing purposes.	
NOCONSENT	no consent	<p>No notification or opportunity is provided for a grantor to assent or dissent to a grantee's terms of agreement.</p> <p>Comment: A "No Consent" policy scheme provides no opportunity for accommodation of an individual's preferences, and may not comply with Fair Information Practice Principles [FIPP] by enabling the data subject to object, access collected information, correct errors, or have accounting of disclosures.</p>	<p>The grantee's terms of agreement, may be available to the grantor by reviewing the grantee's privacy policies, but there is no notice by which a grantor is apprised of the policy directly or able to acknowledge.</p> <p>Examples: (1) Healthcare: (a) Without notification or an opportunity to assent or dissent, a patient's health information is automatically included in and available (often according to certain rules) through a health information exchange. Note that this differs from implied consent, where the patient is assumed to have consented. (b) Without notification or an opportunity to assent or dissent, a patient's health information is collected, accessed, used, or disclosed for research, public health, security, fraud prevention, court order, or law enforcement. (2) Non-healthcare: (a) Without notification or an opportunity to assent or dissent, a consumer's healthcare or non-healthcare internet searches are aggregated</p>

			for secondary uses such as behavioral tracking and profiling. (b) Without notification or an opportunity to assent or dissent, a consumer's location and activities in a shopping mall are tracked by RFID tags on purchased items	
OPTIN	opt-in	A grantor's assent to the terms of an agreement offered by a grantee without an opportunity for to dissent to any terms.  Comment: Acceptance of a grantee's terms pertaining, for example, to permissible activities, purposes of use, handling caveats, expiry date, and revocation policies.	Opt-in with no opportunity for a grantor to restrict certain permissions sought by the grantee is considered ""basic consent"".  Examples: (1) Healthcare: A patient [grantor] signs a provider's [grantee's] consent directive form, which lists permissible collection, access, use, or disclosure activities, purposes of use, handling caveats, and revocation policies. (2) Non-healthcare: An employee [grantor] signs an employer's [grantee's] non-disclosure and non-compete agreement.	
OPTINR	opt-in with restrictions	A grantor's assent to the grantee's terms of an agreement with an opportunity for to dissent to certain grantor or grantee selected terms.  Comment: A grantor dissenting to the grantee's terms of agreement may or may not exercise a right to assent to grantor's pre-approved restrictions or to grantee's selected terms to which a grantor may dissent.	Opt-in with restrictions is considered ""granular consent"" because the grantor has an opportunity to narrow the permissions sought by the grantee.  Examples: (1) Healthcare: A patient assent to grantee's consent directive terms for collection, access, use, or disclosure of health information, and dissents to disclosure to certain recipients as allowed by the provider's pre-approved restriction list. (2) Non-healthcare: A cell phone user assents to the cell phone's privacy practices and terms of use, but dissents from location tracking by turning off the cell phone's tracking capability.	
OPTOUT	opt-out	A grantor's dissent to the terms of agreement offered by a grantee without an opportunity	Opt-out with no opportunity for a grantor to permit certain permissions sought by the grantee is considered ""basic consent"".	

Value	Display Name	Definition	Comment/ Usage Note	Status
		<p>for to assent to any terms.</p> <p>Comment: Rejection of a grantee's terms of agreement pertaining, for example, to permissible activities, purposes of use, handling caveats, expiry date, and revocation policies.</p>	<p>Examples: (1) Healthcare: A patient [grantor] declines to sign a provider's [grantee's] consent directive form, which lists permissible collection, access, use, or disclosure activities, purposes of use, handling caveats, revocation policies, and consequences of not assenting. (2) Non-healthcare: (a) A patient [grantor] declines to sign a provider's [grantee's] consent directive form, which lists permissible collection, access, use, or disclosure activities, purposes of use, handling caveats, revocation policies, and consequences of not assenting. (b) A citizen [grantor] refuses to enroll in mandatory government [grantee] health insurance based on religious beliefs, which is an exemption.</p>	
OPTOUTE	opt-out with exceptions	<p>A grantor's dissent to the grantee's terms of agreement except for certain grantor or grantee selected terms.</p> <p>Comment: A rejection of a grantee's terms of agreement while assenting to certain permissions sought by the grantee or requesting approval of additional grantor terms.</p>	<p>Opt-out with exceptions is considered a ""granular consent"" because the grantor has an opportunity to accept certain permissions sought by the grantee or request additional grantor terms, while rejecting other grantee terms.</p> <p>Examples: (1) Healthcare: A patient [grantor] dissents to a health information exchange consent directive with the exception of disclosure based on a limited ""time to live"" shared secret [e.g., a token or password], which the patient can give to a provider when seeking care. (2) Non-healthcare: A social media user [grantor] dissents from public access to their account, but assents to access to a circle of friends.</p>	
EMRGONLY	opt-in emergency only	Privacy consent directive restricting or prohibiting access, use, or disclosure of personal information, including de-identified information, and	To specify the scope of an "EMRGONLY" consent directive within a policy domain, use one or more of the following Purpose of Use codes in the ActReason

		or for a condition for which recovery is authorized or with respect to which the United States is deemed to be a third party beneficiary under the Act entitled 'An Act to provide for the recovery from tortiously liable third persons of the cost of hospital and medical care and treatment furnished by the United States' (Public Law 87–693; 42 U.S.C. 2651 et seq.; commonly known as the 'Federal Medical Care Recovery Act').		
HIPAAConsent	HIPAA Consent	A code representing U.S. Public Law 104-191 Health Insurance Portability and Accountability Act (HIPAA) Privacy Rule (45 CFR Section 164.522), which stipulates the process by which a covered entity seeks agreement from an individual regarding how it will use and disclose the individual's protected health information for treatment, payment, and health care operations is termed a "consent." The Privacy Rule permits, but does not require, a covered entity to voluntarily obtain patient consent for uses and disclosures of protected health information for treatment, payment, and health care operations. Covered entities that do so have complete discretion to design a process that best suits	Used to indicate the legal authority for assigning security labels to governed information. In this case, where collection, access, use, or disclosure of healthcare information is governed by 45 CFR Section 164.522 use "HIPAAConsent" as the security label policy code.  Since information governed by a 45 CFR Section 164.522 has a level of confidentiality protection that is more stringent than the normal level of protection under HIPAA 45 CFR Section 164.506 Uses and disclosures to carry out treatment, payment, or health care operations <a href="https://www.gpo.gov/fdsys/pkg/CFR-2017-title45-vol1/pdf/CFR-2017-title45-vol1-sec164-506.pdf">https://www.gpo.gov/fdsys/pkg/CFR-2017-title45-vol1/pdf/CFR-2017-title45-vol1-sec164-506.pdf</a> , assign the HL7 Confidentiality code "R" (restricted).

### Code System Identification Information

<b>Code System OID</b>	2.16.840.1.113883.5.4
<b>SymbolicName</b>	ActCode
<b>Description</b>	<p>A code specifying the particular kind of Act that the Act-instance represents within its class.</p> <p>Constraints: The kind of Act (e.g. physical examination, serum potassium, inpatient encounter, charge financial transaction, etc.) is specified with a code from one of several, typically external, coding systems. The coding system will depend on the class of Act, such as LOINC for observations, etc.</p> <p>Conceptually, the Act.code must be a specialization of the Act.classCode. This is why the structure of ActClass domain should be reflected in the superstructure of the ActCode domain and then individual codes or externally referenced vocabularies subordinated under these domains that reflect the ActClass structure.</p> <p>Act.classCode and Act.code are not modifiers of each other but the Act.code concept should really imply the Act.classCode concept. For a negative example, it is not appropriate to use an Act.code "potassium" together with an Act.classCode for "laboratory observation" to somehow mean "potassium laboratory observation" and then use the same Act.code for "potassium" together with Act.classCode for "medication" to mean "substitution of potassium". This mutually modifying use of Act.code and Act.classCode is not permitted.</p> <p>Code system of concepts specifying the reason for the restricted access. Used in HL7 Version 2.x messaging in the ARV segment.</p>

### Value Set Information

<b>Value Set OID</b>	2.16.840.1.113883.1.11.20429
<b>SymbolicName</b>	InformationSensitivityPolicy
<b>Description</b>	Value Set of codes that specify the reason for the restricted access. Sensitivity codes are not useful for interoperability outside of a policy domain because sensitivity policies are typically localized and vary drastically across policy domains even for the same information

	category because of differing organizational business rules, security policies, and jurisdictional requirements. For example, an "employee" sensitivity code would make little sense for use outside of a policy domain. "Taboo" would rarely be useful outside of a policy domain unless there are jurisdictional requirements requiring that a provider disclose sensitive information to a patient directly. Sensitivity codes may be more appropriate in a legacy system's Master Files in order to notify those who access a patient's orders and observations about the sensitivity policies that apply. Newer systems may have a security engine that uses a sensitivity policy's criteria directly. The specializable Sensitivity Act.code may be useful in some scenarios if used in combination with a sensitivity identifier and/or Act.titleValue Set of codes that specify the reason for the restricted access.

### Table 0871 Coded Content

<b>Value</b>	<b>Display Name</b>	<b>Definition</b>	<b>Comment/ Usage Note</b>	<b>Status</b>
COR	Corrosive		Material is corrosive and may cause severe injury to skin, mucous membranes and eyes. Avoid any unprotected contact.	
FLA	Flammable		Material is highly flammable and in certain mixtures (with air) may lead to explosions. Keep away from fire, sparks and excessive heat.	
EXP	Explosive		Material is an explosive mixture. Keep away from fire, sparks, and heat.	
INJ	Injury Hazard		Material is solid and sharp (e.g., cannulas.) Dispose in hard container.	

Value	Display Name	Definition	Comment/ Usage Note	Status
TOX	Toxic		Material is toxic to humans and/or animals. Special care must be taken to avoid incorporation, even of small amounts.	
RAD	Radioactive		Material is a source for ionizing radiation and must be handled with special care to avoid injury of those who handle it and to avoid environmental hazards.	
UNK	Unknown		Material hazard level is unknown.	

0879- Product/Service Code

#### Concept Domain Information

Concept Domain Name	DOM: 879
SymbolicName	Product_ServiceCode
Description	The domain of possible values specifying what service was delivered/received.
Concept Domain Only	yes

#### 0912- Participation

##### Concept Domain Information

<b>Concept Domain Name</b>	DOM: 912
<b>SymbolicName</b>	Participation
<b>Description</b>	The domain of possible values that represent functional involvement of a caregiver or member of a care team with an activity being transmitted (e.g., Case Manager, Evaluator, Transcriber, Nurse Care Practitioner, Midwife, Physician Assistant, etc.).
<b>Concept Domain Only</b>	no

##### Code System Identification Information

<b>Code System OID</b>	2.16.840.1.113883.18.420
<b>SymbolicName</b>	participation
<b>Description</b>	HL7-defined code system of concepts that represent functional involvement of a caregiver or member of a care team with an activity being transmitted (e.g., Case Manager, Evaluator, Transcriber, Nurse Care Practitioner, Midwife, Physician Assistant, etc.). Used in HL7 Version 2.x messaging in the PRT segment.

#### Table 0912 Coded Content

<b>Value</b>	<b>Display Name</b>	<b>Definition</b>	<b>Comment/ Usage Note</b>	<b>Status</b>
AAP	Alert Acknowledging Provider			
AC	Administration Cosigner	Person that cosigned the prescription		
AD	Admitting Provider		This role is used in the PRT associated with the PV1 segment, when more information about PV1-17 Admitting doctor is desired.	
AHP	Authorized Performing Health Professional	The specific Health Professional who has been approved to perform the ordered services for the patient.	This role is used in the PRT associated with the AUT segment, which represents an authorization or a pre-authorization for a referred procedure or requested service by the payor covering the patient's health care. This code is used when the	

<b>Value</b>	<b>Display Name</b>	<b>Definition</b>	<b>Comment/ Usage Note</b>	<b>Status</b>
			authorization is for a person.	
AI	Assistant/Alternate Interpreter			
AP	Administering Provider		This role is used in the PRT associated with the RXA segment, when more information about RXA-10 Administering Provider is desired.	
APO	Authorized Performing Provider Organization	The Provider Organization that has been approved to perform the sanctioned procedures to which the patient was referred to.	This role is used in the PRT associated with the AUT segment, which represents an authorization or a pre-authorization for a referred procedure or requested service by the payor covering the patient's health care. This code is used when the authorization is for an organization.	
ARI	Assistant Result Interpreter		This role is used in the PRT associated with the OBR segment, where OBR-33 Assistant Result Interpreter has been marked for backwards compatibility only.	
AT	Attending Provider		This role is used in the PRT associated with the PV1 segment, when more information about PV1-7 Attending doctor is desired.	
AUT	Author/Event Initiator	Identifies the entity responsible for initiating the event	This role is used in the PRT associated with the ORC segment, where ORC-19 Action By	

Value	Display Name	Definition	Comment/ Usage Note	Status
			has been marked for backwards compatibility only.	
CLPO	Collecting Provider Organization	The organization that is responsible for collecting the specimen.	This role is used in the PRT associated with the OBR segment, where OBR-10 Collector Identifier, when intended to convey the organization information, has been marked for backwards compatibility only.	
CP	Consulting Provider			
DIE	De-Identification Entity	Organization, person or device that has the authority to remove a specimen identifier.		
DP	Dispensing Provider		This role is used in the PRT associated with the RXD segment, where RXD-10 Dispensing Provider has been marked for backwards compatibility only.	
EARI	Expected Assistant Result Interpreter	The Assistant Result Interpreter who is expected to interpret the result (in the future).	This will support filtering orders into the correct work queue of the Assistant Result Interpreter.	
ED	Entering Device	Identifies the device that was used to enter the order into the system.	This role is used in the PRT associated with the ORC segment, where ORC-18 Entering Device has been marked for backwards compatibility only.	
EO	Entering Organization	Identifies the organization that entered the order into the system.	This role is used in the PRT associated with the ORC segment, where ORC-17 Entering Organization has been marked for	

Value	Display Name	Definition	Comment/ Usage Note	Status
			backwards compatibility only.	
EP	Entering Person	Identifies the person that entered the order into the system	Replaces ORC-10 Entered By	
EPRI	Expected Principal Result Interpreter	The Principal Result Interpreter who is expected to interpret the result (in the future).	This will support filtering orders into the correct work queue of the Principal Result Interpreter.	
EQUIP	Equipment		This role is used in the PRT associated with the OBX segment, where OBX-18 Equipment Instance Identifier has been marked for backwards compatibility only.	
FHCP	Family Health Care Professional			
FL	From Location	Describes the location (coordinates) of the specimen/container in the previous holder / storage equipment before the move or the geographical location from which the specimen/container was moved.		
MDIR	Medical Director			
OF	Ordering Facility	The facility from where the order was placed	This role is used in the PRT associated with the ORC segment, where ORC-21 Ordering Facility Name, ORC-22 Ordering Facility Address and ORC-23 Ordering Facility Phone Number have been marked for backwards compatibility only.	
OP	Ordering Provider		This role is used in the PRT associated with either the ORC segment, where ORC-12 Ordering Provider, OBR-16 Ordering Provider,	

Value	Display Name	Definition	Comment/ Usage Note	Status
			ORC-24 Ordering Provider Address have been marked for backwards compatibility only, or the OBR segment, where OBR-16 Ordering Provider has been marked for backwards compatibility only; the RXO segment, when more information about RXO-14 Ordering Provider's DEA Number is desired; the RXE segment, where RXE-13 Ordering Provider's DEA Number has been marked for backwards compatibility only.	
OPO	Ordering Provider Organization	The organization the ordering provider is associated with.	This code is broader than Referring Provider Organization (RPO); it can be used for inter and intra-organizational orders.	
OS	Outside Site(s) Where Observation May Be Performed		This role is used in the PRT associated with the OM1 segment, where OM1-27 Outside Site(s) Where Observation May Be Performed has been deprecated.	
PB	Packed by			
PH	Pharmacist	Identifies the person taking responsibility for the prescription dispense	This role is used in the PRT associated with the RXE segment, where RXE-14 Pharmacist/Treatment Supplier's Verifier ID has been marked	

<b>Value</b>	<b>Display Name</b>	<b>Definition</b>	<b>Comment/ Usage Note</b>	<b>Status</b>
			for backwards compatibility only.	
PI	Primary Interpreter			
PO	Performing Organization			
POMD	Performing Organization Medical Director		This role is used in the PRT associated with the OBX segment, where OBX-25 Performing Organization Medical Director has been marked for backwards compatibility only	
PP	Primary Care Provider			
PPH	Patient Preferred Pharmacy	Pharmacy the patient would prefer to use for any future medication orders.	When a patient registers, this allows a system to indicate the default pharmacy to which the provider should send prescribed medication orders.  Usage Note: Most likely to be used in ADT messages for outpatient care.	
PRI	Principal Result Interpreter	Identifies the person responsible for interpreting the results of the study/test	This role is used in the PRT associated with the OBR segment, where OBR-32 Principal Result Interpreter has been marked for backwards compatibility only.	
RCT	Results Copies To			
RHP	Referring Health Professional	The Health Professional who refers the patient.		
RIE	Re-Identification Entity	Organization, person or device that has the authority to assign a specimen identifier.		
RO	Responsible Observer		This role is used in the PRT associated with the OBX segment, where OBX-16 Responsible	

Value	Display Name	Definition	Comment/ Usage Note	Status
			Observer has been marked for backwards compatibility only	
RP	Referring Provider		This role is used in the PRT associated with the PV1 segment, when more information about PV1-8 Referring doctor is desired.	
RPO	Referring Provider Organization	The Provider Organization that refers the patient.		
RT	Referred to Provider			
SB	Send by			
SC	Specimen Collector	The person that collected the specimen.	This role is used in the PRT associated with the OBR segment, where OBR-10 Collector Identifier, when intended to convey person information, has been marked for backwards compatibility only	
TL	To Location	Describes the location (coordinates) of the specimen/container in the previous holder / storage equipment after the move or the geographical location to which the specimen/container was moved.		
TN	Technician		This role is used in the PRT associated with the OBR segment, where OBR-34 Technician has been marked for backwards compatibility only	
TR	Transcriptionist		This role is used in the PRT associated with the OBR segment, where OBR-35 Transcriptionist has been marked for	

Value	Display Name	Definition	Comment/ Usage Note	Status
			backwards compatibility only	
VP	Verifier (Verifying Person)	Identifies the person verifying the dispense / a step in the dispense process / verifying the treatment corresponds to the order	This role is used in the PRT associated with the ORC segment, where Replaces ORC-11 Verified By has been marked for backwards compatibility only	
VPS	Verifying Pharmaceutical Supplier (not sure how to dissect Pharmacist/Treatment Supplier's Verifier ID)		Usage Note: Use of this code is deprecated; depending on the role of the person use either PH or VP.	D
VTS	Verifying Treatment Supplier (not sure how to dissect Pharmacist/Treatment Supplier's Verifier ID)		Usage Note: Use of this code is deprecated; depending on the role of the person use either PH or VP.	D
WAY	Waypoint			
WAYR	Waypoint Recipient			

## 0913- Monetary Denomination Code

### Concept Domain Information

Concept Domain Name	DOM: 913
SymbolicName	MonetaryDenominationCode
Description	The domain of possible values specifying the denomination in which the quantity is expressed. Values commonly used are the three-character codes specified in ISO-4217 (1.0.4217 iso4217).
Concept Domain Only	yes

### Table Metadata

**Table 0935 Coded Content**

Value	Display Name	Definition	Comment/ Usage Note	Status
NRG	No reason given, donor decided to stop without giving a reason			
PCD	Phone Call-Donor			
DCW	Couldn't wait			
CFT	Couldn't follow through with donation (scared)			
DBB	Bathroom			
DNI	Phlebotomy Issue			
ASC	Apheresis Software Crash			
BSC	Manufacturing Software Crash			
GFE	General Facility Emergency		Power outage, natural disaster (tornado, flood, hurricane, etc.), air conditioning failure, etc.	

0936- Observation Type

**Concept Domain Information**

<b>Concept Domain Name</b>	DOM: 936
<b>SymbolicName</b>	V2ObservationType
<b>Description</b>	The domain of possible values for types of observations to enable systems to distinguish between observations sent along with an order, versus observations sent as the result to an order.
<b>Concept Domain Only</b>	no

**Code System Identification Information**

<b>Code System OID</b>	2.16.840.1.113883.18.439
<b>SymbolicName</b>	observationType
<b>Description</b>	HL7-defined code system of concepts specifying types of observations to enable systems to distinguish between observations sent along with an order, versus observations sent as the result to an order. Used in HL7 Version 2.x messaging in the OBX segment.
<b>Full Name</b>	Observation Type Code System

<b>Type</b>	HL7
<b>HL7 Version Introduced</b>	2.8.2

## Table 0937 Coded Content

<b>Value</b>	<b>Display Name</b>	<b>Definition</b>	<b>Comment/ Usage Note</b>	<b>Status</b>
AOE	Ask at Order Entry		Sub-type of QST (Question) - OBX-5 value is answer to an Ask at Order Entry question	
ASC	Ask at Specimen Collection		Sub-type of QST (Question) - OBX-5 value is answer to an Ask at Specimen Collection question	
MCS	Micro Culture Status	Sub-type of RSLT (Result) This term identifies observations that give overall culture outcome, when no specific organism is being named.	Examples are: no growth, normal flora	
MID	Micro Isolate Descriptor	Sub-type of RSLT (Result) This term identifies any other observations about the isolate.	Examples: catalase positive, hemolytic, etc.	
MIG	Micro Isolate Growth Quantity	Sub-type of RSLT (Result) This term identifies growth levels of an isolate – can be numeric or categorical.	Examples: <10,000 CFU, >100,00 CFU, Few, Moderate, Many, etc.	
MIN	Micro Isolate Name	Sub-type of RSLT (Result) This term identifies observations that name a specific organism either at the species or the genus level.	Examples are: Genus Serratia, Neisseria meningitidis, Escherichia coli O157:H7, but also identification on a culture plate like presumptive Proteus species.	
MIR	Micro Isolate Related		Sub-type of RSLT (Result) - qualifies the result as an isolate.	D
MIRM	Micro Isolate Related Modifier		Sub-type of RSLT (Result) - result is a modifier of the isolate (e.g., Few, Some, etc.)	D
MNIR	Micro Non-Isolate Related		Sub-type of RSLT (Result) - qualifies result as microbiology not related to any isolate (e.g., gram stain observations)	D
MOD	Micro Other Descriptor	Sub-type of RSLT (Result) This term identifies observations that do not fit		

Value	Display Name	Definition	Comment/ Usage Note	Status
		the culture status, but is not at the isolate level.		
MSS	Micro Sample Stain	Sub-type of RSLT (Result) This term identifies observations on gram stains (and other stains or smears) on the clinical sample.	Examples are: many gram positive rods, acid fast bacteria seen, etc.	
SUP	Supplemental Result		Sub-type of RSLT (Result) - result coming over is additional material, for example points on a graph, an image, raw instrument data, links to related observations, etc.	
SUR	Susceptibility Related		Sub-type of RSLT (Result) - result value is for micro susceptibility/sensitivity	
UNSP	Unspecified		Sub-type of RSLT (Result) - result falls outside of the other sub-types.	

## 0938- Collection Event/Process Step Limit

### Concept Domain Information

Concept Domain Name	DOM: 938
SymbolicName	CollectionEvent_ProcessStepLimit
Description	The domain of possible values specifying the limit for a collection event or process step.
Concept Domain Only	no

### Code System Identification Information

Code System OID	2.16.840.1.113883.18.441
SymbolicName	collectionEvent
Description	HL7-defined code system of concepts specifying the limit for the collection event or process step. Used in HL7 Version 2.x messaging in the OMC segment.
Full Name	Collection Event/Process Step Limit Code System
URI	<a href="http://terminology.hl7.org/CodeSystem/v2-0938">http://terminology.hl7.org/CodeSystem/v2-0938</a>

<b>Table OID</b>	2.16.840.1.113883.12.948
<b>SymbolicName</b>	Relationship Type
<b>Description</b>	HL7-defined table of codes specifying the type of relationship identified by Relationship Instance Identifier (REL-3) that is established between the Source Information Instance (REL-4) and the Target Information Instance (REL-5).
<b>Type</b>	User
<b>HL7 Version Introduced</b>	2.9

### Table 0948 Coded Content

<b>Value</b>	<b>Display Name</b>	<b>Definition</b>	<b>Comment/ Usage Note</b>	<b>Status</b>
CAUS	Causes/cause d	Source universal service identifier causes/caused the outcome(s) on the target	Example: a procedure caused complication(s)	
COMP	Component of	Target universal service identifier is a component of source universal identifier	Example: one care plan activity (target) is a component of another care plan activity (source)	

Value	Display Name	Definition	Comment/ Usage Note	Status
CONCR	Concurrently	Source and target universal service identifier should start concurrently	Example: two care plan activities should start concurrently	
EVID	Evidence	Source universal service identifier provides evidence for target universal service identifier	Example: observation result provides evidence for certain care plan activity or treatment action	
INTF	Interferes / interfered	Source universal service identifier interferes / interfered with fulfilment of target universal service identifier	Example: patient financial or physical constraints interferes / interfered with fulfilment of goal	
LIMIT	Limits/limited	Source universal service identifier limits/limited the fulfillment of target universal service identifier	Example: patient condition limits the extend that planned treatment can be implemented	
SUCCD	Succeeds	Target universal service identifier should succeed (starts after end of) source universal service identifier	Example: one care plan activity (target) should start after completion of another (source)	
SVTGT	Service target	Target universal service identifier is the object of the service identified by the source universal service identifier	Example: An order requests clarification or interpretation of a previous clinical laboratory test result	
TRIG	Triggers/trigged	Source universal service identifier triggers action of target universal service identifier	Example: a bleeding complication triggers the review and change in anti-coagulant dosage	

#### 0949- Order Control Code Reason

##### Concept Domain Information

Concept Domain Name	DOM: 949
SymbolicName	orderControlCodeReason
Description	The domain of possible values that describe reasons for the chosen order control codes.
Concept Domain Only	no

##### Code System Identification Information

Code System OID	2.16.840.1.113883.18.449
SymbolicName	orderControlCodeReason
Description	HL7-defined code system of concepts that describe reasons for the chosen order control codes. Used in HL7 Version 2 messaging in the ORC segment.
Full Name	Order Control Code Reason Code System
URI	<a href="http://terminology.hl7.org/CodeSystem/v2-0949">http://terminology.hl7.org/CodeSystem/v2-0949</a>

### Code System Version Information

<b>Effective Date</b>	01.12.2019
<b>Version</b>	1
<b>HL7 Version Introduced</b>	2.9

### Value Set Information

<b>Value Set OID</b>	2.16.840.1.113883.21.472
<b>SymbolicName</b>	hl7VS-orderControlCodeReason
<b>Description</b>	Value Set of codes that describe reasons for the chosen order control codes.
<b>Full Name</b>	Order Control Code Reason Value Set
<b>URI</b>	<a href="http://terminology.hl7.org/ValueSet/v2-0949">http://terminology.hl7.org/ValueSet/v2-0949</a>

### Table Metadata

<b>Table</b>	0949
<b>Table OID</b>	2.16.840.1.113883.12.949
<b>SymbolicName</b>	Order Control Code Reason
<b>Description</b>	HL7-defined table of codes that describe reasons for the chosen order control codes – this table is extensible; while these codes are intended to be generally useful, they were developed to cover situations for replacement orders (ORC-1 = RO) and recommendations for replacement orders (ORC-1 = RP)
<b>Type</b>	User
<b>Steward</b>	OO
<b>where used</b>	ORC-16
<b>HL7 Version Introduced</b>	2.9

### Table 0949 Coded Content

<b>Value</b>	<b>Display Name</b>	<b>Definition</b>	<b>Comment/ Usage Note</b>	<b>Status</b>
CO	Cost	Order changed based on cost	In an order replacement context, this would accompany proposal of a similar but lower cost order	
ST	Specimen Type	Incorrect specimen type submitted for the requested test	Order placer may accept, cancel and replace, or choose other testing.  Usage Note: Recommend testing that can use the submitted specimen type	
SV	Specimen Volume	Provided specimen volume inadequate for testing	The question is how to use the available specimen. The Order Placer may choose a different subset of tests.  Usage Note: Recommend a subset of ordered tests appropriate for volume	
UN	Unavailable test	Requested test not available	In an order replacement context, an alternative might be proposed.	

## 0950- Order Status Modifier

**Concept Domain Information**

<b>Concept Domain Name</b>	DOM: 950
<b>SymbolicName</b>	orderStatusModifier
<b>Description</b>	The domain of possible values that further define an identified status.
<b>Concept Domain Only</b>	no

**Code System Identification Information**

<b>Code System OID</b>	2.16.840.1.113883.18.450
<b>SymbolicName</b>	orderStatusModifier
<b>Description</b>	HL7-defined code system of concepts used to further define the status identified in ORC-5. Used in HL7 Version 2 messaging in the ORC segment.
<b>Full Name</b>	Order Status Modifier Code System
<b>URI</b>	<a href="http://terminology.hl7.org/CodeSystem/v2-0950">http://terminology.hl7.org/CodeSystem/v2-0950</a>

<b>Type</b>	User
<b>Steward</b>	OO
<b>where used</b>	ORC-25
<b>HL7 Version Introduced</b>	2.9

**Table 0950 Coded Content**

<b>Value</b>	<b>Display Name</b>	<b>Definition</b>	<b>Comment/ Usage Note</b>	<b>Status</b>
EOE	Expiration on event	The order status auto-expires when a specified event occurs		

Value	Display Name	Definition	Comment/ Usage Note	Status
EOT	Expiration on time	The order status is timed and will auto-expire once the prescribed time interval has passed	<p>For example this code would be used to indicate that the order is not currently being worked on but has been placed on a time limited hold awaiting a replacement order. If the hold time expires, default processing will resume.</p> <p>Usage Note: Filler Applications: In an order replacement setting, sent in recommendation for order replacement message (OML), where ORC-5 = HD, indicating that the hold for a response to the recommendation is timed.</p>	

## 0951- Reason for Study

### Concept Domain Information

Concept Domain Name	DOM: 951
SymbolicName	reasonForStudy
Description	The domain of possible values that provide additional information to the universal service identifier on why a test, study or review was ordered.
Concept Domain Only	no

### Code System Identification Information

Code System OID	2.16.840.1.113883.18.451
SymbolicName	reasonForStudy
Description	HL7-defined code system of concepts that provide additional information to the universal service identifier on why a test, study or review was ordered. Initial values are to support the IHE LCC LAB-7 transaction.
Full Name	Reason for Study Code System
URI	<a href="http://terminology.hl7.org/CodeSystem/v2-0951">http://terminology.hl7.org/CodeSystem/v2-0951</a>

### Code System Version Information

**Table 0951 Coded Content**

<b>Value</b>	<b>Display Name</b>	<b>Definition</b>	<b>Comment/ Usage Note</b>	<b>Status</b>
BS	Bank residual specimen	Requests that the specimen should be stored long term		
CR	Confirm results value	Requests verification of previously reported results	Usage Note: Used to indicate why review is requested	
FP	Store residual specimen pending follow up	Requests that the specimen should be saved for a short duration until follow up is completed	Provides instructions for Specimen storage	
IN	Interpret results	Requests interpretation of previously reported results	Usage Note: Used to indicate why review is requested	
IR	Review clinically inconsistent results	Requests comparison of previously reported results amongst themselves	Usage Note: Used to indicate why review is requested	
IT	Incorrect test performed	For process improvement work this code can be used to identify when an incorrect test was performed for the target order	Usage Note: Used to indicate why review is requested	
OP	Test ordering problem	For process improvement work this code can be used to identify orders and the respective results, where problems occurred during ordering	Usage Note: Used to indicate why review is requested	
PI	Patient identification problem	For process improvement work this code can be used to identify when a patient identification issue has occurred on the target order	Usage Note: Used to indicate why review is requested	
SI	Suspected interference	Requests verification of previously reported results due to suspected interference	Usage Note: Used to indicate why review is requested	

Value	Display Name	Definition	Comment/ Usage Note	Status
SP	Sampling problem	For process improvement work this code can be used to identify orders, where problems occurred during sample collection	Usage Note: Used to indicate why review is requested	R
TP	Specimen transport problem	For process improvement work this code can be used to identify orders, where problems occurred during sample transport	Usage Note: Used to indicate why review is requested	
TT	Turnaround time problem	For process improvement work this code can be used to identify results with excessive reporting delay	Usage Note: Used to indicate why review is requested	
XR	Incorrect results	For process improvement work this code can be used to identify when incorrect result were reported for the target order	Usage Note: Used to indicate why review is requested	

## 0952- Confidentiality Classification

### Concept Domain Information

Concept Domain Name	DOM: 952
SymbolicName	Confidentiality
Description	<p>Types of privacy metadata classifying an IT resource (data, information object, service, or system capability) according to its level of sensitivity, which is based on an analysis of applicable privacy policies and the risk of financial, reputational, or other harm to an individual or entity that could result if made available or disclosed to unauthorized individuals, entities, or processes.</p> <p>Usage Note : Confidentiality codes may be used in security labels and privacy markings to classify IT resources based on sensitivity to indicate the obligation of a custodian or receiver to ensure that the protected resource is not made available or disclosed to individuals, entities, or processes (security principals) unless authorized per applicable policies. Confidentiality codes may also be used in the clearances of initiators requesting access to protected resources.</p> <p>Map: Definition aligns with ISO 7498-2:1989 - Confidentiality is the property that information is not made available or disclosed to unauthorized individuals, entities, or processes</p>
Concept Domain Only	no

### Code System Identification Information

Code System OID	2.16.840.1.113883.5.25
SymbolicName	Confidentiality
Description	A set of codes specifying the security classification of acts and roles in accordance with the definition for concept domain D:Confidentiality.
Full Name	Confidentiality Classification Code System
URI	<a href="http://terminology.hl7.org/ValueSet-v2-0952.html">http://terminology.hl7.org/ValueSet-v2-0952.html</a>

### Value Set Information

<b>Value Set OID</b>	2.16.840.1.114222.4.11.7186
<b>SymbolicName</b>	PHVS_Occupation_CDC_Census2010
<b>Description</b>	2010 Occupation coding system used by CDC (NIOSH & NCHS) for coding occupation text. Occupation describes a set of activities or tasks that individuals are paid to perform or, if unpaid, define a person's contribution to a household/family business/community. This code system includes 2010 U.S. Census Bureau occupation codes with modifications made by CDC for unpaid workers and military occupations. The 2010 Census occupation categories are based on the 2010 BLS Standard Occupational Classification (SOC) system. The PH_Industry_CDC_Census2010 code system should be used in conjunction with this occupation code system when coding both industry and occupation. For more information and instructions on using this coding system, see the instruction manual for CDC-Census I&O coding at: <a href="http://www.cdc.gov/niosh/topics/coding/Subscri">http://www.cdc.gov/niosh/topics/coding/Subscri</a> This value set is used within the US.
